Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFS COX9 VT21)

linked to

Brent Crude Oil Future

ISIN DE000VE10KF0

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10KF0 / WKN: VE10KF / Valor: 50078271 / NGM Symbol: MFS COX9 VT21
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Short
Underlying	Brent Crude Oil Future ISIN Underlying: XC0009677409 Bloomberg symbol: CO1 Comdty Reference Agent: IntercontinentalExchange (ICE) Currency: USD
Initial Underlying	Brent Crude Oil Future Nov 2019 Bloomberg symbol: COX9 Comdty
Current Underlying	On each Rollover Date a Rollover procedure shall be carried out whereby the Issuer replaces the respective Current Underlying with another Underlying (future) which, except for the maturity date which is further in the future, has the same or comparable contract specifications. The "**Current Underlying**" from the Issue Date until the first Rollover Date shall be the "**Initial Underlying**", as specified above. On the first Rollover Date this Underlying shall lose its validity and shall be replaced by the Underlying falling due on the Reference Agent in the next following Rollover Month. On each subsequent Rollover Date, the Current Underlying shall be replaced analogously by the underlying contract falling due on the Reference Agent in the next following Rollover Month.
Rollover Date	shall be determined in each case by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) and shall fall within a period of ten Trading Days prior to the last Trading Day of the Current Underlying on the Reference Agent. [In the event that the first notice day of the Current Underlying is before its last Trading Day, the period for the Rollover Date shall begin ten Trading Days prior to the first notice day and shall end with the last Trading Day of the Current Underlying.
Rollover Month(s)	shall be January, February, March, April, May, June, July, August, September, October, November,
Initial Reference Price	USD 64.20
Initial Strike	USD 65.69
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula: $$FL_n = FL_a + \frac{(-FS) \cdot FL_a \cdot n}{360}$$ where: FL_n: Strike following the adjustment = Current Strike. FL_a: Strike before the adjustment. r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent. FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account. n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).

	The result of the calculation shall be rounded downwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.01.
Financing Spread	The Financing Spread on the Issue Date shall amount to 3.50%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%
Current Strike after Rollover	The Current Strike shall be adjusted on each Rollover Date. The adjust-ment shall take place immediately following the adjustment of the Current Strike described above and shall be made using the following formula: $$FL_{ns} = FL_n - \left(RORP_a + ROF\right) + \left(RORP_n - ROF\right)$$ where: FL_{ns}: Current Strike after Rollover FL_n: Current Strike before Rollover $RORP_n$: Rollover Reference Price for the Current Underlying after Rollover ROF: Rollover Fee
Rollover Reference Price	The "*Rollover Reference Price*" shall be determined on each Rollover Date by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) based on the prices of the Current Underlying traded and published on the Reference Agent within a period of one hour prior to and including the time of determination of the official settlement price of the Current Underlying.
Rollover Fee	The "**Rollover Fee**" shall be an amount in the Currency of the Underlying specified by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) in a range between zero (0) and the Maximum Rollover Fee. It shall depend in particular on the liquidity of the Underlying. The "**Maximum Rollover Fee**" for the entire Term shall be specified on the Issue Date and shall amount to USD 0.00 The "**Initial Rollover Fee**" shall amount to USD 0.00
Ratio	1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is lower than the Current Strike, multiplied by the Ratio, i.e. $$\text{Cash Amount} = \left(\text{Current Strike} - \text{Valuation Price}\right) \cdot \text{Ratio}$$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is higher than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	USD 64.38
Initial Stop-Loss Buffer	1.994%
Maximum Stop-Loss Buffer	15.00%

Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded down to the nearest multiple of the rounding of the Stop-Loss Barrier: $StL = FL_n \cdot (100\ \% - StLP)$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and each Rollover Date. In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Current Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or rises above the Current Stop-Loss Barrier, each determination of the price of the Current Underlying by the Reference Agent during the Observation Period shall be relevant.
Type of Exercise	American Exercise Type
Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019
Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Current Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the settlement price of the Current Underlying determined and published on the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Current Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Current Underlying within a period of one (1) hour during the trading hours for the Current Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be

	(a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Current Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate. "**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for futures or interest rate futures specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

Brent Crude Oil Future

The ICE (Intercontinental Exchange) Brent Crude Future is a liquid and standardized futures contract transaction on predefined types of crude oil of a certain origin (North sea) resp. quality (light, sweet). For the Nearest ICE Brent Crude Oil Future, during its term this product uses as underlying instrument the ICE Brent Crude Future that is next up to expire or whose settlement or expiry date is nearest. For this reason, so-called roll-overs are regularly needed during the term of this product. They are carried out at intervals determined at the discretion of the paying and calculation agent; the discretion of the paying and calculation agent should be orientated towards applicable market practice in so far as possible. On the occasion of such roll-overs, a current ICE Brent Crude Future is replaced by a new ICE Brent Crude Future which has the same or comparable contract specifications with the exception of the later future maturity. Due to continuous roll-overs in the form described, this product, as a rule, always has that Nearest ICE Brent Crude Future as its underlying which guarantees the highest possible liquidity.

Currency: USD

Reference Agent:	IntercontinentalExchange (ICE)
ISIN:	XC0009677409
Bloomberg symbol:	CO1 Comdty
Performance:	Available at www.theice.com

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7

Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10KF0 WKN: VE10KF Valor: 50078271 NGM Symbol: MFS COX9 VT21
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11 Admission to trading on a regulated market or other equivalent markets

– not applicable –

An admission of the Securities to trading on a regulated market or other equivalent markets is not intended.

Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges:

Exchange:	Market segment:
Nordic Growth Market	Nordic MTF Sweden

The date on which the Securities are expected to be included in trading is 26 September 2019.

C.15 Description of how the value of the investment is affected by the value of the underlying instrument

The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities.

Mini Futures of the Option Type "Short" are Securities which enable the Security Holder to participate in the fall of the Underlying on a leveraged basis.

Cash Amount

Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early.

The occurrence of a Barrier Event depends on the performance of the Underlying.

The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is lower than the Strike.

In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike and even the Underlying among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike and Underlying applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is lower than the current Strike.

The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula:

Cash Amount = (Current Strike – Valuation Price) x Ratio.

If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or rises above the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or rises above the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly rising price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally reduced (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually falling simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Additional adjustments in the case of futures or interest rate futures as the Underlying due to the Rollover

In addition to the adjustments described immediately above, in the case of futures or interest rate futures as the Underlying the (current) Underlying – and therefore the reference instrument – of the Securities is also subject to regular change due to the future or interest rate future being exchanged for a new future or interest rate future shortly prior to its maturity ("**Rollover**"). In order to ensure that this Rollover of the Underlying leaves the value of the Securities largely unaffected, the current Strike and the current Stop-Loss Barrier are also adjusted at the same time as the Rollover occurs.

Option Type:	Short
Underlying:	Brent Crude Oil Future (for further details, see C.20)
Ratio:	1
Initial Strike:	USD 65.69
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	USD 64.38
Observation Price:	the price of the Underlying determined and published by the Reference Agent
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.
C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations.	

If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.

Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
	Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and
	Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18 Description of redemption for derivative securities

The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17.

The Cash Amount is converted into the Settlement Currency of the Securities on the Valuation Date in accordance with the relevant conversion rate.

If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.

C.19 Exercise price/ final reference price of the underlying

The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price.

The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the current Underlying within a period of one hour following the occurrence of the Barrier Event.

Reference Price is the settlement price of the Current Underlying determined and published on the Reference Agent on the Valuation Date.

C.20 Description of the underlying and where information on the underlying can be found

The Underlying to which the Securities are linked is:

Brent Crude Oil Future

Currency:	USD
ISIN Underlying:	XC0009677409
Reference Agent:	IntercontinentalExchange (ICE)
Bloomberg symbol:	CO1 Comdty
Performance:	available at www.theice.com

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2 Key information on the key risks relating to the Issuer and the Guarantor

Insolvency risk of the Issuer

The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.

The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.

For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Short* Type, a **rise** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or rising above a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

Potential investors should be aware that an investment in the Securities is associated with exchange rate risks since the rate of exchange between the currency of the Underlying and the Settlement Currency of the Securities may move in a direction that is to their disadvantage.

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying *rises*, Mini Futures of the Short type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or rises above the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price: Issue Date: Value Date: Offer Size: Minimum Trading Lot: Public Offer:	SEK 15.28 26 September 2019 26 September 2019 250,000 Securities 1 Security in Sweden starting from:	 24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10KF0 WKN: VE10KF Valor: 50078271 NGM Symbol: MFS COX9 VT21
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Short" är Värdepapper som gör att investeraren kan delta i en minskning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är lägre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* och till och med Underliggande komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike och Underliggande som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är lägre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (aktuell Strike - Värderingspris) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller överstiger Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller överstiger den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt stigande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt minskar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför minskar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Ytterligare justeringar vad beträffar terminer eller ränteterminer som Underliggande på grund av Rollover

Förutom de justeringar som beskrivs omedelbart ovan kan Värdepappernas (aktuella) Underliggande vad beträffar terminer eller ränteterminer som Underliggande – och därmed referensinstrumentet – även ändras regelbundet på grund av att terminerna eller ränteterminerna byts ut mot nya terminer eller ränteterminer strax innan de löper ut ("**Rollover**"). För att se till att denna Rollover av Underliggande på det stora hela inte inverkar på Värdepappernas värde, justeras även aktuell Strike och aktuell Knock Out-Barriär samtidigt som Rollover inträffar.

Optionstyp:	Short
Underliggande:	Brent Crude Oil Future (mer information finns i C.20)
Grad:	1
Initial Strike:	USD 65,69
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	USD 64,38
Observationspris:	priset på Underliggande fastställs och offentliggörs av Referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.

C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag. Beräkningsagent: Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Betalningsagenter: Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige
C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Kontantbeloppet omräknas till Värdepapperens avräkningsvaluta på Värderingsdagen, i enlighet med relevant omräkningskurs. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för nuvarande Underliggande inom en tid på en timme efter att en Barriärhändelse ägt rum. Referenspris innebär Underliggandes avräkningspris så som fastställt och publicerat av Referensagenten på Värderingsdagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Brent Crude Oil Future</u> Valuta: USD ISIN: XC0009677409 Referensagenten: IntercontinentalExchange (ICE) Bloomberg: CO1 Comdty Prestanda: tillgänglig under www.theice.com Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent.

Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Short* är Underliggandes kurs-, pris- eller nivå**ökning** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller överstiger en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Möjliga investerare bör vara medvetna om att investeringar i Värdepapper medför valutakursrisker eftersom växlingskursen för Underliggandes Valuta och Värdepapperens Avräkningsvaluta kan röra sig i en riktning som är ogynnsam för investeraren.

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **stiger**, innebär Mini-Futures av typen Short en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller överstiger Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 15,28 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFS HM VT24)

linked to

Hennes & Mauritz AB

ISIN DE000VE10KG8

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10KG8 / WKN: VE10KG / Valor: 50078272 / NGM Symbol: MFS HM VT24
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Short
Underlying	Hennes & Mauritz AB Type: Registered Share ISIN Underlying: SE0000106270 Bloomberg symbol: HMB SS Equity Reference Agent: NASDAQ OMX Stockholm Derivatives Exchange: NASDAQ OMX Stockholm Currency: SEK
Initial Reference Price	SEK 187.95
Initial Strike	SEK 198.75
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula:

$$FL_n = FL_a + \frac{(r - FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$$

where:

- FL_n: Strike following the adjustment = Current Strike.
- FL_a: Strike before the adjustment.
- r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.
- FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.
- n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).
- $DivF$: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (*for Securities governed by German law in accordance with sections 315, 317 BGB*) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.
- Div: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (*in accordance with sections 315, 317 BGB*) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "**Ex-Dividend Date**" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.

The result of the calculation shall be rounded downwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.0001.

Financing Spread	The Financing Spread on the Issue Date shall amount to 3.50%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%

Ratio	1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is lower than the Current Strike, multiplied by the Ratio, i.e. $$\text{Cash Amount} = (\text{Current Strike} - \text{Valuation Price}) \cdot \text{Ratio}$$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is higher than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	SEK 188.81
Initial Stop-Loss Buffer	5.00%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded down to the nearest multiple of the rounding of the Stop-Loss Barrier: $$StL = FL_n \cdot (100\,\% - StLP)$$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or rises above the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.

Type of Exercise	American Exercise Type
Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019
Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate.

	"**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for shares, securities representing shares (ADRs or GDRs) and other dividend-bearing securities specified in section 6 and section 7 of the General Conditions shall apply to this Security.

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7

Risk ratio[4]	31 DECEMBER 2017	31 DECEMBER 2018
Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10KG8 WKN: VE10KG Valor: 50078272 NGM Symbol: MFS HM VT24
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Short" are Securities which enable the Security Holder to participate in the fall of the Underlying on a leveraged basis. <u>*Cash Amount*</u> Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is lower than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is lower than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Current Strike – Valuation Price) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or rises above the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or rises above the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly rising price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally reduced (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually falling simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Short
Underlying:	Hennes & Mauritz AB (for further details, see C.20)
Ratio:	1
Initial Strike:	SEK 198.75
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	SEK 188.81
Observation Price:	the price of the Underlying determined and published by the Reference Agent
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.
C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.	

Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18	Description of redemption for derivative securities	The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17. If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.
C.19	Exercise price/ final reference price of the underlying	The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price. The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event. Reference Price is the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
C.20	Description of the underlying and where information on the underlying can be found	The Underlying to which the Securities are linked is: <u>Hennes & Mauritz AB</u> Type: Registered Share Issuer: Hennes & Mauritz AB, Master Samuelsgatan 46°, Stockholm, 106 38, Sweden Currency: SEK ISIN Underlying: SE0000106270 Reference Agent: NASDAQ OMX Stockholm Bloomberg symbol: HMB SS Equity Performance: available at www.bloomberg.com (Symbol: HMB:SS) Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2	Key information on the key risks relating to the Issuer and the Guarantor	**Insolvency risk of the Issuer** The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying. The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent. For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Short* Type, a **rise** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or rising above a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying *rises*, Mini Futures of the Short type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or rises above the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price: Issue Date: Value Date: Offer Size: Minimum Trading Lot: Public Offer:	SEK 11.34 26 September 2019 26 September 2019 250,000 Securities 1 Security in Sweden starting from:	 24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

Balansräkning

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10KG8 WKN: VE10KG Valor: 50078272 NGM Symbol: MFS HM VT24
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Short" är Värdepapper som gör att investeraren kan delta i en minskning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är lägre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är lägre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (aktuell Strike - Värderingspris) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller överstiger Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller överstiger den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt stigande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt minskar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför minskar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Short
Underliggande:	Hennes & Mauritz AB (mer information finns i C.20)
Grad:	1
Initial Strike:	SEK 198,75
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	SEK 188,81
Observationspris:	priset på Underliggande fastställs och offentliggörs av Referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.
C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.	

