| <p><sup>1)</sup> Banken för internationell betalningsutjämning (Bank for International Settlements - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.</p> <p><sup>2)</sup> För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).</p> <p><sup>3)</sup> Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).</p> <p><sup>4)</sup> Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för finansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.</p> <p>Den följande utvalda finansiella informationen har hämtats från den oreviderade delårsrapporten över finansiell information för perioden som avslutades den 30 juni 2017, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).</p> |                                                                                     |                                                                                     |

|             |                                                                                           | <p><b>Rangordning av Värdepapperen</b></p> <p>De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav.</p> <p><b>Begränsningar av rättigheterna</b></p> <p>Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).</p> <p>I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.</p> <p>Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.</p>                                                                                                                                                                                                                                                                                                                   |
| <b>C.11</b> | Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader         | <p>– ej tillämpligt –</p> <p>Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader.</p> <p>Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser:</p> <p><u>Börsen:</u> Nordic Growth Market      <u>Marknadssegment:</u> Nordic MTF Sweden</p> <p>Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 20 april 2018.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>C.15</b> | Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde | <p>Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("<b>Underliggande</b>"). Investerares kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande.</p> <p>Mini Futures av Optionstypen "Long" är Värdepapper som gör att investeraren kan delta i en ökning av Underliggande med hävstångseffekt.</p> <p><u>Kontantbelopp</u></p> <p>Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid.</p> <p>Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling.</p> <p>Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är högre än <i>Strike</i>.</p> <p>Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produkttegenskaper, inklusive bland annat <i>Strike</i> komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell <i>Strike</i> som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är högre än aktuell <i>Strike</i>.</p> <p>Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel:</p> <p>Kontantbelopp = (Värderingspris - aktuell <i>Strike</i>) x Grad.</p> |

|                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                |                |                |                                                        |                                                                                                                          |    |                 |            |                 |                       |                 |                                                                         |         |                       |                |                                                                                                                                                                                                                                  |                             |          |                   |                                                                                                                                                                                            |                     |                                                         |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|----------------|--------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|----|-----------------|------------|-----------------|-----------------------|-----------------|-------------------------------------------------------------------------|---------|-----------------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|----------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|---------------------------------------------------------|
|                             | <p>Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.</p> <p><u>Tidig inlösen om Barriärhändelse inträffar</u></p> <p>En "<b>Barriärhändelse</b>" äger rum om Observationspriset är lika med eller faller under Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observations-priset är lika med eller faller under den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. <b>Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt sjunkandepris</b> på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.</p> <p><u>Reguljära justeringar av Strike och Stop-Loss-Barriär</u></p> <p>Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt ökar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför ökar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, eftersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.</p> <table><tr><td>Optionstyp:</td><td>Long</td></tr><tr><td>Underliggande:</td><td>USD/SEK växlingskurs<br/>(mer information finns i C.20)</td></tr><tr><td>Grad:</td><td>10</td></tr><tr><td>Initial Strike:</td><td>SEK 8,2376</td></tr><tr><td>Typ av Inlösen:</td><td>Amerikansk inlösentyp</td></tr><tr><td>Inlösendag(ar):</td><td>varje Bankdag som påbörjas från och med 20 april 2018 (inklusive denna)</td></tr><tr><td>Löptid:</td><td>obegränsad (open-end)</td></tr><tr><td>Värderingsdag:</td><td>(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas;<br/>(b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum;<br/>(c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.</td></tr><tr><td>Intitial Stop Loss-Barriär:</td><td>SEK 8,32</td></tr><tr><td>Observationspris:</td><td>varje marknadspriset bestäms av Beräkningsagenten som härrör från köp- och säljkurser för det Underliggande som finns och publiceras på respektive sidor av informationstjänsten Bloomberg</td></tr><tr><td>Observation Period:</td><td>varje dag från och med 20 april 2018 (inklusive denna).</td></tr></table> <p>Se även den emissionsspecifika informationen under C.16.</p> | Optionstyp:                                                                                                                                                                                                                    | Long           | Underliggande: | USD/SEK växlingskurs<br>(mer information finns i C.20) | Grad:                                                                                                                    | 10 | Initial Strike: | SEK 8,2376 | Typ av Inlösen: | Amerikansk inlösentyp | Inlösendag(ar): | varje Bankdag som påbörjas från och med 20 april 2018 (inklusive denna) | Löptid: | obegränsad (open-end) | Värderingsdag: | (a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas;<br>(b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum;<br>(c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar. | Intitial Stop Loss-Barriär: | SEK 8,32 | Observationspris: | varje marknadspriset bestäms av Beräkningsagenten som härrör från köp- och säljkurser för det Underliggande som finns och publiceras på respektive sidor av informationstjänsten Bloomberg | Observation Period: | varje dag från och med 20 april 2018 (inklusive denna). |

| <b>D.2</b> | Central information om de centrala risker som är specifika för Emittenten och Garantigivaren | <p><b>Insolvensrisk för Emittenten</b></p> <p>Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Underliggandes utveckling.</p> <p>Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent.</p> |

|                          |                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------|--------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                                                                                                        | <p>Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.</p> <p>Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen. På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.</p> <p><b>Emittentens marknadsrisk</b></p> <p>Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).</p> <p><b>Garantigivarens insolvensrisk</b></p> <p>Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.</p> <p>Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.</p> <p><b>Risker hänförliga till potentiell omorganisation och betalnings-procedurer</b></p> <p>Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Bank Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).</p> <p>I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.</p> <p><b>Verksamhetsrisker som rör Garantigivaren</b></p> <p>Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.</p> <p>Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.</p> |
| <b>D.3</b><br><b>D.6</b> | Central information om de centrala risker som är specifika för Värdepapperen/<br>Risk för totalförlust | <p><b>Risk för förlust på grund av beroende av Underliggandes utveckling</b></p> <p>Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade "Underliggande". Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust.</p> <p>I fråga om Värdepapper av typen <i>Long</i> är Underliggandes kurs-, pris- eller nivåfall ogynnsam för investeraren.</p> <p>Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

### **Hävstångseffekt**

Endast en liten kapitalmängd behöver användas, jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

### **Inlösen är beroende av om Barriärhändelse äger rum eller inte**

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller faller under en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

### **Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid**

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

### **Marknadsprisrisk**

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling).

### **Optionsrisker relaterade till Värdepapperen**

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

### **Korrelationsrisker**

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

### **Volatilitetsrisk**

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

### **Risker relaterade till historisk utveckling**

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

**Transaktioner som är tänkta att exkludera eller begränsa risk**

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

**Inflationsrisk**

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

**Risker på grund av ekonomiska cykler**

Förluster på grund av prisfall kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

**Psykologiska marknadsrisker**

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om priset på Underliggande eller på dess Referensinstrument påverkas av en sådan effekt, i motsats till investerarens marknadsförväntningar, kan investeraren lida en förlust.

**Risker relaterade till handel med Värdepapperen, likviditetsrisk**

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

**Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner**

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

**Risk relaterad till beskattningen av Värdepapperen**

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

**Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobel-koncernen**

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

### **Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling**

Emittenten kan göra justeringar för att ta hänsyn till relevanta ändringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

### **Risk i samband med potentiella intressekonflikter**

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

### **Informationsrisk**

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

### **Valutarisk**

Om Avräkningsvalutan för Värdepapperen inte är densamma som valutan där investeraren är bosatt eller valutan där investeraren vill erhålla betalning, är möjliga investerare utsatta för valutarisk.

### **Ränterisk**

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan ha en negativ inverkan på värdet av Värdepapperen.

### **Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen**

Om Underliggandes värde **faller**, innebär Mini-Futures av typen Long en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller faller under Strike.

### **Risk för tidig återbetalning på grund av en Barriärhändelse**

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

**Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.**

### **Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären**

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

|  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  | <p><b>Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden</b></p> <p>Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löp-tiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.</p> <p><b>Risk för totalförlust</b></p> <p>Värdepapperen är <b>särskilt riskabla investeringsinstrument</b>, som kombinerar egen-skaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värde-papperen är därför förknippade med oproportionerliga förlustrisker (risk för total-förlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar-och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.</p> <p><b>Det finns ingen bestämmelse om regelbunden distribution, räntebetalning eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapi-tal, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.</b></p> |

| <b>E.4</b>             | Relevanta intressen för emissionen/erbjudandet (inklusive intressekonflikter) | <p>Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepappe-rens värde.</p> <p><u>Handelstransaktioner som rör Referensinstrument</u></p> <p>Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen in-begrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobel-koncernen kan även bli motparter i säkringstransaktioner som rör Emittentens för-pliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde.</p> <p><u>Övriga funktioner som företagen i Vontobelkoncernen kan utföra</u></p> <p>Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktio-ner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underlig-gande eller att beräkna dess värde. Dessa funktioner kan även medföra intresse-konflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande.</p> <p><u>Verksamhet som Market Maker för Värdepapperen</u></p> <p>Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("Market Maker"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer.</p> |

|            |                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|------------|----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                                                                  | <p>Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepreis.</p> <p><u>Betalning av provision, tredje parter eget intresse</u></p> <p>I samband med placering och/eller offentligt erbjudande av Värdepapperen kan Emittenten eller de övriga företagen i Vontobelkoncernen betala provision till tredje parter. Det är möjligt att dessa tredje parter kan tillgodose sina egna intressen i samband med att de fattar ett investeringsbeslut eller investeringsrekommendation.</p> |
| <b>E.7</b> | Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren | <p>– inte tillämpligt –</p> <p>Investeraren kan köpa Värdepapper till emissionspris eller till försäljningspris som anges av Market Maker under Värdepapperens löptid. Priserna innefattar alla Emittentens, Anbudsgivarens och Market Makers för emissionen och distributionen av Värdepapperen (t.ex. försäljnings- och distributionskostnader, struktureringskostnader och säkringskostnader, inklusive vinstmarginal).</p> <p>Förutom Emissionspris eller inköpspris kommer Emittenten och Anbudsgivaren inte att debitera investeraren för några ytterligare kostnader.</p> <p>Uppgifter om eventuella transaktionskostnader bör begäras av vederbörande försäljare eller av investerarens egen bank eller mäklare.</p>                                                                                                                     |

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 31 August 2017. It should be noted that only the Base Prospectus (including any supplements) dated 31 August 2017 and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (<https://certificates.vontobel.com>) whereby the Final Terms are accessible by entry of the respective ISIN on the page <https://certificates.vontobel.com> and the Base Prospectus and any supplements thereto are directly accessible on the page <https://certificates.vontobel.com> under the section <<Legal Documents>>. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 31 August 2017 is valid up to 5 September 2018. After this date, the Public Offer of Securities will be continued on the basis of one or more subsequent base prospectuses (each a "**Subsequent Base Prospectus**"), if such Subsequent Base Prospectus includes the continuation of the Public Offer of the Securities. In this case these Final Terms must be read in connection with the respective current Subsequent Base Prospectus and all references in these Final Terms shall be references to the respective current Subsequent Base Prospectus. Each Subsequent Base Prospectus will be published on the website <https://certificates.vontobel.com> under the section 'Legal Documents' on the last day of the validity of the respective current base prospectus at the latest.