	Beräkningsagent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz
	Betalningsagenter:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige

C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en tid på en timme efter att en Barriärhändelse ägt rum. Referenspris innebär Underliggandes slutpris så som fastställt och publicerat av Referensagenten på Värderingsdagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Hennes & Mauritz AB</u> Typ: Registrerat andel Emittenten: Hennes & Mauritz AB, Master Samuelsgatan 46°, Stockholm, 106 38, Sweden Valuta: SEK ISIN: SE0000106270 Referensagenten: NASDAQ OMX Stockholm Bloomberg: HMB SS Equity Prestanda: tillgänglig under www.bloomberg.com (Symbol: HMB:SS) Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent. Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Short* är Underliggandes kurs-, pris- eller nivå**ökning** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller överstiger en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **stiger**, innebär Mini-Futures av typen Short en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller överstiger Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 11,34 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFS ERIC VT39)

linked to

Telefonaktiebolaget LM Ericsson

ISIN DE000VE10KH6

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10KH6 / WKN: VE10KH / Valor: 50078273 / NGM Symbol: MFS ERIC VT39
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Short
Underlying	Telefonaktiebolaget LM Ericsson Type: Registered Share ISIN Underlying: SE0000108656 Bloomberg symbol: ERICB SS Equity Reference Agent: NASDAQ OMX Stockholm Derivatives Exchange: NASDAQ OMX Stockholm Currency: SEK
Initial Reference Price	SEK 80.11
Initial Strike	SEK 84.82
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula:

$$FL_n = FL_a + \frac{(r - FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$$

where:

- FL_n: Strike following the adjustment = Current Strike.
- FL_a: Strike before the adjustment.
- r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.
- FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.
- n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).
- $DivF$: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (*for Securities governed by German law in accordance with sections 315, 317 BGB*) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.
- Div: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (*in accordance with sections 315, 317 BGB*) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "**Ex-Dividend Date**" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.

The result of the calculation shall be rounded downwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.0001.

Financing Spread	The Financing Spread on the Issue Date shall amount to 2.50%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%

Ratio	1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is lower than the Current Strike, multiplied by the Ratio, i.e. $$\text{Cash Amount} = (\text{Current Strike} - \text{Valuation Price}) \cdot \text{Ratio}$$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is higher than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	SEK 81.43
Initial Stop-Loss Buffer	4.00%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded down to the nearest multiple of the rounding of the Stop-Loss Barrier: $$StL = FL_n \cdot (100\,\% - StLP)$$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or rises above the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.

Type of Exercise	American Exercise Type
Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019
Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate.

	"**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for shares, securities representing shares (ADRs or GDRs) and other dividend-bearing securities specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

Telefonaktiebolaget LM Ericsson

Type:	Registered Share
Issuer:	Ericsson LM, Telefonvagen 30, S-126 25 Stockholm, Sweden
Currency:	SEK
ISIN:	SE0000108656
Bloomberg symbol:	ERICB SS Equity
Performance:	Available at www.bloomberg.com (Symbol: ERICB:SS)

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

III. FURTHER INFORMATION ON THE OFFER OF THE SECURITIES

1. Stock exchange listing and trading arrangements

Stock exchange listing:	Application is made for the Securities to be included in the regulated unofficial market of Nordic Growth Market (Nordic MTF Sweden). Expected first trading date: 26 September 2019
Market Maker:	Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany

2. Terms of the offer

The Issue Price and the Value Date of the Securities and the start of the Public Offer are specified below.

Issue Price:	SEK 4.95
Value Date:	26 September 2019
Public Offer:	in Sweden starting from: 24 September 2019 The Public Offer will end with the term of the Securities or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the heading “Base Prospectus” until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (Wertpapierprospektgesetz - WpPG)

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7
…trading income	288.8	295.1
…other income	9.9	5.1
Operating expense	800.8*	881.6
thereof…		
…personnel expense	532.6	570.1
…general expense	205.0	246.7
…depreciation, amortization	61.0	68.8
…valuation adjustments, provisions and losses	2.2*	-4.0
Group net profit	209.0	232.2

* The figure regarding net interest income has been changed. The previous year's figures (Total operating income: 1,060.3; net interest income: 68.7; Total operating expense: 801.0; valuation adjustements, provisions and losses: 2.4) have been adjusted accordingly.

Balance Sheet	31 DECEMBER 2017 (CHF MILLION)	31 DECEMBER 2018 (CHF MILLION)
Total assets	22,903.7	26,037.3
Shareholders' equity (excluding minority interests)	1,620.5	1,703.5
Due to customers	9,758.2	12,649.2

BIS capital ratios[1]	31 DECEMBER 2017	31 DECEMBER 2018
CET 1 capital ratio (%) %[2]	18.4	12.3
Tier 1 capital ratio %[3]	18.4	18.9
Total capital ratio (%) %	18.4	18.9

Risk ratio[4]	31 DECEMBER 2017	31 DECEMBER 2018
Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10KH6 WKN: VE10KH Valor: 50078273 NGM Symbol: MFS ERIC VT39
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Short" are Securities which enable the Security Holder to participate in the fall of the Underlying on a leveraged basis. <u>*Cash Amount*</u> Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is lower than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is lower than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Current Strike – Valuation Price) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or rises above the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or rises above the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly rising price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally reduced (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually falling simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Short
Underlying:	Telefonaktiebolaget LM Ericsson (for further details, see C.20)
Ratio:	1
Initial Strike:	SEK 84.82
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	SEK 81.43
Observation Price:	the price of the Underlying determined and published by the Reference Agent
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.
C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.	

Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18 Description of redemption for derivative securities

The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17.

If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.

C.19 Exercise price/ final reference price of the underlying

The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price.

The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event.

Reference Price is the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.

C.20 Description of the underlying and where information on the underlying can be found

The Underlying to which the Securities are linked is:

Telefonaktiebolaget LM Ericsson

Type:	Registered Share
Issuer:	Ericsson LM, Telefonvagen 30, S-126 25 Stockholm, Sweden
Currency:	SEK
ISIN Underlying:	SE0000108656
Reference Agent:	NASDAQ OMX Stockholm
Bloomberg symbol:	ERICB SS Equity
Performance:	available at www.bloomberg.com (Symbol: ERICB:SS)

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2 Key information on the key risks relating to the Issuer and the Guarantor

Insolvency risk of the Issuer

The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.

The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.

For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Short* Type, a **rise** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or rising above a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying *rises*, Mini Futures of the Short type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or rises above the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price: Issue Date: Value Date: Offer Size: Minimum Trading Lot: Public Offer:	SEK 4.95 26 September 2019 26 September 2019 250,000 Securities 1 Security in Sweden starting from:	 24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

Riskförhållande[4]	31 DECEMBER 2017	31 DECEMBER 2018
Genomsnittligt Value-at-Risk (marknads-risk) (miljoner CHF)	2,5	5,4

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10KH6 WKN: VE10KH Valor: 50078273 NGM Symbol: MFS ERIC VT39
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Short" är Värdepapper som gör att investeraren kan delta i en minskning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är lägre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är lägre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (aktuell Strike - Värderingspris) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller överstiger Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller överstiger den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt stigande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt minskar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför minskar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Short
Underliggande:	Telefonaktiebolaget LM Ericsson (mer information finns i C.20)
Grad:	1
Initial Strike:	SEK 84,82
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	SEK 81,43
Observationspris:	priset på Underliggande fastställs och offentliggörs av Referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.

C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.

	Beräkningsagent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz
	Betalningsagenter:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige

C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en tid på en timme efter att en Barriärhändelse ägt rum. Referenspris innebär Underliggandes slutpris så som fastställt och publicerat av Referensagenten på Värderingsdagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Telefonaktiebolaget LM Ericsson</u> Typ: Registrerat andel Emittenten: Ericsson LM, Telefonvagen 30, S-126 25 Stockholm, Sweden Valuta: SEK ISIN: SE0000108656 Referensagenten: NASDAQ OMX Stockholm Bloomberg: ERICB SS Equity Prestanda: tillgänglig under www.bloomberg.com (Symbol: ERICB:SS) Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent. Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Short* är Underliggandes kurs-, pris- eller nivå**ökning** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller överstiger en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **stiger**, innebär Mini-Futures av typen Short en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller överstiger Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 4,95 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFL ERIC VT27)

linked to

Telefonaktiebolaget LM Ericsson

ISIN DE000VE10KJ2

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10KJ2 / WKN: VE10KJ / Valor: 50078274 / NGM Symbol: MFL ERIC VT27
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Long
Underlying	Telefonaktiebolaget LM Ericsson Type: Registered Share ISIN Underlying: SE0000108656 Bloomberg symbol: ERICB SS Equity Reference Agent: NASDAQ OMX Stockholm Derivatives Exchange: NASDAQ OMX Stockholm Currency: SEK
Initial Reference Price	SEK 80.11
Initial Strike	SEK 75.06
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula:

$$FL_n = FL_a + \frac{(r + FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$$

where:

- FL_n: Strike following the adjustment = Current Strike.
- FL_a: Strike before the adjustment.
- r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.
- FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.
- n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).
- $DivF$: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (*for Securities governed by German law in accordance with sections 315, 317 BGB*) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.
- Div: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (*in accordance with sections 315, 317 BGB*) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "**Ex-Dividend Date**" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.

The result of the calculation shall be rounded upwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.0001.

Financing Spread	The Financing Spread on the Issue Date shall amount to 2.50%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%

Ratio	1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is higher than the Current Strike, multiplied by the Ratio, i.e. $\text{Cash Amount} = (\text{ValuationPrice} - \text{Current Strike}) \cdot \text{Ratio}$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is lower than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	SEK 78.06
Initial Stop-Loss Buffer	4.00%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded up to the nearest multiple of the rounding of the Stop-Loss Barrier: $StL = FL_n \cdot (100\ \% + StLP)$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or falls below the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.
Type of Exercise	American Exercise Type

Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019
Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate. "**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website

	http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for shares, securities representing shares (ADRs or GDRs) and other dividend-bearing securities specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

Telefonaktiebolaget LM Ericsson

Type:	Registered Share
Issuer:	Ericsson LM, Telefonvagen 30, S-126 25 Stockholm, Sweden
Currency:	SEK
ISIN:	SE0000108656
Bloomberg symbol:	ERICB SS Equity
Performance:	Available at www.bloomberg.com (Symbol: ERICB:SS)

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

III. FURTHER INFORMATION ON THE OFFER OF THE SECURITIES

1. Stock exchange listing and trading arrangements

Stock exchange listing:	Application is made for the Securities to be included in the regulated unofficial market of Nordic Growth Market (Nordic MTF Sweden). Expected first trading date: 26 September 2019
Market Maker:	Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany

2. Terms of the offer

The Issue Price and the Value Date of the Securities and the start of the Public Offer are specified below.

Issue Price:	SEK 5.31
Value Date:	26 September 2019
Public Offer:	in Sweden starting from: 24 September 2019 The Public Offer will end with the term of the Securities or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the heading “Base Prospectus” until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (Wertpapierprospektgesetz - WpPG)

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7
…trading income	288.8	295.1
…other income	9.9	5.1
Operating expense	800.8*	881.6
thereof…		
…personnel expense	532.6	570.1
…general expense	205.0	246.7
…depreciation, amortization	61.0	68.8
…valuation adjustments, provisions and losses	2.2*	-4.0
Group net profit	209.0	232.2

* The figure regarding net interest income has been changed. The previous year's figures (Total operating income: 1,060.3; net interest income: 68.7; Total operating expense: 801.0; valuation adjustements, provisions and losses: 2.4) have been adjusted accordingly.

Balance Sheet	31 DECEMBER 2017 (CHF MILLION)	31 DECEMBER 2018 (CHF MILLION)
Total assets	22,903.7	26,037.3
Shareholders' equity (excluding minority interests)	1,620.5	1,703.5
Due to customers	9,758.2	12,649.2

BIS capital ratios[1]	31 DECEMBER 2017	31 DECEMBER 2018
CET 1 capital ratio (%) %[2]	18.4	12.3
Tier 1 capital ratio %[3]	18.4	18.9
Total capital ratio (%) %	18.4	18.9

Risk ratio[4]	31 DECEMBER 2017	31 DECEMBER 2018
Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10KJ2 WKN: VE10KJ Valor: 50078274 NGM Symbol: MFL ERIC VT27
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Long" are Securities which enable the Security Holder to participate in the rise of the Underlying on a leveraged basis. *<u>Cash Amount</u>* Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is higher than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is higher than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Valuation Price - Current Strike) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or falls below the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or falls below the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly falling price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally increased (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually rising simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Long
Underlying:	Telefonaktiebolaget LM Ericsson (for further details, see C.20)
Ratio:	1
Initial Strike:	SEK 75.06
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	SEK 78.06
Observation Price:	the price of the Underlying determined and published by the Reference Agent
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.

C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.

Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18 Description of redemption for derivative securities

The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17.

If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.

C.19 Exercise price/ final reference price of the underlying

The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price.

The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event.

Reference Price is the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.

C.20 Description of the underlying and where information on the underlying can be found

The Underlying to which the Securities are linked is:

Telefonaktiebolaget LM Ericsson

Type:	Registered Share
Issuer:	Ericsson LM, Telefonvagen 30, S-126 25 Stockholm, Sweden
Currency:	SEK
ISIN Underlying:	SE0000108656
Reference Agent:	NASDAQ OMX Stockholm
Bloomberg symbol:	ERICB SS Equity
Performance:	available at www.bloomberg.com (Symbol: ERICB:SS)

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2 Key information on the key risks relating to the Issuer and the Guarantor

Insolvency risk of the Issuer

The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.

The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.

For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Long* Type, a **fall** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or falling below a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying **falls**, Mini Futures of the Long type in-volve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or falls below the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price:	SEK 5.31	
		Issue Date:	26 September 2019	
		Value Date:	26 September 2019	
		Offer Size:	250,000 Securities	
		Minimum Trading Lot:	1 Security	
		Public Offer:	in Sweden starting from:	24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

Balansräkning

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

Kapitaltäckningskvoter totalt (%) %	18,4	18,9

Riskförhållande[4]	31 DECEMBER 2017	31 DECEMBER 2018
Genomsnittligt Value-at-Risk (marknads-risk) (miljoner CHF)	2,5	5,4

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10KJ2 WKN: VE10KJ Valor: 50078274 NGM Symbol: MFL ERIC VT27
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Long" är Värdepapper som gör att investeraren kan delta i en ökning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är högre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är högre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (Värderingspris - aktuell Strike) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller faller under Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller faller under den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt sjunkande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt ökar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför ökar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Long
Underliggande:	Telefonaktiebolaget LM Ericsson (mer information finns i C.20)
Grad:	1
Initial Strike:	SEK 75,06
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	SEK 78,06
Observationspris:	priset på Underliggande fastställs och offentliggörs av Referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.

C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.

	Beräkningsagent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz
	Betalningsagenter:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige

C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en tid på en timme efter att en Barriärhändelse ägt rum. Referenspris innebär Underliggandes slutpris så som fastställt och publicerat av Referensagenten på Värderingsdagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Telefonaktiebolaget LM Ericsson</u> Typ: Registrerat andel Emittenten: Ericsson LM, Telefonvagen 30, S-126 25 Stockholm, Sweden Valuta: SEK ISIN: SE0000108656 Referensagenten: NASDAQ OMX Stockholm Bloomberg: ERICB SS Equity Prestanda: tillgänglig under www.bloomberg.com (Symbol: ERICB:SS) Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent. Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Long* är Underliggandes kurs-, pris- eller nivå**fall** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller faller under en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **faller**, innebär Mini-Futures av typen Long en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller faller under Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 5,31 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFL NDA VT24)

linked to

Nordea Bank Abp

ISIN DE000VE10KK0

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10KK0 / WKN: VE10KK / Valor: 50078275 / NGM Symbol: MFL NDA VT24
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Long
Underlying	Nordea Bank Abp Type: Bearer Share ISIN Underlying: FI4000297767 Bloomberg symbol: NDA SS Equity Reference Agent: NASDAQ OMX Stockholm Derivatives Exchange: NASDAQ OMX Stockholm Currency: SEK
Initial Reference Price	SEK 68.54
Initial Strike	SEK 65.13
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula:

$$FL_n = FL_a + \frac{(r + FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$$

where:

- FL_n: Strike following the adjustment = Current Strike.
- FL_a: Strike before the adjustment.
- r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.
- FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.
- n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).
- $DivF$: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (*for Securities governed by German law in accordance with sections 315, 317 BGB*) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.
- Div: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (*in accordance with sections 315, 317 BGB*) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "**Ex-Dividend Date**" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.

The result of the calculation shall be rounded upwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.0001.

Financing Spread	The Financing Spread on the Issue Date shall amount to 2.50%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%

Ratio	1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is higher than the Current Strike, multiplied by the Ratio, i.e. $$\text{Cash Amount} = (\text{ValuationPrice} - \text{Current Strike}) \cdot \text{Ratio}$$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is lower than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	SEK 67.73
Initial Stop-Loss Buffer	4.00%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded up to the nearest multiple of the rounding of the Stop-Loss Barrier: $$StL = FL_n \cdot (100\ \% + StLP)$$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or falls below the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.
Type of Exercise	American Exercise Type

Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019
Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate. "**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website

	http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for shares, securities representing shares (ADRs or GDRs) and other dividend-bearing securities specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

Nordea Bank Abp

Type:	Bearer Share
Issuer:	Nordea Bank Abp, Satamaradankatu 5, Helsinki, FI-00020 Finland
Currency:	SEK
ISIN:	FI4000297767
Bloomberg symbol:	NDA SS Equity
Performance:	Available at www.bloomberg.com (Symbol: NDA:SS)

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

III. FURTHER INFORMATION ON THE OFFER OF THE SECURITIES

1. Stock exchange listing and trading arrangements

Stock exchange listing:	Application is made for the Securities to be included in the regulated unofficial market of Nordic Growth Market (Nordic MTF Sweden). Expected first trading date: 26 September 2019
Market Maker:	Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany

2. Terms of the offer

The Issue Price and the Value Date of the Securities and the start of the Public Offer are specified below.

Issue Price:	SEK 3.59
Value Date:	26 September 2019
Public Offer:	in Sweden starting from: 24 September 2019 The Public Offer will end with the term of the Securities or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the heading “Base Prospectus” until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (Wertpapierprospektgesetz - WpPG)

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7
…trading income	288.8	295.1
…other income	9.9	5.1
Operating expense	800.8*	881.6
thereof…		
…personnel expense	532.6	570.1
…general expense	205.0	246.7
…depreciation, amortization	61.0	68.8
…valuation adjustments, provisions and losses	2.2*	-4.0
Group net profit	209.0	232.2

* The figure regarding net interest income has been changed. The previous year's figures (Total operating income: 1,060.3; net interest income: 68.7; Total operating expense: 801.0; valuation adjustements, provisions and losses: 2.4) have been adjusted accordingly.

Balance Sheet	31 DECEMBER 2017 (CHF MILLION)	31 DECEMBER 2018 (CHF MILLION)
Total assets	22,903.7	26,037.3
Shareholders' equity (excluding minority interests)	1,620.5	1,703.5
Due to customers	9,758.2	12,649.2

BIS capital ratios[1]	31 DECEMBER 2017	31 DECEMBER 2018
CET 1 capital ratio (%) %[2]	18.4	12.3
Tier 1 capital ratio %[3]	18.4	18.9
Total capital ratio (%) %	18.4	18.9

Risk ratio[4]	31 DECEMBER 2017	31 DECEMBER 2018
Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10KK0 WKN: VE10KK Valor: 50078275 NGM Symbol: MFL NDA VT24
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Long" are Securities which enable the Security Holder to participate in the rise of the Underlying on a leveraged basis. *<u>Cash Amount</u>* Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is higher than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is higher than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Valuation Price - Current Strike) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or falls below the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or falls below the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly falling price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally increased (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually rising simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Long
Underlying:	Nordea Bank Abp (for further details, see C.20)
Ratio:	1
Initial Strike:	SEK 65.13
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	SEK 67.73
Observation Price:	the price of the Underlying determined and published by the Reference Agent
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.
C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.	

Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18	Description of redemption for derivative securities	The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17. If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.
C.19	Exercise price/ final reference price of the underlying	The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price. The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event. Reference Price is the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
C.20	Description of the underlying and where information on the underlying can be found	The Underlying to which the Securities are linked is: <u>Nordea Bank Abp</u> Type: Bearer Share Issuer: Nordea Bank Abp, Satamaradankatu 5, Helsinki, FI-00020 Finland Currency: SEK ISIN Underlying: FI4000297767 Reference Agent: NASDAQ OMX Stockholm Bloomberg symbol: NDA SS Equity Performance: available at www.bloomberg.com (Symbol: NDA:SS) Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2	Key information on the key risks relating to the Issuer and the Guarantor	**Insolvency risk of the Issuer** The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying. The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent. For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Long* Type, a **fall** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or falling below a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying **falls**, Mini Futures of the Long type in-volve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or falls below the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price: Issue Date: Value Date: Offer Size: Minimum Trading Lot: Public Offer:	SEK 3.59 26 September 2019 26 September 2019 250,000 Securities 1 Security in Sweden starting from:	 24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10KK0 WKN: VE10KK Valor: 50078275 NGM Symbol: MFL NDA VT24
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Long" är Värdepapper som gör att investeraren kan delta i en ökning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är högre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är högre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (Värderingspris - aktuell Strike) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller faller under Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller faller under den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt sjunkande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt ökar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför ökar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Long
Underliggande:	Nordea Bank Abp (mer information finns i C.20)
Grad:	1
Initial Strike:	SEK 65,13
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	SEK 67,73
Observationspris:	priset på Underliggande fastställs och offentliggörs av Referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.

C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.

	Beräkningsagent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz
	Betalningsagenter:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige

C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en tid på en timme efter att en Barriärhändelse ägt rum. Referenspris innebär Underliggandes slutpris så som fastställt och publicerat av Referensagenten på Värderingsdagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Nordea Bank Abp</u> Typ: Innehavaraktie Emittenten: Nordea Bank Abp, Satamaradankatu 5, Helsinki, FI-00020 Finland Valuta: SEK ISIN: FI4000297767 Referensagenten: NASDAQ OMX Stockholm Bloomberg: NDA SS Equity Prestanda: tillgänglig under www.bloomberg.com (Symbol: NDA:SS) Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent. Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Long* är Underliggandes kurs-, pris- eller nivå**fall** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller faller under en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **faller**, innebär Mini-Futures av typen Long en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller faller under Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 3,59 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFL SWEDA VT20)

linked to

Swedbank AB

ISIN DE000VE10KL8

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10KL8 / WKN: VE10KL / Valor: 50078276 / NGM Symbol: MFL SWEDA VT20
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Long
Underlying	Swedbank AB Type: Registered Share ISIN Underlying: SE0000242455 Bloomberg symbol: SWEDA SS Equity Reference Agent: NASDAQ OMX Stockholm Derivatives Exchange: NASDAQ OMX Stockholm Currency: SEK
Initial Reference Price	SEK 139.78
Initial Strike	SEK 132.84
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula:

$$FL_n = FL_a + \frac{(r + FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$$

where:

- FL_n: Strike following the adjustment = Current Strike.
- FL_a: Strike before the adjustment.
- r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.
- FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.
- n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).
- $DivF$: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (*for Securities governed by German law in accordance with sections 315, 317 BGB*) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.
- Div: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (*in accordance with sections 315, 317 BGB*) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "**Ex-Dividend Date**" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.

The result of the calculation shall be rounded upwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.01.

Financing Spread	The Financing Spread on the Issue Date shall amount to 3.50%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%

Ratio	1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is higher than the Current Strike, multiplied by the Ratio, i.e. $$\text{Cash Amount} = (\text{ValuationPrice} - \text{Current Strike}) \cdot \text{Ratio}$$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is lower than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	SEK 138.15
Initial Stop-Loss Buffer	3.997%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded up to the nearest multiple of the rounding of the Stop-Loss Barrier: $$StL = FL_n \cdot (100\ \% + StLP)$$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or falls below the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.
Type of Exercise	American Exercise Type

Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019
Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate. "**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website

	http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for shares, securities representing shares (ADRs or GDRs) and other dividend-bearing securities specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10KL8 WKN: VE10KL Valor: 50078276 NGM Symbol: MFL SWEDA VT20
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Long" are Securities which enable the Security Holder to participate in the rise of the Underlying on a leveraged basis. *<u>Cash Amount</u>* Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is higher than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is higher than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Valuation Price - Current Strike) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or falls below the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or falls below the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly falling price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally increased (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually rising simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Long
Underlying:	Swedbank AB (for further details, see C.20)
Ratio:	1
Initial Strike:	SEK 132.84
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	SEK 138.15
Observation Price:	the price of the Underlying determined and published by the Reference Agent
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.

C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.

Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18	Description of redemption for derivative securities	The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17. If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.
C.19	Exercise price/ final reference price of the underlying	The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price. The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event. Reference Price is the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
C.20	Description of the underlying and where information on the underlying can be found	The Underlying to which the Securities are linked is: <u>Swedbank AB</u> Type: Registered Share Issuer: Swedbank AB, Brunkebergstrorg 8, 105 34 Stockholm, Sweden Currency: SEK ISIN Underlying: SE0000242455 Reference Agent: NASDAQ OMX Stockholm Bloomberg symbol: SWEDA SS Equity Performance: available at www.bloomberg.com (Ticker: SWEDA:SS) Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2	Key information on the key risks relating to the Issuer and the Guarantor	**Insolvency risk of the Issuer** The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying. The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent. For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Long* Type, a **fall** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or falling below a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying **falls**, Mini Futures of the Long type in-volve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or falls below the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price: Issue Date: Value Date: Offer Size: Minimum Trading Lot: Public Offer:	SEK 7.29 26 September 2019 26 September 2019 250,000 Securities 1 Security in Sweden starting from:	24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10KL8 WKN: VE10KL Valor: 50078276 NGM Symbol: MFL SWEDA VT20
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Long" är Värdepapper som gör att investeraren kan delta i en ökning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är högre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är högre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (Värderingspris - aktuell Strike) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller faller under Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller faller under den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt sjunkande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt ökar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför ökar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Long
Underliggande:	Swedbank AB (mer information finns i C.20)
Grad:	1
Initial Strike:	SEK 132,84
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	SEK 138,15
Observationspris:	priset på Underliggande fastställs och offentliggörs av Referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.

C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.

	Beräkningsagent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz
	Betalningsagenter:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige

C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en tid på en timme efter att en Barriärhändelse ägt rum. Referenspris innebär Underliggandes slutpris så som fastställt och publicerat av Referensagenten på Värderingsdagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Swedbank AB</u> Typ: Registrerat andel Emittenten: Swedbank AB, Brunkebergstrorg 8, 105 34 Stockholm, Sweden Valuta: SEK ISIN: SE0000242455 Referensagenten: NASDAQ OMX Stockholm Bloomberg: SWEDA SS Equity Prestanda: tillgänglig under www.bloomberg.com (Ticker: SWEDA:SS) Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent. Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Long* är Underliggandes kurs-, pris- eller nivå**fall** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller faller under en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **faller**, innebär Mini-Futures av typen Long en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller faller under Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 7,29 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFS VOLVO VT19)

linked to

Volvo AB

ISIN DE000VE10KM6

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10KM6 / WKN: VE10KM / Valor: 50078277 / NGM Symbol: MFS VOLVO VT19
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Short
Underlying	Volvo AB Type: Registered Share ISIN Underlying: SE0000115446 Bloomberg symbol: VOLVB SS Equity Reference Agent: NASDAQ OMX Stockholm Derivatives Exchange: NASDAQ OMX Stockholm Currency: SEK
Initial Reference Price	SEK 137.53
Initial Strike	SEK 147.10
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula:

$$FL_n = FL_a + \frac{(r - FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$$

where:

- FL_n: Strike following the adjustment = Current Strike.
- FL_a: Strike before the adjustment.
- r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.
- FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.
- n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).
- $DivF$: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (*for Securities governed by German law in accordance with sections 315, 317 BGB*) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.
- Div: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (*in accordance with sections 315, 317 BGB*) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "**Ex-Dividend Date**" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.

The result of the calculation shall be rounded downwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.0001.

Financing Spread	The Financing Spread on the Issue Date shall amount to 2.50%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%

Ratio	1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is lower than the Current Strike, multiplied by the Ratio, i.e. $\text{Cash Amount} = (\text{Current Strike} - \text{Valuation Price}) \cdot \text{Ratio}$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is higher than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	SEK 141.22
Initial Stop-Loss Buffer	4.00%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded down to the nearest multiple of the rounding of the Stop-Loss Barrier: $StL = FL_n \cdot (100\,\% - StLP)$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or rises above the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.

Type of Exercise	American Exercise Type
Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019
Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate.

	"**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for shares, securities representing shares (ADRs or GDRs) and other dividend-bearing securities specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

Volvo AB

Type:	Registered Share
Issuer:	Volvo AB, 405 08 Gothenburg, Sweden
Currency:	SEK
ISIN:	SE0000115446
Bloomberg symbol:	VOLVB SS Equity
Performance:	Available at www.bloomberg.com (Symbol: VOLVB:SS)

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

III. FURTHER INFORMATION ON THE OFFER OF THE SECURITIES

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7

Risk ratio[4]	31 DECEMBER 2017	31 DECEMBER 2018
Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10KM6 WKN: VE10KM Valor: 50078277 NGM Symbol: MFS VOLVO VT19
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Short" are Securities which enable the Security Holder to participate in the fall of the Underlying on a leveraged basis. <u>*Cash Amount*</u> Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is lower than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is lower than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Current Strike – Valuation Price) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or rises above the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or rises above the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly rising price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally reduced (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually falling simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Short
Underlying:	Volvo AB (for further details, see C.20)
Ratio:	1
Initial Strike:	SEK 147.10
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	SEK 141.22
Observation Price:	the price of the Underlying determined and published by the Reference Agent
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.

C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.

Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18 Description of redemption for derivative securities

The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17.

If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.

C.19 Exercise price/ final reference price of the underlying

The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price.

The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event.

Reference Price is the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.

C.20 Description of the underlying and where information on the underlying can be found

The Underlying to which the Securities are linked is:

Volvo AB

Type:	Registered Share
Issuer:	Volvo AB, 405 08 Gothenburg, Sweden
Currency:	SEK
ISIN Underlying:	SE0000115446
Reference Agent:	NASDAQ OMX Stockholm
Bloomberg symbol:	VOLVB SS Equity
Performance:	available at www.bloomberg.com (Symbol: VOLVB:SS)

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2 Key information on the key risks relating to the Issuer and the Guarantor

Insolvency risk of the Issuer

The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.

The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.