These Final Terms were prepared for the purposes of the Public Offer of the Securities. The issue of the Securities is a new issue.

| Current Strike                   | The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Adjustment of the Current Strike | <p>The Current Strike shall be adjusted using the following formula:</p> $FL_n = FL_a + \frac{(r + FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$ <p>where:</p> <p><b>FL<sub>n</sub></b>: Strike following the adjustment = Current Strike.</p> <p><b>FL<sub>a</sub></b>: Strike before the adjustment.</p> <p><b>r</b>: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.</p> <p><b>FS</b>: Current Financing Spread. The "<b>Current Financing Spread</b>" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Fi-nancing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.</p> <p><b>n</b>: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).</p> <p><b>DivF</b>: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (<i>for Securities governed by German law in accordance with sections 315, 317 BGB</i>) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.</p> <p><b>Div</b>: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (<i>in accordance with sections 315, 317 BGB</i>) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "<b>Ex-Dividend Date</b>" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.</p> |

|-----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                   | The result of the calculation shall be rounded upwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.0001.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Financing Spread                  | The Financing Spread on the Issue Date shall amount to 2.50%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Maximum Financing Spread          | The Maximum Financing Spread shall amount to 5.00%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Ratio                             | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Cash Amount                       | <p>The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is higher than the Current Strike, multiplied by the Ratio, i.e.</p> $\text{Cash Amount} = (\text{Valuation Price} - \text{Current Strike}) \cdot \text{Ratio}$                                                                                                                                                                                                                                                                                                                                           |
| Base Settlement Amount            | Not applicable                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Barrier Event                     | <p>A Barrier Event shall occur if during the Observation Period the Observation Price touches or is lower than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically.</p> <p>If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price.</p> <p>The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event.</p> <p>Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.</p> |
| Valuation Price                   | <p>The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows:</p> <p>The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).</p>                                                                                                                                                                                                              |
| Initial Stop-Loss Barrier         | SEK 153.96                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Initial Stop-Loss Buffer          | 4.999%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Maximum Stop-Loss Buffer          | 15.00%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Current Stop-Loss Barrier         | <p>on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date.</p> <p>The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded up to the nearest multiple of the rounding of the Stop-Loss Barrier:</p> $StL = FL_n \cdot (100 \% + StLP)$ <p><b>StL:</b> Current Stop-Loss Barrier.<br/> <b>FL<sub>n</sub>:</b> Strike following the adjustment = Current Strike.<br/> <b>StLP:</b> Current Stop-Loss Buffer.</p> <p>The rounding of the Stop-Loss Barrier shall be 0.01.</p>                                                |
| Stop-Loss Barrier Adjustment Date | shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.                                                                                                                                                                                                                                                                                                                                                      |

|                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Current Stop-Loss Buffer                    | The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Observation Period                          | The Observation Period shall be every day from 20 April 2018 (inclusive).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Observation Price                           | shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or falls below the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Type of Exercise                            | American Exercise Type                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Exercise Time                               | is 11:00 a.m. (Stockholm time)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Exercise Date                               | shall mean each Business Day commencing as of the First Exercise Date (including).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| First Exercise Date                         | 20 April 2018                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Minimum Exercise Number                     | 1 Security                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Reference Price                             | The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows:<br>Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Stop-Loss Reference Price                   | shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows:<br><br>The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.                                                |
| Valuation Date                              | Valuation Date shall be<br>(a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions;<br>(b) in the event of ordinary termination by the Issuer, the ordinary termination date;<br>(c) in the event of an Barrier Event, the day on which the Barrier Event occurred.<br>If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day. |
| Exchange Day                                | A day on which trading in the Underlying takes place on the Reference Agent.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Right of Ordinary Termination of the Issuer | The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Termination Cut-Off Date                    | is one (1) Business Day before the relevant Termination Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## **3. Reimbursements, contributions, price surcharge**

There are no additional charges or commissions levied for the purchaser.

## **4. Publication of information after completion of the issue**

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information after the issue has been completed.

## APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

| Section A – Introduction and warnings |                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| C.8         | Description of the rights attached to the securities including ranking and limitations to those rights | <p><b>Redemption on exercise or termination</b></p> <p>The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15.</p> <p><b>Governing law</b></p> <p>The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law.</p> <p>The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law.</p> <p><b>Ranking of the Securities</b></p> <p>The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank pari passu in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements.</p> <p><b>Limitations to the rights</b></p> <p>In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).</p> <p>In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.</p> |       |              |      |        |        |          |             |                      |

| <b>C.15</b> | <p>Description of how the value of the investment is affected by the value of the underlying instrument</p> | <p>The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of another reference instrument (the "<b>Underlying</b>"). Investors are able to participate in the performance of an Underlying, without purchasing the relevant Underlying.</p> <p>Mini Futures of the Option Type "Long" are Securities which enable the Security Holder to participate in the rise of the Underlying on a leveraged basis.</p> <p><u>Cash Amount</u></p> <p>Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early.</p> <p>The occurrence of a Barrier Event depends on the performance of the Underlying.</p> <p>The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is higher than the Strike.</p> <p>In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is higher than the current Strike.</p> <p>The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula:</p> <p>Cash Amount = (Valuation Price – Current Strike) x Ratio.</p> <p>If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.</p> <p><u>Early redemption on the occurrence of a Barrier Event</u></p> <p>A "<b>Barrier Event</b>" occurs if the Observation Price touches or falls below the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or falls below the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. <b>The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly falling price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.</b></p> |

| <b>C.19</b> | Exercise price/ final reference price of the underlying                            | <p>The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price.</p> <p>The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event.</p> <p>Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.</p> |

|-------------------|---------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>D.2</b>        | Key information on the key risks relating to the Issuer and the Guarantor | <p><b>Insolvency risk of the Issuer</b></p> <p>The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.</p> <p>The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.</p> <p>For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly greater credit risk than in the case of an issuer with a higher level of capital resources.</p> <p>The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group. As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.</p> <p><b>Market risk of the Issuer</b></p> <p>A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).</p> |

|            |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                                                                    | <p><b>Insolvency risk of the Guarantor</b></p> <p>The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.</p> <p>The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.</p> <p><b>Risks associated with potential reorganization and settlement procedures</b></p> <p>German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Bank Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).</p> <p>In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.</p> <p><b>Business risks relating to the Guarantor</b></p> <p>The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have a negative impact on the valuation of the underlyings and/or derivative financial products.</p> <p>The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.</p> |
| D.3<br>D.6 | Key information on the key risks relating to the securities/<br>Risk of total loss | <p><b>Risk of loss due to dependence on the performance of the Underlying</b></p> <p>The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss.</p> <p>In the case of Securities of the <i>Long</i> Type, a <b>fall</b> in the rate, price or level of the Underlying is to the disadvantage of the investor.</p> <p>The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.</p> <p><b>Leverage effect</b></p> <p>Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.</p> <p><b>Dependence of redemption on the occurrence or non-occurrence of a Barrier Event</b></p> <p>If a Barrier Event occurs as a result of the price of the Underlying reaching or falling below a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..</p>                                                                                                                                                                                                                                                                                                                                                                                 |

**Risk of ordinary termination and early redemption by the Issuer**

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

**Market price risks**

The price of a Security depends primarily on the price of the respective Underlying to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole).

**Option risks with respect to the Securities**

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

**Correlation risks**

Correlation denotes the extent to which it was possible to establish a specific dependence between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

**Volatility risk**

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

**Risks relating to historical performance**

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

**Transactions designed to exclude or limit risk**

Investors may not be able to hedge adequately against the risks associated with the Securities.

**Inflation risk**

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

**Risks due to the economic cycle**

Losses from a fall in prices may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

**Psychological market risk**

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If, through such effect, the price of the Underlying or of its Reference Instrument is affected to the contrary of the market expectations of the investor, the investor may suffer a loss.

**Risks relating to trading in the Securities, liquidity risk**

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Thus, potential investors must not assume that it will be possible to sell the Securities during their term and must in any case be prepared to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

**Risks relating to the price determination of the Securities and the effect of transaction costs and commissions**

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

**Risk relating to the taxation of the Securities**

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

**Risks relating to the effect of hedging transactions by companies of the Vontobel Group**

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

**Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement**

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective Underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' redemption rights cease to exist and there is the risk that the extraordinary termination amount may be zero (0). In the least favourable case, a total loss of the capital invested may occur.

**Risks with respect to potential conflicts of interest**

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

**Information risk**

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

**Currency risk**

If the Settlement Currency of the Securities is different from the domestic currency of the investor or the currency in which an investor wishes to receive payments, potential investors bear exchange rate risks.

**Interest rate risk**

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have a negative impact on the value of the Securities.

**Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder**

If the value of the Underlying **falls**, Mini Futures of the Long type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or falls below the Strike.