For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Short* Type, a **rise** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or rising above a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying *rises*, Mini Futures of the Short type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or rises above the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price:	SEK 10.06	
		Issue Date:	26 September 2019	
		Value Date:	26 September 2019	
		Offer Size:	250,000 Securities	
		Minimum Trading Lot:	1 Security	
		Public Offer:	in Sweden starting from:	24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

Balansräkning

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10KM6 WKN: VE10KM Valor: 50078277 NGM Symbol: MFS VOLVO VT19
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Short" är Värdepapper som gör att investeraren kan delta i en minskning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är lägre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är lägre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (aktuell Strike - Värderingspris) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller överstiger Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller överstiger den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt stigande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt minskar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför minskar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Short
Underliggande:	Volvo AB (mer information finns i C.20)
Grad:	1
Initial Strike:	SEK 147,10
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	SEK 141,22
Observationspris:	priset på Underliggande fastställs och offentliggörs av Referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.

C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.

	Beräkningsagent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz
	Betalningsagenter:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige

C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en tid på en timme efter att en Barriärhändelse ägt rum. Referenspris innebär Underliggandes slutpris så som fastställt och publicerat av Referensagenten på Värderingsdagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Volvo AB</u> Typ: Registrerat andel Emittenten: Volvo AB, 405 08 Gothenburg, Sweden Valuta: SEK ISIN: SE0000115446 Referensagenten: NASDAQ OMX Stockholm Bloomberg: VOLVB SS Equity Prestanda: tillgänglig under www.bloomberg.com (Symbol: VOLVB:SS) Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent. Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå. Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Short* är Underliggandes kurs-, pris- eller nivå**ökning** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor. **Hävstångseffekt** Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller överstiger en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **stiger**, innebär Mini-Futures av typen Short en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller överstiger Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 10,06 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde. *Handelstransaktioner som rör Referensinstrument* Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde.

		Övriga funktioner som företagen i Vontobelkoncernen kan utföra Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFS SWEDA VT23)

linked to

Swedbank AB

ISIN DE000VE10KN4

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10KN4 / WKN: VE10KN / Valor: 50078278 / NGM Symbol: MFS SWEDA VT23
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Short
Underlying	Swedbank AB Type: Registered Share ISIN Underlying: SE0000242455 Bloomberg symbol: SWEDA SS Equity Reference Agent: NASDAQ OMX Stockholm Derivatives Exchange: NASDAQ OMX Stockholm Currency: SEK
Initial Reference Price	SEK 139.78
Initial Strike	SEK 148.00
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula:

$$FL_n = FL_a + \frac{(r - FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$$

where:

- FL_n: Strike following the adjustment = Current Strike.
- FL_a: Strike before the adjustment.
- r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.
- FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.
- n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).
- $DivF$: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (*for Securities governed by German law in accordance with sections 315, 317 BGB*) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.
- Div: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (*in accordance with sections 315, 317 BGB*) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "**Ex-Dividend Date**" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.

The result of the calculation shall be rounded downwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.01.

Financing Spread	The Financing Spread on the Issue Date shall amount to 3.50%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%

Ratio	1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is lower than the Current Strike, multiplied by the Ratio, i.e. $\text{Cash Amount} = (\text{Current Strike} - \text{Valuation Price}) \cdot \text{Ratio}$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is higher than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	SEK 142.08
Initial Stop-Loss Buffer	4.00%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded down to the nearest multiple of the rounding of the Stop-Loss Barrier: $StL = FL_n \cdot (100\,\% - StLP)$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or rises above the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.

Type of Exercise	American Exercise Type
Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019
Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate.

	"**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for shares, securities representing shares (ADRs or GDRs) and other dividend-bearing securities specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

Swedbank AB

Type:	Registered Share
Issuer:	Swedbank AB, Brunkebergstrorg 8, 105 34 Stockholm, Sweden
Currency:	SEK
ISIN:	SE0000242455
Bloomberg symbol:	SWEDA SS Equity
Performance:	Available at www.bloomberg.com (Ticker: SWEDA:SS)

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

III. FURTHER INFORMATION ON THE OFFER OF THE SECURITIES

1. Stock exchange listing and trading arrangements

Stock exchange listing:	Application is made for the Securities to be included in the regulated unofficial market of Nordic Growth Market (Nordic MTF Sweden). Expected first trading date: 26 September 2019
Market Maker:	Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany

2. Terms of the offer

The Issue Price and the Value Date of the Securities and the start of the Public Offer are specified below.

Issue Price:	SEK 8.64
Value Date:	26 September 2019
Public Offer:	in Sweden starting from: 24 September 2019 The Public Offer will end with the term of the Securities or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the heading “Base Prospectus” until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (Wertpapierprospektgesetz - WpPG)

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7
…trading income	288.8	295.1
…other income	9.9	5.1
Operating expense	800.8*	881.6
thereof…		
…personnel expense	532.6	570.1
…general expense	205.0	246.7
…depreciation, amortization	61.0	68.8
…valuation adjustments, provisions and losses	2.2*	-4.0
Group net profit	209.0	232.2

* The figure regarding net interest income has been changed. The previous year's figures (Total operating income: 1,060.3; net interest income: 68.7; Total operating expense: 801.0; valuation adjustements, provisions and losses: 2.4) have been adjusted accordingly.

Balance Sheet	31 DECEMBER 2017 (CHF MILLION)	31 DECEMBER 2018 (CHF MILLION)
Total assets	22,903.7	26,037.3
Shareholders' equity (excluding minority interests)	1,620.5	1,703.5
Due to customers	9,758.2	12,649.2

BIS capital ratios[1]	31 DECEMBER 2017	31 DECEMBER 2018
CET 1 capital ratio (%) %[2]	18.4	12.3
Tier 1 capital ratio %[3]	18.4	18.9
Total capital ratio (%) %	18.4	18.9

Risk ratio[4]	31 DECEMBER 2017	31 DECEMBER 2018
Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10KN4 WKN: VE10KN Valor: 50078278 NGM Symbol: MFS SWEDA VT23
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Short" are Securities which enable the Security Holder to participate in the fall of the Underlying on a leveraged basis. <u>*Cash Amount*</u> Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is lower than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is lower than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Current Strike – Valuation Price) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or rises above the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or rises above the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly rising price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally reduced (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually falling simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Short
Underlying:	Swedbank AB (for further details, see C.20)
Ratio:	1
Initial Strike:	SEK 148.00
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	SEK 142.08
Observation Price:	the price of the Underlying determined and published by the Reference Agent
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.

C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.

Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18	Description of redemption for derivative securities	The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17. If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.
C.19	Exercise price/ final reference price of the underlying	The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price. The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event. Reference Price is the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.
C.20	Description of the underlying and where information on the underlying can be found	The Underlying to which the Securities are linked is: <u>Swedbank AB</u> Type: Registered Share Issuer: Swedbank AB, Brunkebergstrorg 8, 105 34 Stockholm, Sweden Currency: SEK ISIN Underlying: SE0000242455 Reference Agent: NASDAQ OMX Stockholm Bloomberg symbol: SWEDA SS Equity Performance: available at www.bloomberg.com (Ticker: SWEDA:SS) Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2	Key information on the key risks relating to the Issuer and the Guarantor	**Insolvency risk of the Issuer** The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying. The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent. For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Short* Type, a **rise** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or rising above a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying *rises*, Mini Futures of the Short type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or rises above the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price: Issue Date: Value Date: Offer Size: Minimum Trading Lot: Public Offer:	SEK 8.64 26 September 2019 26 September 2019 250,000 Securities 1 Security in Sweden starting from:	 24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

Balansräkning

	31 DECEMBER 2017 (EUR)	**31 DECEMBER 2018 (EUR)**

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

Genomsnittligt Value-at-Risk (marknads-risk) (miljoner CHF)	2,5	5,4

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10KN4 WKN: VE10KN Valor: 50078278 NGM Symbol: MFS SWEDA VT23
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Short" är Värdepapper som gör att investeraren kan delta i en minskning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är lägre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är lägre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (aktuell Strike - Värderingspris) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller överstiger Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller överstiger den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt stigande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt minskar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför minskar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Short
Underliggande:	Swedbank AB (mer information finns i C.20)
Grad:	1
Initial Strike:	SEK 148,00
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	SEK 142,08
Observationspris:	priset på Underliggande fastställs och offentliggörs av Referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.
C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.	

	Beräkningsagent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz
	Betalningsagenter:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige

C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en tid på en timme efter att en Barriärhändelse ägt rum. Referenspris innebär Underliggandes slutpris så som fastställt och publicerat av Referensagenten på Värderingsdagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Swedbank AB</u> Typ: Registrerat andel Emittenten: Swedbank AB, Brunkebergstrorg 8, 105 34 Stockholm, Sweden Valuta: SEK ISIN: SE0000242455 Referensagenten: NASDAQ OMX Stockholm Bloomberg: SWEDA SS Equity Prestanda: tillgänglig under www.bloomberg.com (Ticker: SWEDA:SS) Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent. Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Short* är Underliggandes kurs-, pris- eller nivå**ökning** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller överstiger en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **stiger**, innebär Mini-Futures av typen Short en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller överstiger Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 8,64 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFS XBT VT57)

linked to

Bitcoin

ISIN DE000VE10LM4

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10LM4 / WKN: VE10LM / Valor: 50078311 / NGM Symbol: MFS XBT VT57
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Short
Underlying	Bitcoin (USD per 1 XBT) Bloomberg symbol: XBTUSD Curncy Reference Agent(s): CoinBase Prime, Kraken, Bitstamp The Calculation Agent reserves the right to remove, add or change one or more Reference Agents at its reasonable discretion. Base Currency: XBT Strike Currency: USD The "**Currency of the Underlying**" corresponds to the Strike Currency.
Initial Reference Price	USD 9,754.17
Initial Strike	USD 10,640.43
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula: $$FL_n = FL_a + \frac{(r - FS) \cdot FL_a \cdot n}{360}$$ where: FL_n: Strike following the adjustment = Current Strike. FL_a: Strike before the adjustment. r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent. FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account. n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive). The result of the calculation shall be rounded downwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.01.
Financing Spread	The Financing Spread on the Issue Date shall amount to 5.00%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%
Ratio	0.001
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is lower than the Current Strike, multiplied by the Ratio, i.e. $$\text{Cash Amount} = (\text{Current Strike} - \text{Valuation Price}) \cdot \text{Ratio}$$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable

Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is higher than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	USD 10,002.00
Initial Stop-Loss Buffer	6.00%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded down to the nearest multiple of the rounding of the Stop-Loss Barrier: $StL = FL_n \cdot (100\ \% - StLP)$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 1.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month. In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying as determined on an ongoing basis during the Observation Period by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) based on the price determinations for the Underlying at the Reference Agents..
Type of Exercise	American Exercise Type
Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019

Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the exchange rate determined by the Reference Agent at the Valuation Time on the Valuation Date and then published on the Reference Page.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account price dterminations for the Underlying at the Reference Agents as the price of the Underlying within a period of three (3) Business Days following the occurrence of the Barrier Event.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which fixing for the Underlying usually occurs on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate. "**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for virtual currencies specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

Bitcoin (USD per 1 XBT)

Description:	US Dollar (USD) per 1 Bitcoin (XBT) The term "Bitcoin" refers to an internet currency whose monetary units are created and managed decentralized on a computer network. Bitcoin users who are connected with each other via the internet can transfer bitcoins to one another electronically. Bitcoins only exist virtually on a computer network and have no physical equivalent. Bitcoins are traded in a completely decentralized way on the internet and do not have to be processed via intermediaries of any kind (e.g. countries, central / commercial banks).
Bloomberg symbol:	XBTUSD Curncy
Performance:	Available at https://www.coinbase.com/price/bitcoin

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

III. FURTHER INFORMATION ON THE OFFER OF THE SECURITIES

1. Stock exchange listing and trading arrangements

Stock exchange listing:	Application is made for the Securities to be included in the regulated unofficial market of Nordic Growth Market (Nordic MTF Sweden). Expected first trading date: 26 September 2019
Market Maker:	Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany

2. Terms of the offer

The Issue Price and the Value Date of the Securities and the start of the Public Offer are specified below.

Issue Price:	SEK 9.04
Value Date:	26 September 2019
Public Offer:	in Sweden starting from: 24 September 2019 The Public Offer will end with the term of the Securities or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the heading “Base Prospectus” until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (Wertpapierprospektgesetz - WpPG)

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7
…trading income	288.8	295.1
…other income	9.9	5.1
Operating expense	800.8*	881.6
thereof…		
…personnel expense	532.6	570.1
…general expense	205.0	246.7
…depreciation, amortization	61.0	68.8
…valuation adjustments, provisions and losses	2.2*	-4.0
Group net profit	209.0	232.2

* The figure regarding net interest income has been changed. The previous year's figures (Total operating income: 1,060.3; net interest income: 68.7; Total operating expense: 801.0; valuation adjustements, provisions and losses: 2.4) have been adjusted accordingly.

Balance Sheet	31 DECEMBER 2017 (CHF MILLION)	31 DECEMBER 2018 (CHF MILLION)
Total assets	22,903.7	26,037.3
Shareholders' equity (excluding minority interests)	1,620.5	1,703.5
Due to customers	9,758.2	12,649.2

BIS capital ratios[1]	31 DECEMBER 2017	31 DECEMBER 2018
CET 1 capital ratio (%) %[2]	18.4	12.3
Tier 1 capital ratio %[3]	18.4	18.9
Total capital ratio (%) %	18.4	18.9

Risk ratio[4]	31 DECEMBER 2017	31 DECEMBER 2018
Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10LM4 WKN: VE10LM Valor: 50078311 NGM Symbol: MFS XBT VT57
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Short" are Securities which enable the Security Holder to participate in the fall of the Underlying on a leveraged basis. *<u>Cash Amount</u>* Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is lower than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is lower than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Current Strike – Valuation Price) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or rises above the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or rises above the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly rising price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally reduced (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually falling simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Short
Underlying:	Bitcoin (USD per 1 XBT) (for further details, see C.20)
Ratio:	0.001
Initial Strike:	USD 10,640.43
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	USD 10,002.00
Observation Price:	each price of the underlying asset, determined by the Calculation Agent at its reasonable discretion, continuously during the observation period on the basis of the quoted prices for the underlying asset from the Reference Agents
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.
C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.	

	Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
	Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18	Description of redemption for derivative securities	The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17. The Cash Amount is converted into the Settlement Currency of the Securities on the Valuation Date in accordance with the relevant conversion rate. If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.
C.19	Exercise price/ final reference price of the underlying	The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price. The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of three (3) banking business days following the occurrence of the Barrier Event. Reference Price is the price of the Underlying determined by the Calculation Agent, at its reasonable discretion, for one day on the basis of the quoted prices of the Underlying from the Reference Agents during that day.
C.20	Description of the underlying and where information on the underlying can be found	The Underlying to which the Securities are linked is: <u>Bitcoin (USD per 1 XBT)</u> Description: US Dollar (USD) per 1 Bitcoin (XBT) The term "Bitcoin" refers to an internet currency whose monetary units are created and managed decentralized on a computer network. Bitcoin users who are connected with each other via the internet can transfer bitcoins to one another electronically. Bitcoins only exist virtually on a computer network and have no physical equivalent. Bitcoins are traded in a completely decentralized way on the internet and do not have to be processed via intermediaries of any kind (e.g. countries, central / commercial banks). Reference Agent: CoinBase, Kraken Bitcoin Exchange, Bitstamp Bloomberg symbol: XBTUSD Curncy Performance: https://www.coinbase.com/price/bitcoin Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2	Key information on the key risks relating to the Issuer and the Guarantor	**Insolvency risk of the Issuer** The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying. The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.

For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Short* Type, a **rise** in the rate, price or level of the Underlying is to the disadvantage of the investor.

The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.

Leverage effect

Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.

Dependence of redemption on the occurrence or non-occurrence of a Barrier Event

If a Barrier Event occurs as a result of the price of the Underlying reaching or rising above a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

Risk of ordinary termination and early redemption by the Issuer

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

Market price risks

The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors).

Option risks with respect to the Securities

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

Potential investors should be aware that an investment in the Securities is associated with exchange rate risks since the rate of exchange between the currency of the Underlying and the Settlement Currency of the Securities may move in a direction that is to their disadvantage.

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying *rises*, Mini Futures of the Short type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or rises above the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.		
E.3	Description of the terms and conditions of the offer	Issue Price: Issue Date: Value Date: Offer Size: Minimum Trading Lot: Public Offer:	SEK 9.04 26 September 2019 26 September 2019 250,000 Securities 1 Security in Sweden starting from:	 24 September 2019
		The Issue Price of the Securities was determined by the Market Maker.		
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.		

		Trading transactions relating to the Reference Instrument During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

Balansräkning

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10LM4 WKN: VE10LM Valor: 50078311 NGM Symbol: MFS XBT VT57
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Short" är Värdepapper som gör att investeraren kan delta i en minskning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är lägre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är lägre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (aktuell Strike - Värderingspris) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller överstiger Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller överstiger den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt stigande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt minskar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför minskar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Short
Underliggande:	Bitcoin (USD per 1 XBT) (mer information finns i C.20)
Grad:	0,001
Initial Strike:	USD 10 640,43
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	USD 10 002,00
Observationspris:	varje pris på den underliggande tillgången, som beräknas av Beräkningsagenten efter eget, rimligt gottfinnande, kontinuerligt under observationsperioden på grundval av de priser som anges för den underliggande tillgången från referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.
C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.	

		Beräkningsagent: Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Betalningsagenter: Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige
C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Kontantbeloppet omräknas till Värdepapperens avräkningsvaluta på Värderingsdagen, i enlighet med relevant omräkningskurs. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en period av tre (3) bankdagar efter Barriärhändelsen. Referenspris innebär Referenspris innebär Priset på det Underliggande som beräknas av beräkningsagenten, enligt sitt rimliga utrymme för skönsmässig bedömning, för en dag på grundval av de Underliggande priserna från Referensagenten under den dagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Bitcoin (USD per 1 XBT)</u> Beskrivning: Termen "Bitcoin" avser en internetvaluta vars monetära enheter skapas och hanteras decentraliserat i ett datornätverk. Bitcoin-användare som är anslutna till varandra via internet kan överföra bitcoins till varandra elektroniskt. Bitcoins existerar bara praktiskt taget i ett datornätverk och har ingen fysisk ekvivalent. Bitcoins handlas på ett helt decentraliserat sätt på internet och behöver inte behandlas via intermediärer av något slag (t ex länder, centralbanker eller handelsbanker). Referensagenten: CoinBase, Kraken Bitcoin Exchange, Bitstamp Bloomberg: XBTUSD Curncy Prestanda: https://www.coinbase.com/price/bitcoin Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling. Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent.

Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Short* är Underliggandes kurs-, pris- eller nivå**ökning** ogynnsam för investeraren. Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller överstiger en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Möjliga investerare bör vara medvetna om att investeringar i Värdepapper medför valutakursrisker eftersom växlingskursen för Underliggandes Valuta och Värdepapperens Avräkningsvaluta kan röra sig i en riktning som är ogynnsam för investeraren.

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **stiger**, innebär Mini-Futures av typen Short en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller överstiger Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 9,04 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.

Vontobel

Investment Banking / 24 September 2019

Final Terms for Mini Futures (MFS XET VT36)

linked to

Ether

ISIN DE000VE10LN2

(the "**Securities**")

Issuer:	**Vontobel Financial Products GmbH**, Frankfurt am Main, Germany
Guarantor:	**Vontobel Holding AG**, Zurich, Switzerland
Offeror:	**Bank Vontobel Europe AG**, Munich, Germany
Securities identification numbers:	ISIN: DE000VE10LN2 / WKN: VE10LN / Valor: 50078312 / NGM Symbol: MFS XET VT36
Total offer volume:	250,000 Securities

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 8 July 2019. It should be noted that only the Base Prospectus dated 8 July 2019 (including the information incorporated in it by reference) and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (prospectus.vontobel.com) whereby the Final Terms are accessible by entry of the respective ISIN on the website prospectus.vontobel.com and the Base Prospectus and any supplements thereto are directly accessible on the website prospectus.vontobel.com under the section respective heading. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 8 July 2019 is valid up to 9 July 2020. After that date, the Public Offer will be continued on the basis of one or more successor base prospectuses (each a "**Successor Base Prospectus**"), if the respective Successor Base Prospectus provides for an extension of the offer of the Securities. In this context, these Final Terms should be read together with the respective most recent Successor Base Prospectus and all references in these Final Terms to the Base Prospectus should be understood as references to the respective most recent Successor Base Prospectus. Each Successor Base Prospectus will be published at the latest on the last day of validity of the respective currently valid Base Prospectus on the website prospectus.vontobel.com under the heading “Base Prospectus”.

These Final Terms were prepared for the purpose of the Public Offer of the Securities. The issue of the Securities is a new issue.

I. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 8 July 2019** (**chapter 8.1**) and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	26 September 2019
Issue Size (up to)	250,000 Securities
Option Type	Short
Underlying	Ether (USD per 1 XET) Bloomberg symbol: XETUSD Curncy Reference Agent(s): CoinBase Prime, Kraken, Bitstamp The Calculation Agent reserves the right to remove, add or change one or more Reference Agents at its reasonable discretion. Base Currency: XET Strike Currency: USD The "**Currency of the Underlying**" corresponds to the Strike Currency. All references to "**XET**" should be understood as refrencees to the payment token Ether of the Ethereum network.
Initial Reference Price	USD 201.09
Initial Strike	USD 218.09
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula: $$FL_n = FL_a + \frac{(r - FS) \cdot FL_a \cdot n}{360}$$ where: FL_n: Strike following the adjustment = Current Strike. FL_a: Strike before the adjustment. r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent. FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account. n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive). The result of the calculation shall be rounded downwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.01.
Financing Spread	The Financing Spread on the Issue Date shall amount to 5.00%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%
Ratio	0.01
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is lower than the Current Strike, multiplied by the Ratio, i.e. $$\text{Cash Amount} = (\text{Current Strike} - \text{Valuation Price}) \cdot \text{Ratio}$$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable

Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is higher than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically. If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price. The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event. Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.
Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	USD 205.00
Initial Stop-Loss Buffer	6.002%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded down to the nearest multiple of the rounding of the Stop-Loss Barrier: $StL = FL_n \cdot (100\ \% - StLP)$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. $StLP$: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 1.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month. In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 26 September 2019 (inclusive).
Observation Price	shall mean the price of the Underlying as determined on an ongoing basis during the Observation Period by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) based on the price determinations for the Underlying at the Reference Agents..
Type of Exercise	American Exercise Type
Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	26 September 2019

Minimum Exercise Number	1 Security
Reference Price	The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the exchange rate determined by the Reference Agent at the Valuation Time on the Valuation Date and then published on the Reference Page.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account price dterminations for the Underlying at the Reference Agents as the price of the Underlying within a period of three (3) Business Days following the occurrence of the Barrier Event.
Valuation Date	Valuation Date shall be (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which fixing for the Underlying usually occurs on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	26 September 2019
Termination Dates	Termination Date shall be each Business Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate. "**Conversion Rate**" means the relevant conversion rate as determined by Bloomberg Index Services Limited for the Valuation Date and as published on the website http://www.bloomberg.com/markets/currencies/fx-fixings around 2:00 pm (local time Frankfurt am Main) (BFIX). If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially or the time of the regular publication is changed by more than 30 minutes, the Calculation Agent shall specify the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Minimum Trading Lot	1 Security
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for virtual currencies specified in section 6 and section 7 of the General Conditions shall apply to this Security.

II. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

Ether (USD per 1 XET)

Description:	Ether is not a currency issued by a state or government but a virtual currency in the form of a so-called payment token within the Ethereum network ("Ethereum"). Ethereum is a distributed system in the field of financial technology, which offers the creation, management and execution of decentralized programs or contracts (so-called Smart Contracts) in its own blockchain infrastructure. Ether is an integral part of Ethereum's blockchain infrastructure. Ether exists only virtually on a computer network and has no physical counter value. Ether trading is decentralized in the Internet and does not need to be handled through intermediaries such as a state, central banks or commercial banks. Further information on Ether and Ethereum can be found on the website www.ethereum.org.
Bloomberg symbol:	XETUSD Curncy
Performance:	Available at https://www.coinbase.com/price/ethereum

Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

III. FURTHER INFORMATION ON THE OFFER OF THE SECURITIES

1. Stock exchange listing and trading arrangements

Stock exchange listing:	Application is made for the Securities to be included in the regulated unofficial market of Nordic Growth Market (Nordic MTF Sweden). Expected first trading date: 26 September 2019
Market Maker:	Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany

2. Terms of the offer

The Issue Price and the Value Date of the Securities and the start of the Public Offer are specified below.

Issue Price:	SEK 1.74	
Value Date:	26 September 2019	
Public Offer:	in Sweden starting from:	24 September 2019
	The Public Offer will end with the term of the Securities or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the heading “Base Prospectus” until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (Wertpapierprospektgesetz - WpPG)	

3. Costs and charges

There are no additional charges or commissions levied for the purchaser.

4. Publication of information after completion of the issue

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information once the issue has been completed.

APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

Section A – Introduction and warnings

A.1	Warnings	The summary should be read as introduction to the base prospectus dated 8 July 2019 as supplemented from time to time (the "**Base Prospectus**"). Any decision to invest in the securities (the "**Securities**") should be based on a consideration of the Base Prospectus as a whole, including the information incorporated by reference together with any supplements and the Final Terms published in connection with the issue of the Securities. In the event that claims relating to the information contained in the Base Prospectus are brought before a court, the plaintiff investor might, under the national legislation of the states of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Vontobel Financial Products GmbH (the "**Issuer**") and Bank Vontobel Europe AG (the "**Offeror**") and Vontobel Holding AG (the "**Swiss Guarantor**") have assumed responsibility for this summary including any translation thereof. However, Vontobel Holding AG has assumed responsibility only with respect to the information relating to itself and to the guarantee under Swiss law. Those persons which have assumed responsibility for this summary including any translation thereof, or persons responsible for the issue, can be held liable, but only in the event that the summary is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus, or if, when read together with the other parts of the Base Prospectus, it does not provide all the key information required.
A.2	Consent to the use of the prospectus	The Issuer and the Offeror consent to the use of the Base Prospectus for a public offer of the Securities in Sweden ("**Public Offer**") (general consent). The Issuer reserves the right to withdraw its consent to the use of the Base Prospectus with respect to certain distributors and/or all financial intermediaries.
	Offer period for resale by financial intermediaries	The subsequent resale and final placing of the Securities by financial intermediaries may take place during the Offer Period. "**Offer Period**" means the period beginning on 24 September 2019 and ending with the term of the Securities (see C.15) or – in case that a base prospectus which follows the Base Prospectus has not been published on the website prospectus.vontobel.com under the section 'Base Prospectus' until the last date of the validity of the Base Prospectus – with expiration of the validity of the Base Prospectus pursuant to section 9 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*, "**WpPG**")
	Conditions to which consent is linked	This consent by the Issuer and the Offeror is subject to the conditions (i) that the Base Prospectus and the Final Terms are provided to potential investors only together with all supplements published up to the time of such provision and (ii) that, in making use of the Base Prospectus and the Final Terms, the financial intermediary ensures that it complies with the applicable selling restrictions as well as all applicable rules and regulations in the respective jurisdiction.
	Statement that information about the terms and conditions of the offer made by a financial intermediary must be made available by the latter	**If the offer for the purchase of the Securities is made by a financial intermediary, the information about the terms and conditions of the offer must be made available by the respective financial intermediary at the time the offer is made.**

Section B - Issuer and Guarantor

B.1	Legal and commercial name	The legal and commercial name of the Issuer is Vontobel Financial Products GmbH.
B.2	Domicile, legal form, applicable legislation and country of incorporation	The domicile of the Issuer is Frankfurt am Main, Germany. Its business address is: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Issuer is a limited liability company (*Gesellschaft mit beschränkter Haftung*) incorporated under German law in Germany and is registered with the commercial register of the local court (*Amtsgericht*) at Frankfurt am Main under the register number HRB 58515.
B.4b	Known trends	The Issuer's business is in particular affected by the economic development, especially in Germany and Europe, as well as by the overall conditions in the financial markets. In addition, the political environment also affects the Issuer's business. Furthermore, possible regulatory changes may have a negative impact on the demand or the cost side for the Issuer.
B.5	Group structure and position of the Issuer within the group	The Issuer has no subsidiaries. All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel group (the "**Vontobel Group**"). Established in 1924 and headquartered in Zurich, the Vontobel Group is a Swiss private banking group with international activities. The Vontobel Group provides global financial services on the basis of the Swiss private banking tradition. The business units on which the Vontobel Group is focused are (i) Private Banking, (ii) Asset Management and (iii) Investment Banking.
B.9	Profit forecasts or estimates	– not applicable – A profit forecast or estimate has not been included.
B.10	Qualifications in the audit report on the historical financial information	– not applicable – There are no such qualifications.
B.12	Selected key historical financial information	The following selected financial information has been taken from the Issuer's audited financial statements for the financial years 2017 and 2018 which were prepared in accordance with the provisions of the German Commercial Code (*Handelsgesetzbuch*) and the German Law on Limited Liability Companies (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*).