**Risk of early repayment due to a Barrier Event**

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

**Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.**

**Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier**

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

**Risk of early repayment due to ordinary termination**

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

|  |  | <p><b>Risk of total loss</b></p> <p>The Securities are <b>particularly risky investment instruments</b>, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.</p> <p><b>There is no provision for regular distributions, payments of interest or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.</b></p> |

| <b>E.2b</b>       | Reasons for the offer and use of proceeds                                         | The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and / or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| <b>E.4</b>        | Interests that are material to the issue/ offer (including conflicts of interest) | <p>Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.</p> <p><u>Trading transactions relating to the Reference Instrument</u></p> <p>During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the Reference Instrument. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the value of the Reference Instrument and thus have a negative impact on the Underlying and the value of the Securities.</p> <p><u>Exercise of other functions by companies of the Vontobel Group</u></p> <p>The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations.</p> <p><u>Activity as Market Maker for the Securities</u></p> <p>Bank Vontobel Europe AG will act as market maker (the "<b>Market Maker</b>") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors.</p> <p>As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.</p> |

|            |                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|            |                                                                         | <p><u>Payment of commissions, own interests of third parties</u></p> <p>In connection with the placing and/or the Public Offer of the Securities, the Issuer or other companies of the Vontobel Group may pay commissions to third parties. It is possible that these third parties may pursue their own interests in the course of making an investment decision or investment recommendation.</p>                                                                                                                                                                                                                                                                                                |
| <b>E.7</b> | Estimated expenses charged to the investor by the Issuer or the Offeror | <p>– not applicable –</p> <p>The investor may purchase the Securities at the Issue Price or at the selling prices quoted by the Market Maker during the term of the Securities. These prices include all costs incurred by the Issuer, Offeror and Market Maker for the issue and distribution of the Securities (e.g. sales and distribution costs, structuring and hedging costs, including a profit margin).</p> <p>No further expenses will be charged to the investor by the Issuer or the Offeror beyond the Issue Price or the purchase price.</p> <p>Details of any transaction costs should be requested from the relevant sales partner or from the investor's house bank or broker.</p> |

## BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

| Avsnitt A – Inledning och varningar |                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <p><sup>1)</sup> Banken för internationell betalningsutjämning (Bank for International Settlements - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.</p> <p><sup>2)</sup> För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).</p> <p><sup>3)</sup> Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).</p> <p><sup>4)</sup> Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för finansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.</p> <p>Den följande utvalda finansiella informationen har hämtats från den oreviderade delårsrapporten över finansiell information för perioden som avslutades den 30 juni 2017, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).</p> |                                                                                     |                                                                                     |

|             |                                                                                           | <p><b>Rangordning av Värdepapperen</b></p> <p>De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav.</p> <p><b>Begränsningar av rättigheterna</b></p> <p>Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).</p> <p>I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.</p> <p>Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.</p>                                                                                                                                                                                                                                                                                                                  |
| <b>C.11</b> | Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader         | <p>– ej tillämpligt –</p> <p>Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader.</p> <p>Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser:</p> <p><u>Börsen:</u> Nordic Growth Market      <u>Marknadssegment:</u> Nordic MTF Sweden</p> <p>Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 20 april 2018.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>C.15</b> | Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde | <p>Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("<b>Underliggande</b>"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande.</p> <p>Mini Futures av Optionstypen "Long" är Värdepapper som gör att investeraren kan delta i en ökning av Underliggande med hävstångseffekt.</p> <p><u>Kontantbelopp</u></p> <p>Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid.</p> <p>Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling.</p> <p>Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är högre än <i>Strike</i>.</p> <p>Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produkttegenskaper, inklusive bland annat <i>Strike</i> komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell <i>Strike</i> som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är högre än aktuell <i>Strike</i>.</p> <p>Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel:</p> <p>Kontantbelopp = (Värderingspris - aktuell <i>Strike</i>) x Grad.</p> |

|                             |                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                |         |                |                                                                                                                          |       |   |                 |            |                 |                       |                 |                                                                         |         |                       |                |                                                                                                                                                                                                                                  |                             |            |                   |                                                                         |                     |                                                         |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------|----------------|--------------------------------------------------------------------------------------------------------------------------|-------|---|-----------------|------------|-----------------|-----------------------|-----------------|-------------------------------------------------------------------------|---------|-----------------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|------------|-------------------|-------------------------------------------------------------------------|---------------------|---------------------------------------------------------|
|                             |                                                                                                                                                                                                                                  | <p>Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.</p> <p><u>Tidig inlösen om Barriärhändelse inträffar</u></p> <p>En "<b>Barriärhändelse</b>" äger rum om Observationspriset är lika med eller faller under Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observations-priset är lika med eller faller under den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. <b>Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt sjunkandepris</b> på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.</p> <p><u>Reguljära justeringar av Strike och Stop-Loss-Barriär</u></p> <p>Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt ökar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför ökar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, eftersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.</p> <table><tr><td>Optionstyp:</td><td>Long</td></tr><tr><td>Underliggande:</td><td>Volvo AB<br/>(mer information finns i C.20)</td></tr><tr><td>Grad:</td><td>1</td></tr><tr><td>Initial Strike:</td><td>SEK 146,63</td></tr><tr><td>Typ av Inlösen:</td><td>Amerikansk inlösentyp</td></tr><tr><td>Inlösendag(ar):</td><td>varje Bankdag som påbörjas från och med 20 april 2018 (inklusive denna)</td></tr><tr><td>Löptid:</td><td>obegränsad (open-end)</td></tr><tr><td>Värderingsdag:</td><td>(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas;<br/>(b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum;<br/>(c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.</td></tr><tr><td>Intitial Stop Loss-Barriär:</td><td>SEK 153,96</td></tr><tr><td>Observationspris:</td><td>priset på Underliggande fastställs och offentliggörs av Referensagenten</td></tr><tr><td>Observation Period:</td><td>varje dag från och med 20 april 2018 (inklusive denna).</td></tr></table> <p>Se även den emissionsspecifika informationen under C.16.</p> | Optionstyp:    | Long    | Underliggande: | Volvo AB<br>(mer information finns i C.20)                                                                               | Grad: | 1 | Initial Strike: | SEK 146,63 | Typ av Inlösen: | Amerikansk inlösentyp | Inlösendag(ar): | varje Bankdag som påbörjas från och med 20 april 2018 (inklusive denna) | Löptid: | obegränsad (open-end) | Värderingsdag: | (a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas;<br>(b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum;<br>(c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar. | Intitial Stop Loss-Barriär: | SEK 153,96 | Observationspris: | priset på Underliggande fastställs och offentliggörs av Referensagenten | Observation Period: | varje dag från och med 20 april 2018 (inklusive denna). |

| <b>D.2</b>         | Central information om de centrala risker som är specifika för Emittenten och Garantigivaren | <p><b>Insolvensrisk för Emittenten</b></p> <p>Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Underliggandes utveckling.</p> <p>Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent.</p> <p>Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.</p> |

|                                     |                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                     |                                                                                                                | <p>Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen. På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.</p> <p><b>Emittentens marknadsrisk</b></p> <p>Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).</p> <p><b>Garantigivarens insolvensrisk</b></p> <p>Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.</p> <p>Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.</p> <p><b>Risker hänförliga till potentiell omorganisation och betalnings-procedurer</b></p> <p>Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Bank Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).</p> <p>I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.</p> <p><b>Verksamhetsrisker som rör Garantigivaren</b></p> <p>Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.</p> <p>Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.</p> |
| <p><b>D.3</b></p> <p><b>D.6</b></p> | <p>Central information om de centrala risker som är specifika för Värdepapperen/<br/>Risk för totalförlust</p> | <p><b>Risk för förlust på grund av beroende av Underliggandes utveckling</b></p> <p>Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade "Underliggande". Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust.</p> <p>I fråga om Värdepapper av typen <i>Long</i> är Underliggandes kurs-, pris- eller nivåfall ogynnsam för investeraren.</p> <p>Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### **Hävstångseffekt**

Endast en liten kapitalmängd behöver användas, jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

### **Inlösen är beroende av om Barriärhändelse äger rum eller inte**

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller faller under en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

### **Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid**

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

### **Marknadsprisrisk**

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling).

### **Optionsrisker relaterade till Värdepapperen**

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

### **Korrelationsrisker**

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

### **Volatilitetsrisk**

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

### **Risker relaterade till historisk utveckling**

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

### **Transaktioner som är tänkta att exkludera eller begränsa risk**

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

### **Inflationsrisk**

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

### **Risker på grund av ekonomiska cykler**

Förluster på grund av prisfall kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

### **Psykologiska marknadsrisker**

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om priset på Underliggande eller på dess Referensinstrument påverkas av en sådan effekt, i motsats till investerarens marknadsförväntningar, kan investeraren lida en förlust.

### **Risker relaterade till handel med Värdepapperen, likviditetsrisk**

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

### **Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner**

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

### **Risk relaterad till beskattningen av Värdepapperen**

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

### **Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobel-koncernen**

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

### **Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling**

Emittenten kan göra justeringar för att ta hänsyn till relevanta ändringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

### **Risk i samband med potentiella intressekonflikter**

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

### **Informationsrisk**

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

### **Valutarisk**

Om Avräkningsvalutan för Värdepapperen inte är densamma som valutan där investeraren är bosatt eller valutan där investeraren vill erhålla betalning, är möjliga investerare utsatta för valutarisk.

### **Ränterisk**

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan ha en negativ inverkan på värdet av Värdepapperen.

### **Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen**

Om Underliggandes värde **faller**, innebär Mini-Futures av typen Long en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller faller under Strike.

### **Risk för tidig återbetalning på grund av en Barriärhändelse**

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

**Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.**

### **Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären**

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

|  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  | <p><b>Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden</b></p> <p>Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löp-tiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.</p> <p><b>Risk för totalförlust</b></p> <p>Värdepapperen är <b>särskilt riskabla investeringsinstrument</b>, som kombinerar egen-skaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värde-papperen är därför förknippade med oproportionerliga förlustrisker (risk för total-förlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar-och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantgivarens finansiella ställning.</p> <p><b>Det finns ingen bestämmelse om regelbunden distribution, räntebetalning eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapi-tal, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.</b></p> |

| <b>E.4</b>             | Relevanta intressen för emissionen/erbjudandet (inklusive intressekonflikter) | <p>Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepappe-rens värde.</p> <p><u>Handelstransaktioner som rör Referensinstrument</u></p> <p>Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen in-begrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobel-koncernen kan även bli motparter i säkringstransaktioner som rör Emittentens för-pliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde.</p> <p><u>Övriga funktioner som företagen i Vontobelkoncernen kan utföra</u></p> <p>Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktio-ner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underlig-gande eller att beräkna dess värde. Dessa funktioner kan även medföra intresse-konflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande.</p> <p><u>Verksamhet som Market Maker för Värdepapperen</u></p> <p>Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("Market Maker"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer.</p> |

|            |                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------|----------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                                                                  | <p>Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäligen värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepreis.</p> <p><u>Betalning av provision, tredje parter eget intresse</u></p> <p>I samband med placering och/eller offentligt erbjudande av Värdepapperen kan Emittenten eller de övriga företagen i Vontobelkoncernen betala provision till tredje parter. Det är möjligt att dessa tredje parter kan tillgodose sina egna intressen i samband med att de fattar ett investeringsbeslut eller investeringsrekommendation.</p> |
| <b>E.7</b> | Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren | <p>– inte tillämpligt –</p> <p>Investeraren kan köpa Värdepapper till emissionspris eller till försäljningspris som anges av Market Maker under Värdepapperens löptid. Priserna innefattar alla Emittentens, Anbudsgivarens och Market Makers för emissionen och distributionen av Värdepapperen (t.ex. försäljnings- och distributionskostnader, struktureringskostnader och säkringskostnader, inklusive vinstmarginal).</p> <p>Förutom Emissionspris eller inköpspris kommer Emittenten och Anbudsgivaren inte att debitera investeraren för några ytterligare kostnader.</p> <p>Uppgifter om eventuella transaktionskostnader bör begäras av vederbörande försäljare eller av investerarens egen bank eller mäklare.</p>                                                                                                                      |

(the "**Offeror**")

---

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 31 August 2017. It should be noted that only the Base Prospectus (including any supplements) dated 31 August 2017 and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (<https://certificates.vontobel.com>) whereby the Final Terms are accessible by entry of the respective ISIN on the page <https://certificates.vontobel.com> and the Base Prospectus and any supplements thereto are directly accessible on the page <https://certificates.vontobel.com> under the section <<Legal Documents>>. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 31 August 2017 is valid up to 5 September 2018. After this date, the Public Offer of Securities will be continued on the basis of one or more subsequent base prospectuses (each a "**Subsequent Base Prospectus**"), if such Subsequent Base Prospectus includes the continuation of the Public Offer of the Securities. In this case these Final Terms must be read in connection with the respective current Subsequent Base Prospectus and all references in these Final Terms shall be references to the respective current Subsequent Base Prospectus. Each Subsequent Base Prospectus will be published on the website <https://certificates.vontobel.com> under the section 'Legal Documents' on the last day of the validity of the respective current base prospectus at the latest.