Balance Sheet

	31 DECEMBER 2017 (EUR)	31 DECEMBER 2018 (EUR)
Subscribed capital	50,000	50,000
Capital reserves	2,000,000	2,000,000
Issuance liabilities	1,775,673,062	1,726,522,817
Receivables from affiliated companies	1,775,739,225	1,727,182,617
Bank balances	2,794,745	2,398,423
Total assets	1,792,365,993	1,741,190,981

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (EUR)	1 JANUARY TO 31 DECEMBER 2018 (EUR)
Realised and unrealised gains and losses from the issuance business	-169,920,453	433,490,484
Realised and unrealised gains and losses from hedging transactions	175,348,590	-426,575,368
Other operating expenses	4,412,343	5,811,408
Result from ordinary activities	516,203	639,621
Net income for the year	347,332	439,374

	Statement about the Issuer's prospects	There have been no material adverse changes in the prospects of the Issuer since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Issuer's position	– not applicable – No significant changes have occurred in the financial or trading position of the Issuer since the reporting date for the audited financial statements (31 December 2018).
B.13	Recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency	– not applicable – There have been no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.
B.14	Group structure and position of the Issuer within the group/	With respect to the organizational structure, see B.5 above.
	Dependence of the Issuer on other entities within the group	– not applicable – The Issuer has no subsidiaries. Since all of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group, the Issuer is, however, dependent on Vontobel Holding AG.
B.15	Description of the Issuer's principal activities	The Issuer's principal activity is to issue securities and derivative securities and to carry out financial transactions and auxiliary transactions of financial transactions. Activities that require authorisation under the German Banking Act (*Gesetz über das Kreditwesen*) are excluded. The Issuer may furthermore conduct all business activities that are directly or indirectly related to its main purpose and also carry out all activities that could directly or indirectly serve to promote the main purpose of the Issuer. The Issuer may also set up, acquire, or dispose of subsidiaries or branches in Germany and other countries, or acquire interests in other companies.
B.16	Interests in and control of the Issuer	All of the shares in the Issuer are held by Vontobel Holding AG, the parent company of the Vontobel Group. There is no control agreement and no profit and loss transfer agreement between the Issuer and Vontobel Holding AG. The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.
B.18	Description of the nature and scope of the guarantee	The due payment by the Issuer of all amounts payable in accordance with the terms and conditions (the "**Terms and Conditions**") of the Securities issued under the Base Prospectus is guaranteed by the Guarantor (the "**Guarantee**"). The Guarantee represents an independent, unsecured and unsubordinated obligation of the Guarantor. Upon first demand by the respective security holders (the "**Security Holders**") and their written confirmation that an amount under the Securities has not been paid when due by the Issuer, Vontobel Holding AG as the Guarantor will pay to them immediately all amounts required to fulfil the intent and purpose of the Guarantee. The intent and purpose of the Guarantee is to ensure that, under all factual or legal circumstances and irrespective of motivations, defences, or objections on the grounds of which payments may fail to be made by the Issuer, and irrespective of the effectiveness and enforceability of the obligations of the Issuer under the Securities, the Security Holders receive the amounts payable on the redemption date and in the manner specified in the Terms and Conditions. The Guarantee represents an independent guarantee under Swiss law. All rights and obligations arising from the Guarantee are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the Guarantee. The place of jurisdiction is Zurich 1.
B.19 with B.1	Legal and com-mercial name of the Guarantor	The Swiss Guarantor's legal and commercial name is Vontobel Holding AG.

B.19 with B.2	Domicile, legal form, applicable legislation and country of incorporation of the Guarantor	The Swiss Guarantor is domiciled in Zurich. Its business address is: Gotthardstrasse 43, 8002 Zurich, Switzerland. The Swiss Guarantor is a stock corporation (*Aktiengesellschaft*) under Swiss law listed on the SIX Swiss Exchange AG and was incorporated in Switzerland. The Swiss Guarantor is entered in the commercial register of the Canton of Zurich under register number CH-020.3.928.014-4.
B.19 with B.4b	Known trends	The prospects of Vontobel Holding AG are influenced in context of the continuing business operations of the companies of Vontobel Group, by changes in the environment (markets, regulations), as well as by market, liquidity, credit and operational risks usually assumed with the launch of new activities (new products and services, new markets) and by reputational risks. In addition to the various market factors such as interest rates, credit spreads, exchange rates, prices of shares, prices of commodities and corresponding volatilities, the current monetary and interest rate policies of central banks are particularly to be mentioned as key influence factors.
B.19 with B.5	Group structure and position of the Guarantor within the group	The Swiss Guarantor is the parent company of the Vontobel Group which consists of banks, capital markets companies and other Swiss and foreign companies. The Swiss Guarantor holds all of the shares in the Issuer.
B.19 with B.9	Profit forecasts or estimates of the Guarantor	– not applicable – A profit forecast or estimate has not been included.
B.19 with B.10	Qualifications in the audit report on historical financial information of the Guarantor	– not applicable – There are no such qualifications.
B.19 with B.12	Selected key historical financial information of the Vontobel Group	The following selected financial information has been taken from the audited consolidated annual financial statements of the Vontobel Group for the financial years 2017 and 2018 which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Income Statement

	1 JANUARY TO 31 DECEMBER 2017 (CHF MILLION)	**1 JANUARY TO 31 DECEMBER 2018 (CHF MILLION)**
Total operating income	1,060.1*	1,157.8
thereof…		
…net interest income	68.5*	71.8
…fee and commission income	692.9	785.7
…trading income	288.8	295.1
…other income	9.9	5.1
Operating expense	800.8*	881.6
thereof…		
…personnel expense	532.6	570.1
…general expense	205.0	246.7
…depreciation, amortization	61.0	68.8
…valuation adjustments, provisions and losses	2.2*	-4.0
Group net profit	209.0	232.2

* The figure regarding net interest income has been changed. The previous year's figures (Total operating income: 1,060.3; net interest income: 68.7; Total operating expense: 801.0; valuation adjustements, provisions and losses: 2.4) have been adjusted accordingly.

Balance Sheet	31 DECEMBER 2017 (CHF MILLION)	31 DECEMBER 2018 (CHF MILLION)
Total assets	22,903.7	26,037.3
Shareholders' equity (excluding minority interests)	1,620.5	1,703.5
Due to customers	9,758.2	12,649.2

BIS capital ratios[1]	31 DECEMBER 2017	31 DECEMBER 2018
CET 1 capital ratio (%) %[2]	18.4	12.3
Tier 1 capital ratio %[3]	18.4	18.9
Total capital ratio (%) %	18.4	18.9

Risk ratio[4]	31 DECEMBER 2017	31 DECEMBER 2018
Average Value at Risk (market risk) (CHF million)	2.5	5.4

1) The Bank for International Settlements (BIS) is the oldest international organisation in the area of finance. It manages parts of the international foreign exchange reserves and is thus de facto regarded as the bank of the world's central banks. The BIS is based in Basel (Switzerland). It publishes capital adequacy requirements and related equity ratios.

2) At present, the Vontobel Group's equity consists exclusively of Common Equity Tier 1 capital.

3) Tier 1 capital is also referred to as core capital. It is a component of a bank's capital and consists primarily of paid-in capital (share capital) and retained earnings (revenue reserves, liability reserve, fund for general banking risks).

4) Average Value at Risk 12 months for positions in the Financial Products division of the Investment Banking business unit. Historical simulation Value at Risk; 99% con-fidence level; 1-day holding period; 4-year historical observation period.

	Statement about the Vontobel Group's prospects	There have been no material adverse changes in the prospects of the Vontobel Group's since the reporting date for the most recent audited annual financial statements (31 December 2018).
	Statement about changes in the Vontobel Group's position	– not applicable – No significant changes have occurred in the financial or trading position of the Vontobel Group's since the reporting date for the unaudited interim financial statements (31 December 2018).
B.19 with B.13	Recent events particular to the Guarantor which are to a material extent relevant to the evaluation of the Guarantor's solvency	– not applicable – There have been no recent events particular to the Swiss Guarantor which are to a material extent relevant to the evaluation of the Swiss Guarantor's solvency.
B.19 with B.14	Group structure and position of the Guarantor within the group/	The Swiss Guarantor is the parent company of the Vontobel Group. With respect to other aspects of the organisational structure, see B.19 with B.5 above.
	Dependence of the Guarantor on other entities within the group	The business activities of the Swiss Guarantor are therefore affected in particular by the situation and activities of the operating (consolidated) Vontobel companies.
B.19 with B.15	Description of the principal activities of the Guarantor	Pursuant to Article 2 of the Articles of Association, the object of Vontobel Holding AG is to invest in companies of all types in Switzerland and abroad. The Swiss Guarantor may acquire, encumber and sell property in Switzerland and abroad. It may also transact any business that may serve to realise its business objective.

		The Vontobel Group is a Swiss private banking group with international activities headquartered in Zurich. It specialises in asset management for private and institutional clients and partners and carries out its activities in three business units, Private Banking, Investment Banking and Asset Management.
B.19 with B.16	Interests in and control of the Guarantor	The major shareholders of Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG, and an extended pool) are parties to a pooling agreement. As of 31 December 2018, 50.7% of all shares of Vontobel Holding AG issued are bound by the pooling agreement.

Section C – Securities

C.1	Type and class of the securities, securities identification numbers	The Securities are tradable. The level of the Cash Amount (see Element C.15 below) depends on the performance of the underlying (see Elements C.15 and C.20 below). **Form of the Securities** The Securities will be in dematerialised form and will only be evidenced by book entries in the system of the Central Securities Depository (as defined below) for registration of securities and settlement of securities transactions in accordance with Chapter 4 of the Swedish Financial Instruments Accounts Act (lag (1998:1479) om värdepapperscentraler och kontoföring av finansiella instrument) (the "**SFIA Act**") to the effect that there will be no certificated securities. **Central Securities Depository** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sweden **Securities identification numbers** ISIN: DE000VE10LN2 WKN: VE10LN Valor: 50078312 NGM Symbol: MFS XET VT36
C.2	Currency of the issue	The currency of the Securities is SEK (the "**Settlement Currency**").
C.5	Description of any restrictions on the transferability of the securities	– not applicable – Each Security is freely transferable in accordance with applicable law and any rules and procedures for the time being of any clearing system through whose books such Security is transferred.
C.8	Description of the rights attached to the securities including ranking and limitations to those rights	**Redemption on exercise or termination** The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15. **Governing law** The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law. The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law. **Ranking of the Securities** The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements. The obligations of the Issuer are not secured by assets of the Issuer.

Limitations to the rights

In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).

In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion *(sections 315, 317 BGB)*, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.

The Issuer has the right to terminate all of the Securities ordinarily by the payment of the ordinary termination amount (which is calculated in the same way as the Cash Amount) and to end the term of the Securities.

C.11	Admission to trading on a regulated market or other equivalent markets	– not applicable – An admission of the Securities to trading on a regulated market or other equivalent markets is not intended. Application will be made for the Securities to be only included in the regulated unofficial market of the following exchanges: <u>Exchange:</u> <u>Market segment:</u> Nordic Growth Market Nordic MTF Sweden The date on which the Securities are expected to be included in trading is 26 September 2019.
C.15	Description of how the value of the investment is affected by the value of the underlying instrument	The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of one or more reference instrument(s) (the "Underlying(s)"). Investors have the opportunity to participate in the performance of the Underlying(s), without purchasing such Underlying(s). Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Mini Futures of the Option Type "Short" are Securities which enable the Security Holder to participate in the fall of the Underlying on a leveraged basis. <u>*Cash Amount*</u> Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early. The occurrence of a Barrier Event depends on the performance of the Underlying. The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is lower than the Strike. In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is lower than the current Strike. The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula: Cash Amount = (Current Strike – Valuation Price) x Ratio. If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.

Early redemption on the occurrence of a Barrier Event

A "**Barrier Event**" occurs if the Observation Price touches or rises above the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or rises above the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. **The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly rising price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.**

Regular adjustment of the Strike and of the Stop-Loss Barrier

In the case of Mini Futures, the Strike and the Stop-Loss Barrier of the Securities may change on specified adjustment dates in accordance with a certain adjustment logic, whereby both are normally reduced (current Strike, current Stop-Loss Barrier). Consequently, as a rule the current Strike is continually falling simply due to the passage of time, which has a negative effect on the value of the Securities since the difference between price of the Underlying and the current Strike becomes smaller.

Option Type:	Short
Underlying:	Ether (USD per 1 XET) (for further details, see C.20)
Ratio:	0.01
Initial Strike:	USD 218.09
Type of Exercise:	American Exercise Type
Exercise Date(s):	each Business Day commencing as of 26 September 2019 (including)
Term:	unlimited (open-end)
Valuation Date:	(a) in the event of an exercise, an exercise date on which the Securities are exercised effectively; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occured.
Initial Stop-Loss Barrier:	USD 205.00
Observation Price:	each price of the underlying asset, determined by the Calculation Agent at its reasonable discretion, continuously during the observation period on the basis of the quoted prices for the underlying asset from the Reference Agents
Observation Period:	every day from the 26 September 2019 (inclusive).

See also the issue-specific information under C.16.

C.16	Expiration or maturity date	Valuation Date(s):	see C.15
		Maturity Date:	ninth (9th) business day following the Valuation Date or the date on which a Barrier Event (see C. 15) occurs.
C.17	Description of the settlement procedure	Amounts due are calculated by the Calculation Agent and made available to the Central Securities Depository by the Issuer on the Maturity Date via the Paying Agents for onward transfer to the respective custodian banks for the purpose of crediting the Security Holders. The Issuer shall thereupon be released from all payment obligations. If a due payment is required to be made on a day that is not a Business Day, the payment may be postponed until the next following Business Day.	

	Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland
	Paying Agents:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany; and Svenska Handelsbanken AB (publ), SE-106 70 Stockholm, Sweden

C.18	Description of redemption for derivative securities	The Securities are redeemed – subject to the occurrence of a Barrier Event – by the payment of the Cash Amount. Further details of the timing of redemption and how the amount is calculated can be found under C.15 to C.17. The Cash Amount is converted into the Settlement Currency of the Securities on the Valuation Date in accordance with the relevant conversion rate. If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.
C.19	Exercise price/ final reference price of the underlying	The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price. The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of three (3) banking business days following the occurrence of the Barrier Event. Reference Price is the price of the Underlying determined by the Calculation Agent, at its reasonable discretion, for one day on the basis of the quoted prices of the Underlying from the Reference Agents during that day.
C.20	Description of the underlying and where information on the underlying can be found	The Underlying to which the Securities are linked is: <u>Ether (USD per 1 XET)</u> Description: Ether is not a currency issued by a state or government but a virtual currency in the form of a so-called payment token within the Ethereum network ("Ethereum"). Ethereum is a distributed system in the field of financial technology, which offers the creation, management and execution of decentralized programs or contracts (so-called Smart Contracts) in its own blockchain infrastructure. Ether is an integral part of Ethereum's blockchain infrastructure. Ether exists only virtually on a computer network and has no physical counter value. Ether trading is de-centralized in the Internet and does not need to be handled through intermediaries such as a state, central banks or commercial banks. Further information on Ether and Ethereum can be found on the website www.ethereum.org. Reference Agent: CoinBase Prime, Kraken, Bitstamp Bloomberg symbol: XETUSD Curncy Performance: https://www.coinbase.com/price/ethereum Information about the historical and future performance of the Underlying and its volatility can be obtained on the Internet from the website specified above.

Section D – Risks

D.2 Key information on the key risks relating to the Issuer and the Guarantor

Insolvency risk of the Issuer

The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.

The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.

For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly higher credit risk than in the case of an issuer with a higher level of capital resources.

The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group (i.e. Vontobel Holding AG together with all consolidated companies). As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.

Market risk of the Issuer

A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).

Insolvency risk of the Guarantor

The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.

The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.

Risks associated with potential reorganization and settlement procedures

German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).

In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.

Business risks relating to the Guarantor

The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have an adverse effect on the valuation of the underlyings and/or derivative financial products.

The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.

D.3 **D.6**	Key information on the key risks relating to the securities/ Risk of total loss	**Risk of loss due to dependence on the performance of the Underlying** The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss. In the case of Securities of the *Short* Type, a **rise** in the rate, price or level of the Underlying is to the disadvantage of the investor. The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue. **Leverage effect** Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor. **Dependence of redemption on the occurrence or non-occurrence of a Barrier Event** If a Barrier Event occurs as a result of the price of the Underlying reaching or rising above a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder.. **Risk of ordinary termination and early redemption by the Issuer** The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination. **Market price risks** The price of a Security depends primarily on the price of the respective Underlying(s) to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security. The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole and further factors). **Option risks with respect to the Securities** The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

Correlation risks

Correlation denotes the extent to which it was possible to establish a specific relation between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

Volatility risk

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

Risks relating to historical performance

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Risks relating to financing the purchase of the Security with debt

If the purchase of the Securities is financed with debt, investors should be aware that in case that investment expectations do not realise they do not only have to bear a potential loss of the capital invested, but also have to pay the loan interest and to repay the loan. As a result, in this case investors are exposed to a significantly increased risk of loss.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

Transactions designed to exclude or limit risk

Investors may not be able to hedge adequately against the risks associated with the Securities.