These Final Terms were prepared for the purposes of the Public Offer of the Securities. The issue of the Securities is a new issue.

| Adjustment Date                  | shall be every day from Monday to Friday commencing from the Issue Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Current Strike                   | The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Adjustment of the Current Strike | <p>The Current Strike shall be adjusted using the following formula:</p> $FL_n = FL_a + \frac{(r + FS) \cdot FL_a \cdot n}{360}$ <p>where:</p> <p><b>FL<sub>n</sub></b>: Strike following the adjustment = Current Strike.</p> <p><b>FL<sub>a</sub></b>: Strike before the adjustment.</p> <p><b>r</b>: reference interest rate: the current money market rate of interest for overnight deposits in the Strike Currency (Currency of the Underlying) determined by the Calculation Agent, less the current money market rate of interest for overnight deposits in the Base Currency (as specified above) determined by the Calculation Agent:</p> $r = r_{\text{Strike Currency}} - r_{\text{Base Currency}}$ <p><b>FS</b>: Current Financing Spread. The "<b>Current Financing Spread</b>" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Fi-nancing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.</p> <p><b>n</b>: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).</p> <p>The result of the calculation shall be rounded upwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.0001.</p> |
| Financing Spread                 | The Financing Spread on the Issue Date shall amount to 4.00%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Minimum Exercise Number                     | 1 Security                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Reference Price                             | The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows:<br>Reference Price shall mean the exchange rate determined by the Reference Agent at the Valuation Time on the Valuation Date and then published on the Reference Page.                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Stop-Loss Reference Price                   | shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows:<br><br>The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) under consideration of the bid and ask prices shown on the respective screen page of the business information service Bloomberg as the price of the Underlying within a period of one hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day. |
| Valuation Date                              | Valuation Date shall be<br>(a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions;<br>(b) in the event of ordinary termination by the Issuer, the ordinary termination date;<br>(c) in the event of an Barrier Event, the day on which the Barrier Event occurred.<br>If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.                    |
| Exchange Day                                | A day on which fixing for the Underlying usually occurs on the Reference Agent.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Right of Ordinary Termination of the Issuer | The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Termination Cut-Off Date                    | is one (1) Business Day before the relevant Termination Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| First Termination Date                      | 20 April 2018                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Termination Dates                           | Termination Date shall be each Business Day commencing from the First Termination Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## **3. Reimbursements, contributions, price surcharge**

There are no additional charges or commissions levied for the purchaser.

## **4. Publication of information after completion of the issue**

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information after the issue has been completed.

## APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

| Section A – Introduction and warnings |                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| C.8         | Description of the rights attached to the securities including ranking and limitations to those rights | <p><b>Redemption on exercise or termination</b></p> <p>The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15.</p> <p><b>Governing law</b></p> <p>The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law.</p> <p>The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law.</p> <p><b>Ranking of the Securities</b></p> <p>The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank pari passu in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements.</p> <p><b>Limitations to the rights</b></p> <p>In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).</p> <p>In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.</p> |       |              |      |        |        |          |             |                      |

| <b>C.15</b> | <p>Description of how the value of the investment is affected by the value of the underlying instrument</p> | <p>The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of another reference instrument (the "<b>Underlying</b>"). Investors are able to participate in the performance of an Underlying, without purchasing the relevant Underlying.</p> <p>Mini Futures of the Option Type "Long" are Securities which enable the Security Holder to participate in the rise of the Underlying on a leveraged basis.</p> <p><u>Cash Amount</u></p> <p>Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early.</p> <p>The occurrence of a Barrier Event depends on the performance of the Underlying.</p> <p>The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is higher than the Strike.</p> <p>In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is higher than the current Strike.</p> <p>The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula:</p> <p>Cash Amount = (Valuation Price – Current Strike) x Ratio.</p> <p>If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.</p> <p><u>Early redemption on the occurrence of a Barrier Event</u></p> <p>A "<b>Barrier Event</b>" occurs if the Observation Price touches or falls below the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or falls below the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. <b>The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly falling price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.</b></p> |

## Section D – Risks

|            |                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------|---------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>D.2</b> | Key information on the key risks relating to the Issuer and the Guarantor | <p><b>Insolvency risk of the Issuer</b></p> <p>The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.</p> <p>The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.</p> <p>For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly greater credit risk than in the case of an issuer with a higher level of capital resources.</p> <p>The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group. As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.</p> |

|            |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                                                                    | <p><b>Market risk of the Issuer</b></p> <p>A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).</p> <p><b>Insolvency risk of the Guarantor</b></p> <p>The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.</p> <p>The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.</p> <p><b>Risks associated with potential reorganization and settlement procedures</b></p> <p>German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Bank Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).</p> <p>In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.</p> <p><b>Business risks relating to the Guarantor</b></p> <p>The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have a negative impact on the valuation of the underlyings and/or derivative financial products.</p> <p>The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.</p> |
| D.3<br>D.6 | Key information on the key risks relating to the securities/<br>Risk of total loss | <p><b>Risk of loss due to dependence on the performance of the Underlying</b></p> <p>The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss.</p> <p>In the case of Securities of the <i>Long</i> Type, a <b>fall</b> in the rate, price or level of the Underlying is to the disadvantage of the investor.</p> <p>The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.</p> <p><b>Leverage effect</b></p> <p>Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**Dependence of redemption on the occurrence or non-occurrence of a Barrier Event**

If a Barrier Event occurs as a result of the price of the Underlying reaching or falling below a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

**Risk of ordinary termination and early redemption by the Issuer**

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

**Market price risks**

The price of a Security depends primarily on the price of the respective Underlying to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole).

**Option risks with respect to the Securities**

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

**Correlation risks**

Correlation denotes the extent to which it was possible to establish a specific dependence between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

**Volatility risk**

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

**Risks relating to historical performance**

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

**Transactions designed to exclude or limit risk**

Investors may not be able to hedge adequately against the risks associated with the Securities.

**Inflation risk**

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

**Risks due to the economic cycle**

Losses from a fall in prices may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

**Psychological market risk**

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If, through such effect, the price of the Underlying or of its Reference Instrument is affected to the contrary of the market expectations of the investor, the investor may suffer a loss.

**Risks relating to trading in the Securities, liquidity risk**

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Thus, potential investors must not assume that it will be possible to sell the Securities during their term and must in any case be prepared to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

**Risks relating to the price determination of the Securities and the effect of transaction costs and commissions**

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

**Risk relating to the taxation of the Securities**

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

**Risks relating to the effect of hedging transactions by companies of the Vontobel Group**

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

### **Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement**

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective Underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' redemption rights cease to exist and there is the risk that the extraordinary termination amount may be zero (0). In the least favourable case, a total loss of the capital invested may occur.

### **Risks with respect to potential conflicts of interest**

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

### **Information risk**

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

### **Currency risk**

Potential investors should be aware that an investment in the Securities is associated with exchange rate risks since the rate of exchange between the currency of the Underlying and the Settlement Currency of the Securities may move in a direction that is to their disadvantage.

If the Settlement Currency of the Securities is different from the domestic currency of the investor or the currency in which an investor wishes to receive payments, potential investors bear exchange rate risks.

### **Interest rate risk**

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have a negative impact on the value of the Securities.

### **Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder**

If the value of the Underlying **falls**, Mini Futures of the Long type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or falls below the Strike.

### **Risk of early repayment due to a Barrier Event**

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

**Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.**

|  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  | <p><b>Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier</b></p> <p>As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.</p> <p><b>Risk of early repayment due to ordinary termination</b></p> <p>The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.</p> <p><b>Risk of total loss</b></p> <p>The Securities are <b>particularly risky investment instruments</b>, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.</p> <p><b>There is no provision for regular distributions, payments of interest or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.</b></p> |

| Section E – Offer |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-------------------|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>E.2b</b>       | Reasons for the offer and use of proceeds                                         | The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and / or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>E.3</b>        | Description of the terms and conditions of the offer                              | <p>Issue Price: SEK 2.13</p> <p>Issue Date: 20 April 2018</p> <p>Value Date: 20 April 2018</p> <p>Offer Size: 100,000 Securities</p> <p>Minimum Trading Lot: 1 Security</p> <p>Public Offer: in Sweden 18 April 2018<br/>starting from:</p> <p>The Issue Price of the Securities was determined by the Market Maker.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>E.4</b>        | Interests that are material to the issue/ offer (including conflicts of interest) | <p>Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.</p> <p><u>Trading transactions relating to the Reference Instrument</u></p> <p>During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the Reference Instrument. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the value of the Reference Instrument and thus have a negative impact on the Underlying and the value of the Securities.</p> |