Inflation risk

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

Risks due to the economic cycle

Losses may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

Psychological market risk

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If the effect of these factors on the price of the Underlying or of its Reference Instrument differs from the market reaction expected by the investor, the investor may suffer a loss.

Risks relating to trading in the Securities, liquidity risk

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Potential investors can therefore not assume that it will be possible to sell the Securities during their term and must be prepared in any event to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

Risks relating to the price determination of the Securities and the effect of transaction costs and commissions

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

Risk relating to the taxation of the Securities

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

Risks relating to the effect of hedging transactions by companies of the Vontobel Group

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the event of extraordinary termination, the investors will lose their rights for full redemption. There is a risk that the termination amount paid will be equal to zero (0). In the least favourable case, a total loss of the capital invested may therefore occur.

Risks with respect to potential conflicts of interest

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

Information risk

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

Currency risk

Potential investors should be aware that an investment in the Securities is associated with exchange rate risks since the rate of exchange between the currency of the Underlying and the Settlement Currency of the Securities may move in a direction that is to their disadvantage.

If the Settlement Currency of the Securities is different from the investor's domestic currency or the currency in which an investor wishes to receive payments, potential investors will be exposed to exchange rate risks.

Interest rate risk

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have implications for the market value of the Securities.

Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder

If the value of the Underlying *rises*, Mini Futures of the Short type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or rises above the Strike.

Risk of early repayment due to a Barrier Event

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.

Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

Risk of early repayment due to ordinary termination

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

Risk of total loss

The Securities are particularly **risky investment instruments**, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.

There is no provision for regular distributions,payments of interest **or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.**

Section E – Offer

E.2b	Reasons for the offer and use of proceeds	The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and/or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.
E.3	Description of the terms and conditions of the offer	Issue Price: SEK 1.74 Issue Date: 26 September 2019 Value Date: 26 September 2019 Offer Size: 250,000 Securities Minimum Trading Lot: 1 Security Public Offer: in Sweden starting from: 24 September 2019 The Issue Price of the Securities was determined by the Market Maker.
E.4	Interests that are material to the issue/ offer (including conflicts of interest)	Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities. *Trading transactions relating to the Reference Instrument* During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the respective Underlying. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the Underlying and thus on the value of the Securities. *Exercise of other functions by companies of the Vontobel Group* The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations. *Activity as Market Maker for the Securities* Bank Vontobel Europe AG will act as market maker (the "**Market Maker**") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors. As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities and/or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.
E.7	Estimated expenses charged to the investor by the Issuer or the Offeror	The estimated expenses for the Securities, including the costs for the admission to exchange trading, are included in the Issue Price or the purchase price, as the case may be. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor. Information on any transaction costs may be obtained from the relevant distributor.

BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

Avsnitt A – Inledning och varningar

A.1	Varningar	Sammanfattningen ska läsas som en introduktion till grundprospektet daterat den 8 juli 2019 som då och då kompletteras till (”**Grundprospektet**"). Varje beslut att investera i Värdepapperen ("**Värdepapperen**") ska baseras på en bedömning av Grundprospektet i sin helhet, inklusive den information som införlivats genom hänvisning samt eventuella bilagor och de Slutliga Villkor som publiceras i samband med emissionen av Värdepapperen. Om krav med anknytning till information som ingår i detta Grundprospekt hamnar inför domstol, kan käranden enligt den nationella lagstiftningen i medlemsstaterna inom Europeiska ekonomiska samarbetsområdet åläggas att bekosta översättningen av Grundprospektet innan rättsprocessen inleds. Vontobel Financial Products GmbH ("**Emittenten**") och Bank Vontobel Europe AG ("**Anbudsgivaren**") och Vontobel Holding AG (den "**Schweiziska Garantigivaren**") har påtagit sig ansvaret för sammanfattningen, inklusive varje översättning av densamma. Däremot har Vontobel Holding AG enbart påtagit sig ansvar vad beträffar informationen om sig själv och garantin i enlighet med schweizisk rätt. De personer som har påtagit sig ansvar för sammanfattningen, inklusive översättningen av den, eller de personer som ansvarar för emissionen, kan bli skadeståndsansvariga, men endast om sammanfattningen är vilseledande, felaktig eller inkonsekvent när den läses tillsammans med Grundprospektets andra delar, eller om den när den läses tillsammans med Grundprospektets andra delar inte ger all den viktiga information som behövs.
A.2	Samtycke till att använda prospektet	Emittenten och Anbudsgivaren samtycker till att använda Grundprospektet för ett offentligt erbjudande som gäller Värdepapperen i Sverige ("**Offentligt erbjudande**") (allmänt samtycke). Emittenten förbehåller sig rätten för att återkalla sitt samtycke till vissa distributörers och/eller andra finansiella mellanhänders användning av Grundprospektet.
	Erbjudandeperiod för återförsäljning av finansiella mellanhänder	Finansiella mellanhänders efterföljande återförsäljning och slutlig placering av Värdepapperen får ske under Erbjudandeperioden. "**Erbjudandeperioden**" avser perioden som inleds den 24 september 2019 och som avslutas med Värdepapperens löptid (se C.15) eller – om ett grundprospekt som följer Grundprospektet inte har publicerats på webbplatsen prospectus.vontobel.com under rubriken 'Base Prospectus' fram till och med det sista giltighetsdatumet för Grundprospektet - med utgång av Grundprospektets giltighet i enlighet med § 9 i den tyska lagen om Värdepappersprospekt (*Wertpapierprospektgesetz*, "**WpPG**").
	Villkor som samtycket är förbundet med	Emittentens och Anbudsgivarens samtycke är villkorat av (1) att Grundprospektet och de slutliga Villkoren endast tillhandahålls potentiella investerare tillsammans med alla tillägg som publicerats före den tidpunkt då dessa tillhandahålls, och (2) att den finansiella mellanhanden, då denne använder Grundprospektet och de Slutliga Villkoren, ser till att följa de tillämpliga lagar gällande försäljning såväl som alla juridiska krav i vederbörande jurisdiktion.
	Meddelande om att finansiella mellanhänder måste tillhandahålla information om de allmänna Villkoren för erbjudanden som dessa lägger fram	**Om ett erbjudande om köp av Värdepapperen görs av en finansiell mellanhand, ska informationen om de allmänna Villkoren för erbjudandet tillhandahållas av vederbörande finansiella mellanhand vid den tidpunkt då erbjudandet läggs fram.**

Avsnitt B – Emittent och Garantigivare

B.1	Registrerat namn och handelsbeteck-ning	Emittentens registrerade namn och handelsbeteckning är Vontobel Financial Products GmbH.
B.2	Säte, bolagsform, tillämplig lagstift-ning och inkorporering	Emittentens säte är i Frankfurt am Main, Tyskland. Företagets regi-strerade adress är: Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Tyskland. Emittenten är ett aktiebolag med begränsad ansvarighet (*Gesellschaft mit beschränkter Haftung*) som är inkorporerat i Tyskland enligt tysk lag och registrerat i handelsregistret hos den lokala domstolens (*Amtsgericht*) i Frankfurt am Main med registernummer HRB 58515.
B.4b	Kända trender	Emittentens näringsverksamhet påverkas särskilt av den ekonomiska utvecklingen, särskilt i Tyskland och Europa, samt av de övergripande förhållandena på de finansiella marknaderna. Dessutom påverkar den politiska miljön även Emittentens verksamhet. Därutöver kan möjliga regeländringar ha ett negativt inflytande på efterfrågan eller på Emittentens kostnadssida.
B.5	Koncernstruktur och Emittentens ställning inom koncernen	Emittenten har inga dotterbolag. Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen (**"Vontobelkoncernen"**). Den schweiziska Vontobelkoncernen grundades år 1924 och har sitt säte i Zürich. Koncernen bedriver internationell privat bankverksamhet. Vontobelkoncernen till-handahåller globala finansiella tjänster baserade på den schweiziska private ban-king-traditionen. De affärsenheter som Vontobelkoncernen fokuserar på är (i) privat bankverksamhet (Private Banking), (ii) kapitalförvaltning (Asset Management) och (iii) investeringstjänster (Investment Banking).
B.9	Resultatprognos el-ler -uppskattningar	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.10	Anmärkningar i revisionsberättelsen vad beträffar histo-risk finansiell in-formation	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.12	Utvald central hi-storisk finansiell information	Den följande utvalda finansiella informationen har hämtats från Emittentens reviderade årsredovisningar för räkenskapsåren 2017 och 2018, vilka har upprättats enligt kraven i den tyska handelslagen (Handelsgesetzbuch) och den tyska aktiebolagslagen (Gesetz betreffend die Gesellschaften mit beschränkter Haftung).

	Utlåtande om Emittentens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Emittentens framtidsutsikter sedan rapporttillfället för den reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Emittentens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Emittentens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.13	Nyligen inträffade händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.	– Ej tillämpligt – Det har inte nyligen förekommit några händelser som rör Emittenten som är väsentliga för bedömningen av Emittentens solvens.
B.14	Koncernstruktur och Emittentens ställning inom koncernen/	Vad beträffar den organisatoriska strukturen, se B.5 ovan.
	Emittentens beroendeförhållande till andra enheter inom koncernen	– Ej tillämpligt – Emittenten har inga dotterbolag. Eftersom alla Emittentens aktier ägs av Vontobel Holding AG, Vontobelkoncernens moderbolag, är Emittenten emellertid beroende av Vontobel Holding AG.
B.15	Beskrivning av Emittentens huvudsakliga verksamhet	Emittentens huvudsakliga verksamhet är att emittera Värdepapper och derivatinstrument samt att genomföra finansiella transaktioner och tillhörande transaktioner för finansiella transaktioner. Verksamhet som kräver tillstånd enligt den tyska bankverksamhetslagen (*Gesetz über das Kreditwesen*) innefattas ej. Dessutom kan Emittenten bedriva all sådan affärsverksamhet som direkt eller indirekt har samband med dess huvudsakliga syfte, samt bedriva all sådan verksamhet som direkt eller indirekt kan syfta till att tjäna Emittentens huvudsakliga syfte. Emittenten kan även bilda, förvärva eller avyttra dotterbolag eller filialer i Tyskland och andra länder eller förvärva ägande i andra företag.
B.16	Ägande eller kon-troll vad beträffar Emittenten	Alla aktier i Emittenten ägs av Vontobel Holding AG som är moderbolag i Vontobelkoncernen. Det finns varken något kontrollavtal eller något avtal om resultatöverföring mellan Emittenten och Vontobel Holding AG. Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett utvidgat poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.
B.18	Beskrivning av Garantins natur och omfattning	Garantigivaren (”**Garantigivaren**”) garanterar att Emittenten betalar alla betalningar i enlighet med de allmänna villkoren (“**Allmänna Villkoren**”) för de Värdepapper som emitteras i enlighet med Grundprospektet. Garantin utgör en oberoende, icke säkerställd och icke efterställd förpliktelse för Garantigivaren. Efter en första begäran från respektive värdepappersinnehavare (“**Värdepappersinnehavarna**”) och dennes skriftliga intyg över att Emittenten inte har betalat ett belopp i samband med Värdepapperen vid förfallotidpunkten, betalar Garantigivaren omedelbart alla belopp som krävs för att uppfylla syftet med Garantin. Syftet med Garantin är att se till att Värdepappersinnehavarna erhåller betalning av alla utestående betalningar på inlösendagen, på det sätt som anges i de Allmänna Villkoren, under alla faktiska och juridiska omständigheter och oavsett motivering, försvar eller invändningar vad beträffar skälet till att Emittenten inte gjort betalningarna, samt oavsett hur effektiva och verkställbara Emittentens förpliktelser är under Värdepapperen. Garantin utgör en självständig Garanti i enlighet med schweizisk lag. Alla rättigheter och skyldigheter som uppstår på grund av Garantin omfattas i alla avseenden av schweizisk lag. Domstolarna i kantonen Zürich har exklusiv behörighet över alla åtgärder och rättstvister som rör Garantin. Domstolarna i Zürich 1 är behöriga i detta hänseende.

B.19 med B.1	Garantigivarens registrerade namn och handelsbeteck-ning	Den Schweiziska Garantigivarens registrerade namn och handelsbe-teckning är Vontobel Holding AG.
B.19 med B.2	Garantigivarens säte, bolagsform, tillämplig lagstift-ning och inkorporering	Den Schweiziska Garantigivarens säte är i Zürich. Företagets registrerade adress är: Gotthardsstrasse 43, 8002 Zürich, Schweiz. Den Schweiziska Garantigivaren är ett aktiebolag (*Aktiengesellschaft*) enligt schweizisk lag och är noterat på SIX Swiss Exchange AG. Företaget är inkorporerat i Schweiz. Den Schweiziska Garantigivaren är registrerad i handelsregistret i kantonen Zürich under registernummer CH-020.3.928.014-4.
B.19 med B.4b	Kända trender	Vontobel Holding AG:s framtidsutsikter påverkas av Vontobelkoncernens företags pågående affärsverksamheter, förändringar i miljön (marknader, regleringar), samt av marknads-, likviditets-, kredit och operativa risker som normalt sett kan förväntas i samband med lansering av nya aktiviteter (nya produkter och tjänster, nya marknader) samt av risken för företagets anseende. Utöver de olika marknadsfaktorerna, till exempel räntesatser, credit spread, valutakurser, aktiepriser, råvarupriser och motsvarande volatilitet, så är centralbankernas aktuella penning- och räntepolitik särskilt värda att nämnas som viktiga påverkande faktorer.
B.19 med B.5	Koncernstruktur och Garantigivarens ställning inom koncernen	Den Schweiziska Garantigivaren är moderbolag i Vontobelkoncernen som består av banker, företag på kapitalmarknaderna och andra schweiziska och utländska företag. Den Schweiziska Garantigivaren innehar alla aktier i Emittenten.
B.19 med B.9	Resultatprognos el-ler –uppskattningar för den Garantigivaren	– Ej tillämpligt – Varken resultatprognos eller -uppskattningar ingår.
B.19 med B.10	Anmärkningar i Garantigivarens revisionsberättelse vad beträffar historisk finansiell informat-ion	– Ej tillämpligt – Det finns inga sådana anmärkningar.
B.19 med B.12	Utvald central historisk finansiell information för Vontobelkoncernen	Den följande utvalda finansiella informationen har hämtats från Vontobelkoncernens reviderade koncernredovisning för räkenskapsåren 2017 och 2018, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).

1) Banken för internationell betalningsutjämning (Bank for International Settle-ments - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.

2) För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).

3) Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).

4) Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för fi-nansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.

	Utlåtande om Vontobelkoncernens framtidsutsikter	Det har inte förekommit några väsentligt negativa förändringar vad gäller Vontobelkoncernens framtidsutsikter sedan rapporttillfället för den senaste reviderade årsredovisningen (31 december 2018).
	Utlåtande om förändringar i Vontobelkoncernens ställning	– Ej tillämpligt – Det har inte förekommit några betydande förändringar vad gäller Vontobelkoncernens finansiella ställning eller handelsposition sedan rapporttillfället för den reviderade årsrapporten (31 december 2018).
B.19 med B.13	Nyligen inträffade händelser som rör Garantigivaren som är väsentliga för bedömningen av Garantigivarens solvens.	– Ej tillämpligt – Det har inte förekommit några nyligen inträffade händelser som rör den Schweiziska Garantigivaren som är väsentliga för bedömningen av den Schweiziska Garantigivarens solvens.
B.19 med B.14	Koncernstruktur och Garantigivarens ställning inom kon-cernen/	Den Schweiziska Garantigivaren är moderbolag inom Vontobelkoncernen. Vad beträffar organisationsstrukturens övriga aspekter, se B.19 med B.5 ovan.
	Garantigivarens be-roendeförhållande till andra enheter inom koncernen	Den Schweiziska Garantigivarens affärsverksamhet påverkas därför särskilt av de operativa Vontobelföretagens situation och verksamhet (konsoliderat).

B.19 med B.15	Beskrivning av Garantigivarens huvudsakliga verk-samhet	I enlighet med bolagsordningens artikel 2 har Vontobel Holding AG som syfte att in-vestera i alla slags företag, i Schweiz och utomlands. Den Schweiziska Garantigiva-ren kan förvärva, belasta och sälja fast egendom i Schweiz och utomlands. Det kan också bedriva annan verksamhet som tjänar till att förverkliga dess affärsidé. Vontobelkoncernen är en schweizisk privat bankkoncern med inter-nationell verksamhet och med högkvarter i Zürich. Koncernen specialiserar sig på tillgångsförvaltning för privata kunder och institutioner samt samarbetspartners och är verksam genom tre affärsenheter, privat bankverksamhet (Private Banking), investeringstjänster (Investment Banking) och tillgångsförvaltning (Asset Management).
B.19 med B.16	Ägande eller kontroll vad beträffar Garantigivaren	Majoritetsaktieägarna i Vontobel Holding AG (Vontobel Foundation, Vontrust AG, Advontes AG, Pellegrinus Holding AG och en utvidgad pool) är deltagare i ett poolingavtal. Per den 31 december 2018 är 50,7% av samtliga emitterade aktier i Vontobel Holding AG bundna av poolingavtalet.

Avsnitt C – Värdepapper

C.1	Värdepapperens typ och klass, identifieringsnummer för Värdepapperen	Värdepapperen är överlåtbara. Nivån på Kontantbeloppet (se Element C.15, nedan) beror av underliggandes utveckling (se Elementen C.15 och C.20, nedan). **Värdepapperens form** Värdepapperen kommer vara i dematerialiserad form och manifesteras endast som bokförda enheter i den Centrala Värdepappersförvararens (enligt definitionen nedan) system för registrering av värdepapper och avveckling av värdepapperstransaktioner i enlighet med kapitel 4 i den svenska lagen om finansiella instrument (lag (1998: 1479) om värdepapperscentraler and kontoföring av finansiella instrument) ("**LKFI**"), vilket innebär att det inte förekommer några fysiska Värdepapper. **Central Värdepappersförvarare** Euroclear Sweden AB, Klarabergsviadukten 63, Box 191, SE-101 23 Stockholm, Sverige **Identifieringsnummer för Värdepapperen** ISIN: DE000VE10LN2 WKN: VE10LN Valor: 50078312 NGM Symbol: MFS XET VT36
C.2	Emissionsvaluta	Valutan för Värdepapperen är SEK ("**Avräkningsvaluta**").
C.5	Beskrivning av eventuella inskränkningar i rätten till överlåtelse av värdepapperen	– Ej tillämpligt – Varje Värdepapper får fritt överlåtas i enlighet med tillämplig lag och för närvarande gällande regler och förfaranden för clearingsystem genom vars system ett sådant Värdepapper överförs.
C.8	Beskrivning av rättigheterna som är anknutna till värdepapperen, inklu-sive rangordning och begränsningar av rättigheterna	**Inlösen eller inlösen vid löptidens slut** Värdepapperen ger Värdepappersinnehavaren rätt att kräva att Emittenten löser in Värdepapperen då dessa förfaller eller vid inlösen genom att betala ett Kontantbelopp så som beskrivs i C.15. **Tillämplig lag** Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas rättigheter och skyldigheter fastställs i enlighet med tysk lag, med undantag för att registrering av Svenska Registrerade Värdepapper styrs av Svensk lag. Den schweiziska Garantins form och innehåll samt de rättigheter och skyldigheter som den medför, fastställs i enlighet med schweizisk lag. **Rangordning av Värdepapperen** De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav. Emittentens förpliktelser är inte säkerställda av Emittentens tillgångar.

Begränsningar av rättigheterna

Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).

I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.

Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.

C.11	Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader	– ej tillämpligt – Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader. Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser: <u>Börsen:</u> <u>Marknadssegment:</u> Nordic Growth Market Nordic MTF Sweden Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 26 september 2019.
C.15	Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde	Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("**Underliggande**"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande. Endast en liten kapitalmängd behöver användas jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Mini Futures av Optionstypen "Short" är Värdepapper som gör att investeraren kan delta i en minskning av Underliggande med hävstångseffekt. *<u>Kontantbelopp</u>* Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid. Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling. Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är lägre än *Strike*. Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produktegenskaper, inklusive bland annat *Strike* komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell Strike som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är lägre än aktuell Strike. Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel: Kontantbelopp = (aktuell Strike - Värderingspris) x Grad. Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller överstiger Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observationspriset är lika med eller överstiger den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt stigande**pris på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt minskar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför minskar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, ef-tersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

Optionstyp:	Short
Underliggande:	Ether (USD per 1 XET) (mer information finns i C.20)
Grad:	0,01
Initial Strike:	USD 218,09
Typ av Inlösen:	Amerikansk inlösentyp
Inösendag(ar):	varje Bankdag som påbörjas från och med 26 september 2019 (inklusive denna)
Löptid:	obegränsad (open-end)
Värderingsdag:	(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas; (b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum; (c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.
Intitial Stop Loss-Barriär:	USD 205,00
Observationspris:	varje pris på den underliggande tillgången, som beräknas av Beräkningsagenten efter eget, rimligt gottfinnande, kontinuerligt under observationsperioden på grundval av de priser som anges för den underliggande tillgången från referensagenten
Observation Period:	varje dag från och med 26 september 2019 (inklusive denna).

Se även den emissionsspecifika informationen under C.16.

C.16	Stängnings- eller förfallodag	Värderingsdag(ar):	Se C.15
		Förfallodag:	nionde (9:e) bankdagen efter Värderingsdagen eller den dag då en Barriärhändelse – såsom beskrivs under C.15 – äger rum.

C.17	Beskrivning av avräkningsförfarandet	Beräkningsagenten beräknar de belopp som ska betalas och Emittenten gör dessa tillgängliga för den Centrala Värdepappersförvararen på Förfallodagen, via Betalningsagenterna för kreditering till vederbörande Värdepappersinnehavare. Överföringen av den Centrala Värdepappersförvararen eller enligt den Centrala Värdepappersförvararens instruktioner befriar Emittenten från dess betalningsförpliktelser under Värdepapperen motsvarande det överförda beloppet. Om en förfallen betalning måste göras på annan än vanlig bankdag kan betalningen förläggas till följande bankdag.

	Beräkningsagent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz
	Betalningsagenter:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Schweiz Bank Vontobel Europe AG, Alter Hof 5, 80331 München, Tyskland, och Svenska Handelsbanken AB (publ), SE-106 70, Stockholm, Sverige

C.18	Beskrivning av inlösen för derivatinstrument	Värdepapperen löses in – med förbehåll för inträffandet av en Barriärhändelse – genom betalning av Kontantbeloppet. Ytterligare uppgifter om inlösentidpunkt och hur beloppet beräknas finns under punkterna C.15 till C.17. Kontantbeloppet omräknas till Värdepapperens avräkningsvaluta på Värderingsdagen, i enlighet med relevant omräkningskurs. Om det fastställda Kontantbeloppet inte är positivt eller om Värdepapperen blir värdelösa omedelbart efter en Barriärhändelse (se C.15), ska Emittenten se till att Värdepapperen avregistreras utan värde, vilket ekonomiskt uttryckt innebär en totalförlust för Värdepap-persinnehavaren.
C.19	Lösenpris/sista referenspris för Underliggande	Kontantbeloppets storlek är beroende av Underliggandes Värde-ringspris. Om en Barriärhändelse äger rum är Värderingspriset refe-renspriset för Stop-Loss; om ingen Barriärhändelse (se C. 15) äger rum är Referenspriset för Underliggande på Värderingsdagen detsamma som Värderingspriset. Referenspriset för Stop-Loss är ett belopp som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande som pris för Underliggande inom en period av tre (3) bankdagar efter Barriärhändelsen. Referenspris innebär Referenspris innebär Priset på det Underliggande som beräknas av beräkningsagenten, enligt sitt rimliga utrymme för skönsmässig bedömning, för en dag på grundval av de Underliggande priserna från Referensagenten under den dagen.
C.20	Beskrivning av Underliggande och var det går att hitta information om Underliggande	Det Underliggande till vilket Värdepapperen är länkade är: <u>Ether (USD per 1 XET)</u> Beskrivning: US Dollar per 1 Ether (XET); Ether är inte en centralbanksvaluta, utan en virtuell valuta i form av en så kallad betalningstoken i ethereumnätverket ("Ethereum"). Ethereum är ett distribuerat system inom finansiell teknik som erbjuder skapande, förvaltning och utförande av decentraliserade program eller kontrakt (så kallade Smart Contracts) i sin egen blockchain-infrastruktur. Ether är en integrerad del av Etheriums blockchain-infrastruktur. Ether existerar enbart virtuellt på ett datornätverk och har inget fysiskt motvärde. Etherhandel är decentraliserad på Internet och behöver inte hanteras via mellanhänder. Ytterligare information om Ether och Ethereum finns på www.ethereum.org. Referensagenten: CoinBase Prime, Kraken, Bitstamp Bloomberg: XETUSD Curncy Prestanda: https://www.coinbase.com/price/ethereum Information om Underliggandes historiska och framtida prestation och dess volatilitet går att få på internet på den webbplats som anges ovan.

Avsnitt D – Risker

D.2	Central information om de centrala risker som är specifika för Emittenten och Garantigivaren	**Insolvensrisk för Emittenten** Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förplik-telser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Under-liggandes utveckling.

Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent.

Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.

Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen (dvs. Vontobel Holding AG samt alla koncernbolag). På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.

Emittentens marknadsrisk

Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).

Garantigivarens insolvensrisk

Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.

Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.

Risker hänförliga till potentiell omorganisation och betalnings-procedurer

Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).

I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.

Verksamhetsrisker som rör Garantigivaren

Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.

Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.

D.3 **D.6**	Central information om de centrala risker som är specifika för Värdepapperen/ Risk för totalför-lust	**Risk för förlust på grund av beroende av Underliggandes utveckling** Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade ”Underliggande”. Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust. I fråga om Värdepapper av typen *Short* är Underliggandes kurs-, pris- eller nivå**ökning** ogynnsam för investeraren.

Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

Hävstångseffekt

Endast en liten kapitalmängd behöver användas, jämfört med en di-rektinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

Inlösen är beroende av om Barriärhändelse äger rum eller inte

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller överstiger en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

Marknadsprisrisk

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling och ytterligare faktorer).

Optionsrisker relaterade till Värdepapperen

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

Korrelationsrisker

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

Volatilitetsrisk

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

Risker relaterade till historisk utveckling

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Risker relaterade till lånefinansiering av köpet av Värdepapper

Om köp av Värdepapper finansieras med lån, bör investerare vara medvetna om att i det fall att en investering inte motsvarar förväntningarna, kommer de inte bara att behöva bära en eventuell förlust av det investerade kapitalet, men också att behöva betala ränta och återbetala lånet. Som ett resultat i det här fallet, är investerare utsatta för en betydligt ökad risk för förlust.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

Transaktioner som är tänkta att exkludera eller begränsa risk

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

Inflationsrisk

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

Risker på grund av ekonomiska cykler

Förluster kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

Psykologiska marknadsrisker

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om effekten av dessa faktorer på kursen på Underliggande eller dess Referensinstrument skiljer sig från investerarens förväntade marknadsreaktion, kan investeraren lida en förlust.

Risker relaterade till handel med Värdepapperen, likviditetsrisk

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

Risk relaterad till beskattningen av Värdepapperen

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling

Emittenten kan göra justeringar för att ta hänsyn till relevanta änd-ringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

Risk i samband med potentiella intressekonflikter

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

Informationsrisk

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

Valutarisk

Möjliga investerare bör vara medvetna om att investeringar i Värdepapper medför valutakursrisker eftersom växlingskursen för Underliggandes Valuta och Värdepapperens Avräkningsvaluta kan röra sig i en riktning som är ogynnsam för investeraren.

Om Värdepapperens Avräkningsvaluta inte är densamma som valutan där investeraren är bosatt eller valutan i vilken investeraren vill erhålla betalning, kommer potentiella investerare att utsättas för valutarisker.

Ränterisk

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan få konsekvenser för marknadsvärdet på Värdepapperen.

Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen

Om Underliggandes värde **stiger**, innebär Mini-Futures av typen Short en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller överstiger Strike.

Risk för tidig återbetalning på grund av en Barriärhändelse

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.

Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden

Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.

Risk för totalförlust

Värdepapperen är **särskilt riskabla investeringsinstrument**, som kombinerar egenskaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.

Det finns ingen bestämmelse om regelbunden distribution,räntebetalning **eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.**

Avsnitt E – Erbjudande

E.2b	Motiv till erbjudandet och användning av likviden	Emittenten äger rätt att fritt disponera över likviden från emissionen av Värdepapperen. Användningen av sådan likvid syftar endast till att skapa vinster och/eller säkra mot vissa risker för Emittenten. Emittenten är under inga omständigheter skyldig att investera likviden från Värdepapperen i den underliggande tillgången eller i andra tillgångar.
E.3	Beskrivning av erbjudandets allmänna Villkor	Emissionspris: SEK 1,74 Emissionsdatum: 26 september 2019 Värdedatum: 26 september 2019 Erbjudandets volym: 250 000 Värdepapper Minsta handelsvolym: 1 Värdepapper Offentligt erbjudande: i Sverige från: 24 september 2019 Värdepapperens Emissionspris fastställdes av Market Maker.
E.4	Relevanta intressen för emissionen/ erbjudandet (inklusive intressekonflikter)	Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepapperens värde.

		Handelstransaktioner som rör Referensinstrument Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen inbegrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde. *Övriga funktioner som företagen i Vontobelkoncernen kan utföra* Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande. *Verksamhet som Market Maker för Värdepapperen* Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("**Market Maker**"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer. Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepris.
E.7	Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren	Inte tillämpligt då inga utgifter debiteras investerare av Emittenten. De beräknade kostnaderna för Värdepapperen, inklusive kostnaderna för upptagning till börshandeln ingår i Emissionskursen eller inköpspriset, beroende på vad som är fallet. Om investeraren köper Värdepapperen från en distributör kan det inköpspris som betalas av investeraren innehålla försäljningskommissioner som måste lämnas av distributören. Information om alla transaktionskostnader kan erhållas av gällande distributör.