|-----|-------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     |                                                                         | <p><u>Exercise of other functions by companies of the Vontobel Group</u></p> <p>The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations.</p> <p><u>Activity as Market Maker for the Securities</u></p> <p>Bank Vontobel Europe AG will act as market maker (the "<b>Market Maker</b>") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors.</p> <p>As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.</p> <p><u>Payment of commissions, own interests of third parties</u></p> <p>In connection with the placing and/or the Public Offer of the Securities, the Issuer or other companies of the Vontobel Group may pay commissions to third parties. It is possible that these third parties may pursue their own interests in the course of making an investment decision or investment recommendation.</p> |
| E.7 | Estimated expenses charged to the investor by the Issuer or the Offeror | <p>– not applicable –</p> <p>The investor may purchase the Securities at the Issue Price or at the selling prices quoted by the Market Maker during the term of the Securities. These prices include all costs incurred by the Issuer, Offeror and Market Maker for the issue and distribution of the Securities (e.g. sales and distribution costs, structuring and hedging costs, including a profit margin).</p> <p>No further expenses will be charged to the investor by the Issuer or the Offeror beyond the Issue Price or the purchase price.</p> <p>Details of any transaction costs should be requested from the relevant sales partner or from the investor's house bank or broker.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

| Avsnitt A – Inledning och varningar |                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <p><sup>1)</sup> Banken för internationell betalningsutjämning (Bank for International Settlements - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.</p> <p><sup>2)</sup> För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).</p> <p><sup>3)</sup> Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).</p> <p><sup>4)</sup> Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för finansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.</p> <p>Den följande utvalda finansiella informationen har hämtats från den oreviderade delårsrapporten över finansiell information för perioden som avslutades den 30 juni 2017, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).</p> |                                                                                         |                                                                                         |

| C.15 | Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde | <p>Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("<b>Underliggande</b>"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande.</p> <p>Mini Futures av Optionstypen "Long" är Värdepapper som gör att investeraren kan delta i en ökning av Underliggande med hävstångseffekt.</p> <p><u>Kontantbelopp</u></p> <p>Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid.</p> <p>Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling.</p> <p>Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är högre än <i>Strike</i>.</p> <p>Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produkttegenskaper, inklusive bland annat <i>Strike</i> komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell <i>Strike</i> som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är högre än aktuell <i>Strike</i>.</p> <p>Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel:</p> <p>Kontantbelopp = (Värderingspris - aktuell <i>Strike</i>) x Grad.</p> |

Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "**Barriärhändelse**" äger rum om Observationspriset är lika med eller faller under Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observations-priset är lika med eller faller under den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt sjunkandepris** på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt ökar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför ökar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, eftersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

| <b>D.2</b>         | Central information om de centrala risker som är specifika för Emittenten och Garantigivaren | <p><b>Insolvensrisk för Emittenten</b></p> <p>Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Underliggandes utveckling.</p> |

|                          |                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|--------------------------|--------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                                                                                                        | <p>Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent.</p> <p>Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.</p> <p>Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen. På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.</p> <p><b>Emittentens marknadsrisk</b></p> <p>Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).</p> <p><b>Garantigivarens insolvensrisk</b></p> <p>Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.</p> <p>Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.</p> <p><b>Risker hänförliga till potentiell omorganisation och betalnings-procedurer</b></p> <p>Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Bank Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).</p> <p>I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.</p> <p><b>Verksamhetsrisker som rör Garantigivaren</b></p> <p>Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.</p> <p>Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.</p> |
| <b>D.3</b><br><b>D.6</b> | Central information om de centrala risker som är specifika för Värdepapperen/<br>Risk för totalförlust | <p><b>Risk för förlust på grund av beroende av Underliggandes utveckling</b></p> <p>Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade "Underliggande". Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust.</p> <p>I fråga om Värdepapper av typen <i>Long</i> är Underliggandes kurs-, pris- eller nivåfall ogynnsam för investeraren.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

#### **Hävstångseffekt**

Endast en liten kapitalmängd behöver användas, jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

#### **Inlösen är beroende av om Barriärhändelse äger rum eller inte**

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller faller under en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfalldag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

#### **Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid**

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

#### **Marknadsprisrisk**

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling).

#### **Optionsrisker relaterade till Värdepapperen**

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

#### **Korrelationsrisker**

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

#### **Volatilitetsrisk**

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

#### **Risker relaterade till historisk utveckling**

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

#### **Transaktioner som är tänkta att exkludera eller begränsa risk**

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

#### **Inflationsrisk**

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

#### **Risker på grund av ekonomiska cykler**

Förluster på grund av prisfall kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

#### **Psykologiska marknadsrisker**

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om priset på Underliggande eller på dess Referensinstrument påverkas av en sådan effekt, i motsats till investerarens marknadsförväntningar, kan investeraren lida en förlust.

#### **Risker relaterade till handel med Värdepapperen, likviditetsrisk**

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

#### **Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner**

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

#### **Risk relaterad till beskattningen av Värdepapperen**

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

### **Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobel-koncernen**

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

### **Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling**

Emittenten kan göra justeringar för att ta hänsyn till relevanta ändringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

### **Risk i samband med potentiella intressekonflikter**

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

### **Informationsrisk**

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

### **Valutarisk**

Möjliga investerare bör vara medvetna om att investeringar i Värdepapper medför valutakursrisker eftersom växlingskursen för Underliggandes Valuta och Värdepapperens Avräkningsvaluta kan röra sig i en riktning som är ogynnsam för investeraren.

Om Avräkningsvalutan för Värdepapperen inte är densamma som valutan där investeraren är bosatt eller valutan där investeraren vill erhålla betalning, är möjliga investerare utsatta för valutarisk.

### **Ränterisk**

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan ha en negativ inverkan på värdet av Värdepapperen.

### **Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen**

Om Underliggandes värde **faller**, innebär Mini-Futures av typen Long en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller faller under Strike.

### **Risk för tidig återbetalning på grund av en Barriärhändelse**

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("Referenspriset för Stop-Loss") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

|  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  | <p><b>Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.</b></p> <p><b>Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären</b><br/> Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.</p> <p><b>Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden</b><br/> Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.</p> <p><b>Risk för totalförlust</b><br/> Värdepapperen är <b>särskilt riskabla investeringsinstrument</b>, som kombinerar egenskaper som återfinns i både derivatransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantgivarens finansiella ställning.</p> <p><b>Det finns ingen bestämmelse om regelbunden distribution, räntebetalning eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.</b></p> |

Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde.</p> |

|     |                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-----|----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     |                                                                                  | <p><u>Övriga funktioner som företagen i Vontobelkoncernen kan utföra</u></p> <p>Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräkningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vontobelkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande.</p> <p><u>Verksamhet som Market Maker för Värdepapperen</u></p> <p>Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("<b>Market Maker</b>"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer.</p> <p>Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäligen värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepreis.</p> <p><u>Betalning av provision, tredje parter eget intresse</u></p> <p>I samband med placering och/eller offentligt erbjudande av Värdepapperen kan Emittenten eller de övriga företagen i Vontobelkoncernen betala provision till tredje parter. Det är möjligt att dessa tredje parter kan tillgodose sina egna intressen i samband med att de fattar ett investeringsbeslut eller investeringsrekommendation.</p> |
| E.7 | Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren | <p>– inte tillämpligt –</p> <p>Investeraren kan köpa Värdepapper till emissionspris eller till försäljningspris som anges av Market Maker under Värdepapperens löptid. Priserna innefattar alla Emittentens, Anbudsgivarens och Market Makers för emissionen och distributionen av Värdepapperen (t.ex. försäljnings- och distributionskostnader, struktureringskostnader och säkringskostnader, inklusive vinstmarginal).</p> <p>Förutom Emissionspris eller inköpspris kommer Emittenten och Anbudsgivaren inte att debitera investeraren för några ytterligare kostnader.</p> <p>Uppgifter om eventuella transaktionskostnader bör begäras av vederbörande försäljare eller av investerarens egen bank eller mäklare.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

**Final Terms**  
**dated 18 April 2018**  
for  
**Mini Futures**  
**(MINILONG SEBA VT82)**  
linked to  
**Skandinaviska Enskilda Banken AB**  
**ISIN DE000VS0TD31**  
(the "**Securities**")

**Vontobel Financial Products GmbH**

Frankfurt am Main, Germany  
(the "**Issuer**")

**Vontobel Holding AG**

Zurich, Switzerland  
(the "**Guarantor**")

**Bank Vontobel Europe AG**

Munich, Germany  
(the "**Offeror**")

---

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 31 August 2017. It should be noted that only the Base Prospectus (including any supplements) dated 31 August 2017 and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (<https://certificates.vontobel.com>) whereby the Final Terms are accessible by entry of the respective ISIN on the page <https://certificates.vontobel.com> and the Base Prospectus and any supplements thereto are directly accessible on the page <https://certificates.vontobel.com> under the section <<Legal Documents>>. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 31 August 2017 is valid up to 5 September 2018. After this date, the Public Offer of Securities will be continued on the basis of one or more subsequent base prospectuses (each a "**Subsequent Base Prospectus**"), if such Subsequent Base Prospectus includes the continuation of the Public Offer of the Securities. In this case these Final Terms must be read in connection with the respective current Subsequent Base Prospectus and all references in these Final Terms shall be references to the respective current Subsequent Base Prospectus. Each Subsequent Base Prospectus will be published on the website <https://certificates.vontobel.com> under the section 'Legal Documents' on the last day of the validity of the respective current base prospectus at the latest.

These Final Terms were prepared for the purposes of the Public Offer of the Securities. The issue of the Securities is a new issue.

| Current Strike                   | The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Adjustment of the Current Strike | <p>The Current Strike shall be adjusted using the following formula:</p> $FL_n = FL_a + \frac{(r + FS) \cdot FL_a \cdot n}{360} - DivF \cdot Div$ <p>where:</p> <p><b>FL<sub>n</sub></b>: Strike following the adjustment = Current Strike.</p> <p><b>FL<sub>a</sub></b>: Strike before the adjustment.</p> <p><b>r</b>: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.</p> <p><b>FS</b>: Current Financing Spread. The "<b>Current Financing Spread</b>" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Fi-nancing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.</p> <p><b>n</b>: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).</p> <p><b>DivF</b>: Dividend Factor. Means a value between 0 and 1, calculated by the Calculation Agent in its reasonable discretion (<i>for Securities governed by German law in accordance with sections 315, 317 BGB</i>) based on the taxes or charges payable by the Calculation Agent or companies affiliated with it on the dividends or cash distributions equivalent to dividends distributed on that day on the relevant share or one or several of the shares comprised in the index.</p> <p><b>Div</b>: Dividend Effect. Means an amount, calculated by the Calculation Agent in its reasonable discretion (<i>in accordance with sections 315, 317 BGB</i>) based on the dividends or cash distributions equivalent to dividends distributed on an Ex-Dividend Date on the relevant share. "<b>Ex-Dividend Date</b>" is a day on which shares of the relevant company for which dividends or cash amounts equivalent to dividends are to be distributed are traded "ex dividend" on their relevant primary exchange.</p> |

| Maximum Stop-Loss Buffer          | 15.00%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Current Stop-Loss Barrier         | <p>on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date.</p> <p>The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded up to the nearest multiple of the rounding of the Stop-Loss Barrier:</p> $StL = FL_n \cdot (100 \% + StLP)$ <p><b>StL:</b> Current Stop-Loss Barrier.<br/> <b>FL<sub>n</sub>:</b> Strike following the adjustment = Current Strike.<br/> <b>StLP:</b> Current Stop-Loss Buffer.</p> <p>The rounding of the Stop-Loss Barrier shall be 0.01.</p>                                                |
| Stop-Loss Barrier Adjustment Date | shall be the first Adjustment Date of each month and every day on which the Underlying is traded ex – i.e. without – dividend or other distributions on the Underlying (<<Ex-Dividend Date>> of the Underlying). In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.                                                                                                                                                                                                                                                                                                                                                      |

|                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Current Stop-Loss Buffer                    | The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Observation Period                          | The Observation Period shall be every day from 20 April 2018 (inclusive).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Observation Price                           | shall mean the price of the Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or falls below the Current Stop-Loss Barrier, each determination of the price of the Underlying by the Reference Agent during the Observation Period shall be relevant.                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Type of Exercise                            | American Exercise Type                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Exercise Time                               | is 11:00 a.m. (Stockholm time)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Exercise Date                               | shall mean each Business Day commencing as of the First Exercise Date (including).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| First Exercise Date                         | 20 April 2018                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Minimum Exercise Number                     | 1 Security                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Reference Price                             | The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows:<br>Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Stop-Loss Reference Price                   | shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows:<br><br>The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Underlying within a period of one (1) hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.                                                |
| Valuation Date                              | Valuation Date shall be<br>(a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions;<br>(b) in the event of ordinary termination by the Issuer, the ordinary termination date;<br>(c) in the event of an Barrier Event, the day on which the Barrier Event occurred.<br>If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day. |
| Exchange Day                                | A day on which trading in the Underlying takes place on the Reference Agent.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Right of Ordinary Termination of the Issuer | The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Termination Cut-Off Date                    | is one (1) Business Day before the relevant Termination Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## **3. Reimbursements, contributions, price surcharge**

There are no additional charges or commissions levied for the purchaser.

## **4. Publication of information after completion of the issue**

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information after the issue has been completed.

## APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

| Section A – Introduction and warnings |                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| C.8         | Description of the rights attached to the securities including ranking and limitations to those rights | <p><b>Redemption on exercise or termination</b></p> <p>The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15.</p> <p><b>Governing law</b></p> <p>The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law.</p> <p>The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law.</p> <p><b>Ranking of the Securities</b></p> <p>The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank pari passu in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements.</p> <p><b>Limitations to the rights</b></p> <p>In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).</p> <p>In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.</p> |       |              |      |        |        |          |             |                    |

| <b>C.15</b> | <p>Description of how the value of the investment is affected by the value of the underlying instrument</p> | <p>The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of another reference instrument (the "<b>Underlying</b>"). Investors are able to participate in the performance of an Underlying, without purchasing the relevant Underlying.</p> <p>Mini Futures of the Option Type "Long" are Securities which enable the Security Holder to participate in the rise of the Underlying on a leveraged basis.</p> <p><u>Cash Amount</u></p> <p>Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early.</p> <p>The occurrence of a Barrier Event depends on the performance of the Underlying.</p> <p>The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is higher than the Strike.</p> <p>In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is higher than the current Strike.</p> <p>The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula:</p> <p>Cash Amount = (Valuation Price – Current Strike) x Ratio.</p> <p>If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.</p> <p><u>Early redemption on the occurrence of a Barrier Event</u></p> <p>A "<b>Barrier Event</b>" occurs if the Observation Price touches or falls below the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or falls below the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. <b>The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly falling price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.</b></p> |

|             |                                                                                    | <p>If the Cash Amount that has been determined is not positive or if the Securities expire worthless immediately following a Barrier Event (see C.15), the Issuer will arrange for the Securities to be de-registered for no value, which represents a total loss for the Security Holder in economic terms.</p>                                                                                                                                                                                                                                                                                                                                                                            |
| <b>C.19</b> | Exercise price/ final reference price of the underlying                            | <p>The level of the Cash Amount depends on the Valuation Price of the Underlying. If a Barrier Event (see C.15) occurs, the Valuation Price is the Stop-Loss Reference Price; if a Barrier Event has not occurred, the Reference Price of the Underlying on the Valuation Date serves as the Valuation Price.</p> <p>The Stop-Loss Reference Price is an amount determined by the Calculation Agent in its reasonable discretion as the price of the Underlying within a period of one hour following the occurrence of the Barrier Event.</p> <p>Reference Price shall mean the closing price of the Underlying determined and published by the Reference Agent on the Valuation Date.</p> |

| Section D – Risks |                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------|---------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>D.2</b>        | Key information on the key risks relating to the Issuer and the Guarantor | <p><b>Insolvency risk of the Issuer</b></p> <p>The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.</p> <p>The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.</p> <p>For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly greater credit risk than in the case of an issuer with a higher level of capital resources.</p> <p>The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group. As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.</p> <p><b>Market risk of the Issuer</b></p> <p>A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).</p> |

|            |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                                                                    | <p><b>Insolvency risk of the Guarantor</b></p> <p>The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.</p> <p>The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.</p> <p><b>Risks associated with potential reorganization and settlement procedures</b></p> <p>German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Bank Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).</p> <p>In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.</p> <p><b>Business risks relating to the Guarantor</b></p> <p>The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have a negative impact on the valuation of the underlyings and/or derivative financial products.</p> <p>The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.</p> |
| D.3<br>D.6 | Key information on the key risks relating to the securities/<br>Risk of total loss | <p><b>Risk of loss due to dependence on the performance of the Underlying</b></p> <p>The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss.</p> <p>In the case of Securities of the <i>Long</i> Type, a <b>fall</b> in the rate, price or level of the Underlying is to the disadvantage of the investor.</p> <p>The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.</p> <p><b>Leverage effect</b></p> <p>Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.</p> <p><b>Dependence of redemption on the occurrence or non-occurrence of a Barrier Event</b></p> <p>If a Barrier Event occurs as a result of the price of the Underlying reaching or falling below a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..</p>                                                                                                                                                                                                                                                                                                                                                                                 |

**Risk of ordinary termination and early redemption by the Issuer**

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

**Market price risks**

The price of a Security depends primarily on the price of the respective Underlying to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole).

**Option risks with respect to the Securities**

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

**Correlation risks**

Correlation denotes the extent to which it was possible to establish a specific dependence between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

**Volatility risk**

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

**Risks relating to historical performance**

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

**Transactions designed to exclude or limit risk**

Investors may not be able to hedge adequately against the risks associated with the Securities.

**Inflation risk**

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

**Risks due to the economic cycle**

Losses from a fall in prices may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

**Psychological market risk**

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If, through such effect, the price of the Underlying or of its Reference Instrument is affected to the contrary of the market expectations of the investor, the investor may suffer a loss.

**Risks relating to trading in the Securities, liquidity risk**

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Thus, potential investors must not assume that it will be possible to sell the Securities during their term and must in any case be prepared to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

**Risks relating to the price determination of the Securities and the effect of transaction costs and commissions**

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

**Risk relating to the taxation of the Securities**

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

**Risks relating to the effect of hedging transactions by companies of the Vontobel Group**

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

**Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement**

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective Underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' redemption rights cease to exist and there is the risk that the extraordinary termination amount may be zero (0). In the least favourable case, a total loss of the capital invested may occur.

**Risks with respect to potential conflicts of interest**

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

**Information risk**

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

**Currency risk**

If the Settlement Currency of the Securities is different from the domestic currency of the investor or the currency in which an investor wishes to receive payments, potential investors bear exchange rate risks.

**Interest rate risk**

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have a negative impact on the value of the Securities.

**Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder**

If the value of the Underlying **falls**, Mini Futures of the Long type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or falls below the Strike.

**Risk of early repayment due to a Barrier Event**

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

**Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.**

**Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier**

As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.

**Risk of early repayment due to ordinary termination**

The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.

|  |  | <p><b>Risk of total loss</b></p> <p>The Securities are <b>particularly risky investment instruments</b>, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.</p> <p><b>There is no provision for regular distributions</b>, payments of interest <b>or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.</b></p> |

| E.2b              | Reasons for the offer and use of proceeds                                         | The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and / or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| E.4               | Interests that are material to the issue/ offer (including conflicts of interest) | <p>Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.</p> <p><u>Trading transactions relating to the Reference Instrument</u></p> <p>During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the Reference Instrument. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the value of the Reference Instrument and thus have a negative impact on the Underlying and the value of the Securities.</p> <p><u>Exercise of other functions by companies of the Vontobel Group</u></p> <p>The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations.</p> <p><u>Activity as Market Maker for the Securities</u></p> <p>Bank Vontobel Europe AG will act as market maker (the "<b>Market Maker</b>") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors.</p> <p>As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.</p> |

|            |                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|            |                                                                         | <p><u>Payment of commissions, own interests of third parties</u></p> <p>In connection with the placing and/or the Public Offer of the Securities, the Issuer or other companies of the Vontobel Group may pay commissions to third parties. It is possible that these third parties may pursue their own interests in the course of making an investment decision or investment recommendation.</p>                                                                                                                                                                                                                                                                                                |
| <b>E.7</b> | Estimated expenses charged to the investor by the Issuer or the Offeror | <p>– not applicable –</p> <p>The investor may purchase the Securities at the Issue Price or at the selling prices quoted by the Market Maker during the term of the Securities. These prices include all costs incurred by the Issuer, Offeror and Market Maker for the issue and distribution of the Securities (e.g. sales and distribution costs, structuring and hedging costs, including a profit margin).</p> <p>No further expenses will be charged to the investor by the Issuer or the Offeror beyond the Issue Price or the purchase price.</p> <p>Details of any transaction costs should be requested from the relevant sales partner or from the investor's house bank or broker.</p> |

## BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

| Avsnitt A – Inledning och varningar |                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|             |                                                                                           | <p><b>Rangordning av Värdepapperen</b></p> <p>De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten och rangordnas pari passu i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav.</p> <p><b>Begränsningar av rättigheterna</b></p> <p>Enligt de Allmänna Villkoren kan Emittenten göra justeringar vid förekomsten av definierade händelser för att ta hänsyn till relevanta förändringar eller händelser som är knutna till ifrågavarande Underliggande (enligt definitionen i Element C.20 nedan) eller kan extraordinärt avsluta Värdepapperens löptid. I händelse av extraordinär uppsägning upphör alla investerares rättigheter som beskrivits ovan och det finns risk att det extraordinära slutbeloppet kan bli noll (0).</p> <p>I händelse av marknadsstörningar är det möjligt att värderingen av Värdepapperen i relation till Underliggande kan försenas och detta kan inverka på Värdepapperens värde och/eller försena betalningen av Kontantbeloppet. I sådana fall kan Emittenten efter sitt eget rimliga gottfinnande fastställa en kurs eller nivå eller ett pris för Underliggande som är relevant för värderingen av Värdepapperen.</p> <p>Emittenten har rätt att ordinärt avsluta alla Värdepappers löptid genom att betala det ordinära slutbeloppet (som beräknas på samma sätt som Kontantbeloppet) och att avsluta Värdepapperens giltighet.</p>                                                                                                                                                                                                                                                                                                                  |
| <b>C.11</b> | Upptagande till handel på en reglerad marknad eller övriga, motsvarande marknader         | <p>– ej tillämpligt –</p> <p>Ingen avsikt föreligger att uppta Värdepapperen till handel på en reglerad marknad eller övriga, motsvarande marknader.</p> <p>Ansökan kommer att göras för att Värdepapperen bara ska inkluderas i den reglerade icke officiella marknaden på följande börser:</p> <p><u>Börsen:</u> <u>Marknadssegment:</u><br/> Nordic Growth Market      Nordic MTF Sweden</p> <p>Datumet då det förväntas att Värdepapperen kommer att inkluderas i handel är 20 april 2018.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>C.15</b> | Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde | <p>Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("<b>Underliggande</b>"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande.</p> <p>Mini Futures av Optionstypen "Long" är Värdepapper som gör att investeraren kan delta i en ökning av Underliggande med hävstångseffekt.</p> <p><u>Kontantbelopp</u></p> <p>Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid.</p> <p>Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling.</p> <p>Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är högre än <i>Strike</i>.</p> <p>Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produkttegenskaper, inklusive bland annat <i>Strike</i> komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell <i>Strike</i> som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är högre än aktuell <i>Strike</i>.</p> <p>Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel:</p> <p>Kontantbelopp = (Värderingspris - aktuell <i>Strike</i>) x Grad.</p> |

|                             |                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                |         |                |                                                                                                                          |       |   |                 |           |                 |                       |                 |                                                                         |         |                       |                |                                                                                                                                                                                                                                  |                             |           |                   |                                                                         |                     |                                                         |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------|----------------|--------------------------------------------------------------------------------------------------------------------------|-------|---|-----------------|-----------|-----------------|-----------------------|-----------------|-------------------------------------------------------------------------|---------|-----------------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|-----------|-------------------|-------------------------------------------------------------------------|---------------------|---------------------------------------------------------|
|                             |                                                                                                                                                                                                                                  | <p>Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.</p> <p><u>Tidig inlösen om Barriärhändelse inträffar</u></p> <p>En "<b>Barriärhändelse</b>" äger rum om Observationspriset är lika med eller faller under Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observations-priset är lika med eller faller under den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. <b>Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt sjunkandepris</b> på Underliggande, kan uppgå till noll (0). Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.</p> <p><u>Reguljära justeringar av Strike och Stop-Loss-Barriär</u></p> <p>Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt ökar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför ökar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, eftersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.</p> <table><tr><td>Optionstyp:</td><td>Long</td></tr><tr><td>Underliggande:</td><td>Skandinaviska Enskilda Banken AB<br/>(mer information finns i C.20)</td></tr><tr><td>Grad:</td><td>1</td></tr><tr><td>Initial Strike:</td><td>SEK 79,25</td></tr><tr><td>Typ av Inlösen:</td><td>Amerikansk inlösentyp</td></tr><tr><td>Inlösendag(ar):</td><td>varje Bankdag som påbörjas från och med 20 april 2018 (inklusive denna)</td></tr><tr><td>Löptid:</td><td>obegränsad (open-end)</td></tr><tr><td>Värderingsdag:</td><td>(a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas;<br/>(b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum;<br/>(c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar.</td></tr><tr><td>Intitial Stop Loss-Barriär:</td><td>SEK 83,21</td></tr><tr><td>Observationspris:</td><td>priset på Underliggande fastställs och offentliggörs av Referensagenten</td></tr><tr><td>Observation Period:</td><td>varje dag från och med 20 april 2018 (inklusive denna).</td></tr></table> <p>Se även den emissionsspecifika informationen under C.16.</p> | Optionstyp:    | Long    | Underliggande: | Skandinaviska Enskilda Banken AB<br>(mer information finns i C.20)                                                       | Grad: | 1 | Initial Strike: | SEK 79,25 | Typ av Inlösen: | Amerikansk inlösentyp | Inlösendag(ar): | varje Bankdag som påbörjas från och med 20 april 2018 (inklusive denna) | Löptid: | obegränsad (open-end) | Värderingsdag: | (a) i händelse av Inlösen, Inlösendag då rätten till inlösen utövas;<br>(b) i händelse av ordinarie avslut av Emittenten, vid ordinarie slutdatum;<br>(c) i fallet av en Barriärhändelse, den dag då Barriärhändelsen inträffar. | Intitial Stop Loss-Barriär: | SEK 83,21 | Observationspris: | priset på Underliggande fastställs och offentliggörs av Referensagenten | Observation Period: | varje dag från och med 20 april 2018 (inklusive denna). |

| <b>D.2</b>         | Central information om de centrala risker som är specifika för Emittenten och Garantigivaren | <p><b>Insolvensrisk för Emittenten</b></p> <p>Investerarerna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Underliggandes utveckling.</p> <p>Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent.</p> <p>Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.</p> |

|                                     |                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                     |                                                                                                                | <p>Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen. På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.</p> <p><b>Emittentens marknadsrisk</b></p> <p>Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågavarande länders ekonomiska och politiska ramar (så kallad marknadsrisk).</p> <p><b>Garantigivarens insolvensrisk</b></p> <p>Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.</p> <p>Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.</p> <p><b>Risker hänförliga till potentiell omorganisation och betalnings-procedurer</b></p> <p>Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Bank Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).</p> <p>I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.</p> <p><b>Verksamhetsrisker som rör Garantigivaren</b></p> <p>Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.</p> <p>Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.</p> |
| <p><b>D.3</b></p> <p><b>D.6</b></p> | <p>Central information om de centrala risker som är specifika för Värdepapperen/<br/>Risk för totalförlust</p> | <p><b>Risk för förlust på grund av beroende av Underliggandes utveckling</b></p> <p>Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade "Underliggande". Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust.</p> <p>I fråga om Värdepapper av typen <i>Long</i> är Underliggandes kurs-, pris- eller nivåfall ogynnsam för investeraren.</p> <p>Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### **Hävstångseffekt**

Endast en liten kapitalmängd behöver användas, jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

### **Inlösen är beroende av om Barriärhändelse äger rum eller inte**

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller faller under en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

### **Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid**

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

### **Marknadsprisrisk**

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling).

### **Optionsrisker relaterade till Värdepapperen**

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

### **Korrelationsrisker**

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

### **Volatilitetsrisk**

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

### **Risker relaterade till historisk utveckling**

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

**Transaktioner som är tänkta att exkludera eller begränsa risk**

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

**Inflationsrisk**

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

**Risker på grund av ekonomiska cykler**

Förluster på grund av prisfall kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

**Psykologiska marknadsrisker**

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om priset på Underliggande eller på dess Referensinstrument påverkas av en sådan effekt, i motsats till investerarens marknadsförväntningar, kan investeraren lida en förlust.

**Risker relaterade till handel med Värdepapperen, likviditetsrisk**

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

**Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner**

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

**Risk relaterad till beskattningen av Värdepapperen**

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

**Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobelkoncernen**

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

### **Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling**

Emittenten kan göra justeringar för att ta hänsyn till relevanta ändringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

### **Risk i samband med potentiella intressekonflikter**

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

### **Informationsrisk**

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

### **Valutarisk**

Om Avräkningsvalutan för Värdepapperen inte är densamma som valutan där investeraren är bosatt eller valutan där investeraren vill erhålla betalning, är möjliga investerare utsatta för valutarisk.

### **Ränterisk**

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan ha en negativ inverkan på värdet av Värdepapperen.

### **Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen**

Om Underliggandes värde **faller**, innebär Mini-Futures av typen Long en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller faller under Strike.

### **Risk för tidig återbetalning på grund av en Barriärhändelse**

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("**Referenspriset för Stop-Loss**") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

**Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.**

### **Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären**

Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.

|  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  | <p><b>Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden</b></p> <p>Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löp-tiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.</p> <p><b>Risk för totalförlust</b></p> <p>Värdepapperen är <b>särskilt riskabla investeringsinstrument</b>, som kombinerar egen-skaper som återfinns i både derivattransaktioner och hävstångsprodukter. Värde-papperen är därför förknippade med oproportionerliga förlustrisker (risk för total-förlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar-och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantigivarens finansiella ställning.</p> <p><b>Det finns ingen bestämmelse om regelbunden distribution, räntebetalning eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapi-tal, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.</b></p> |

| <b>E.4</b>             | Relevanta intressen för emissionen/erbjudandet (inklusive intressekonflikter) | <p>Intressekonflikter kan förekomma mellan företagen i Vontobelkoncernen som kan ha en negativ inverkan på det Underliggandes värde och därmed på Värdepappe-rens värde.</p> <p><u>Handelstransaktioner som rör Referensinstrument</u></p> <p>Under Värdepapperens löptid är det möjligt att företagen i Vontobelkoncernen in-begrips i handelstransaktioner för egen eller för någon kunds räkning, vilket direkt eller indirekt kan ha samband med respektive Underliggande. Företagen i Vontobel-koncernen kan även bli motparter i säkringstransaktioner som rör Emittentens för-pliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde.</p> <p><u>Övriga funktioner som företagen i Vontobelkoncernen kan utföra</u></p> <p>Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktio-ner i samband med Värdepapperen, t.ex. som beräk-ningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vonto-belkoncernen att fastställa sammansättningen av Underlig-gande eller att beräkna dess värde. Dessa funktioner kan även medföra intresse-konflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande.</p> <p><u>Verksamhet som Market Maker för Värdepapperen</u></p> <p>Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("Market Maker"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer.</p> |

|            |                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|------------|----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                                                                  | <p>Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäliga värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepreis.</p> <p><u>Betalning av provision, tredje parter eget intresse</u></p> <p>I samband med placering och/eller offentligt erbjudande av Värdepapperen kan Emittenten eller de övriga företagen i Vontobelkoncernen betala provision till tredje parter. Det är möjligt att dessa tredje parter kan tillgodose sina egna intressen i samband med att de fattar ett investeringsbeslut eller investeringsrekommendation.</p> |
| <b>E.7</b> | Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren | <p>– inte tillämpligt –</p> <p>Investeraren kan köpa Värdepapper till emissionspris eller till försäljningspris som anges av Market Maker under Värdepapperens löptid. Priserna innefattar alla Emittentens, Anbudsgivarens och Market Makers för emissionen och distributionen av Värdepapperen (t.ex. försäljnings- och distributionskostnader, struktureringskostnader och säkringskostnader, inklusive vinstmarginal).</p> <p>Förutom Emissionspris eller inköpspris kommer Emittenten och Anbudsgivaren inte att debitera investeraren för några ytterligare kostnader.</p> <p>Uppgifter om eventuella transaktionskostnader bör begäras av vederbörande försäljare eller av investerarens egen bank eller mäklare.</p>                                                                                                                     |

(the "**Offeror**")

---

These Final Terms were prepared for the purposes of Article 5 (4) of Directive 2003/71/EC and should be read in conjunction with the Base Prospectus (including any supplements) dated 31 August 2017. It should be noted that only the Base Prospectus (including any supplements) dated 31 August 2017 and these Final Terms together contain all the information about the Issuer, the Guarantor and the Securities offered. The Base Prospectus, any supplements and these Final Terms are published on the Issuer's website (<https://certificates.vontobel.com>) whereby the Final Terms are accessible by entry of the respective ISIN on the page <https://certificates.vontobel.com> and the Base Prospectus and any supplements thereto are directly accessible on the page <https://certificates.vontobel.com> under the section <<Legal Documents>>. **A summary for the specific issue is appended to these Final Terms.**

The Base Prospectus dated 31 August 2017 is valid up to 5 September 2018. After this date, the Public Offer of Securities will be continued on the basis of one or more subsequent base prospectuses (each a "**Subsequent Base Prospectus**"), if such Subsequent Base Prospectus includes the continuation of the Public Offer of the Securities. In this case these Final Terms must be read in connection with the respective current Subsequent Base Prospectus and all references in these Final Terms shall be references to the respective current Subsequent Base Prospectus. Each Subsequent Base Prospectus will be published on the website <https://certificates.vontobel.com> under the section 'Legal Documents' on the last day of the validity of the respective current base prospectus at the latest.

These Final Terms were prepared for the purposes of the Public Offer of the Securities. The issue of the Securities is a new issue.

| Adjustment Date                  | shall be every day from Monday to Friday commencing from the Issue Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Current Strike                   | The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Adjustment of the Current Strike | <p>The Current Strike shall be adjusted using the following formula:</p> $FL_n = FL_a + \frac{(r - FS) \cdot FL_a \cdot n}{360}$ <p>where:</p> <p><b>FL<sub>n</sub></b>: Strike following the adjustment = Current Strike.</p> <p><b>FL<sub>a</sub></b>: Strike before the adjustment.</p> <p><b>r</b>: reference interest rate: the current money market rate of interest for overnight deposits in the Strike Currency (Currency of the Underlying) determined by the Calculation Agent, less the current money market rate of interest for overnight deposits in the Base Currency (as specified above) determined by the Calculation Agent:</p> $r = r_{\text{Strike Currency}} - r_{\text{Base Currency}}$ <p><b>FS</b>: Current Financing Spread. The "<b>Current Financing Spread</b>" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Fi-nancing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.</p> <p><b>n</b>: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).</p> <p>The result of the calculation shall be rounded downwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.0001.</p> |
| Financing Spread                 | The Financing Spread on the Issue Date shall amount to 4.00%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Exercise Date                               | shall mean each Business Day commencing as of the First Exercise Date (including).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| First Exercise Date                         | 20 April 2018                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Minimum Exercise Number                     | 1 Security                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Reference Price                             | The Reference Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows:<br>Reference Price shall mean the exchange rate determined by the Reference Agent at the Valuation Time on the Valuation Date and then published on the Reference Page.                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Stop-Loss Reference Price                   | shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows:<br><br>The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) under consideration of the bid and ask prices shown on the respective screen page of the business information service Bloomberg as the price of the Underlying within a period of one hour during the trading hours for the Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day. |
| Valuation Date                              | Valuation Date shall be<br>(a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions;<br>(b) in the event of ordinary termination by the Issuer, the ordinary termination date;<br>(c) in the event of an Barrier Event, the day on which the Barrier Event occurred.<br>If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.                    |
| Exchange Day                                | A day on which fixing for the Underlying usually occurs on the Reference Agent.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Right of Ordinary Termination of the Issuer | The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Termination Cut-Off Date                    | is one (1) Business Day before the relevant Termination Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| First Termination Date                      | 20 April 2018                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Termination Dates                           | Termination Date shall be each Business Day commencing from the First Termination Date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Stock exchange listing: | Application is made for the Securities to be included in the regulated unofficial market (MTF) Nordic Growth Market (Nordic MTF Sweden).<br>Expected first trading date: 20 April 2018 |
| Market Maker:           | Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Germany                                                                                                                            |

## **2. Terms of the offer**

The Issue Price and the Value Date of the Securities and the start as well as the expected end of the Public Offer are specified below.

|               |                          |               |
|---------------|--------------------------|---------------|
| Issue Price:  | SEK 2.53                 |               |
| Value Date:   | 20 April 2018            |               |
| Public Offer: | in Sweden starting from: | 18 April 2018 |

The Public Offer will end with the term of the Securities or – in case that a (new) Subsequent Base Prospectus has not been published on the website <https://certificates.vontobel.com> under the heading 'Legal Documents' by the last day of the validity of the Base Prospectus or the relevant Subsequent Base Prospectus – with expiration of the validity of the Base Prospectus or the relevant Subsequent Base Prospectus pursuant to § 9 WpPG.

## **3. Reimbursements, contributions, price surcharge**

There are no additional charges or commissions levied for the purchaser.

## **4. Publication of information after completion of the issue**

With the exception of the notices specified in the Terms and Conditions, the Issuer does not intend to publish any information after the issue has been completed.

## APPENDIX - ISSUE-SPECIFIC SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of "not applicable".

| Section A – Introduction and warnings |                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| C.8         | Description of the rights attached to the securities including ranking and limitations to those rights | <p><b>Redemption on exercise or termination</b></p> <p>The Securities grant the Security Holder the right to require the Issuer to redeem the Securities on exercise or termination by the payment of a Cash Amount, as described in C.15.</p> <p><b>Governing law</b></p> <p>The form and content of the Securities as well as all rights and obligations of the Issuer and of the Security Holders are determined in accordance with German law, except that the registration of Swedish Registered Securities is governed by Swedish law.</p> <p>The form and content of the Swiss Guarantee and all rights and obligations arising from it are determined in accordance with Swiss law.</p> <p><b>Ranking of the Securities</b></p> <p>The obligations arising from the Securities constitute direct and unsecured obligations of the Issuer that rank pari passu in relation to one another and in relation to all other unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory requirements.</p> <p><b>Limitations to the rights</b></p> <p>In accordance with the Terms and Conditions, the Issuer may make adjustments upon the occurrence of defined events in order to reflect relevant changes or events relating to the respective Underlying (as defined in Element C.20 below), or may terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' rights as described above cease to exist and there is the risk that the extraordinary termination amount may be zero (0).</p> <p>In the event that a market disruption occurs, there may be a delay in valuing the Security in relation to the Underlying, and this may affect the value of the Securities and/or delay the payment of the Cash Amount. In such cases, the Issuer may, in its reasonable discretion, determine a rate, level or price for the Underlying that is relevant for the purposes of valuing the Securities.</p> |       |              |      |        |        |          |             |                      |

| <b>C.15</b> | <p>Description of how the value of the investment is affected by the value of the underlying instrument</p> | <p>The Securities have a derivative component, i.e. they are financial instruments whose value is derived from the value of another reference instrument (the "<b>Underlying</b>"). Investors are able to participate in the performance of an Underlying, without purchasing the relevant Underlying.</p> <p>Mini Futures of the Option Type "Short" are Securities which enable the Security Holder to participate in the fall of the Underlying on a leveraged basis.</p> <p><u>Cash Amount</u></p> <p>Mini Futures do not have a fixed Term and therefore do not grant the Security Holder the right to payment of the Cash Amount on a particular date, specified in advance at the time of issue. The calculation and (subsequent) payment of the Cash Amount or termination amount takes place – subject to the occurrence of a Barrier Event (as defined below) in the meantime – when the Security Holder exercises the Securities effectively or when the Issuer terminates the Securities early.</p> <p>The occurrence of a Barrier Event depends on the performance of the Underlying.</p> <p>The key factor affecting the level of the Cash Amount is the amount by which the relevant rate, level or price of the Underlying on the Valuation Date (known as the Valuation Price, see C.19) is lower than the Strike.</p> <p>In the case of Mini Futures it should be noted that, in accordance with certain rules, some of the Product Features, including the Strike among others, are subject to adjustment. The calculation of the Cash Amount described below therefore always relates to the current Strike applicable at the particular time. Consequently, the level of the respective Cash Amount is based on the amount by which the Valuation Price is lower than the current Strike.</p> <p>The respective Ratio must also be included in the calculation of the Cash Amount, i.e. expressed as a formula:</p> <p>Cash Amount = (Current Strike – Valuation Price) x Ratio.</p> <p>If a Barrier Event has not occurred, the relevant rate, level or price of the Underlying on the Valuation Date (so-called Reference Price, see C.19) is used as the Valuation Price for the purpose of calculating the Cash Amount.</p> <p><u>Early redemption on the occurrence of a Barrier Event</u></p> <p>A "<b>Barrier Event</b>" occurs if the Observation Price touches or rises above the Stop-Loss-Barrier during the Observation Period. The Stop-Loss-Barrier is also subject to regular adjustment with the result that the occurrence of a Barrier Event always depends on the respective current Stop-Loss-Barrier. A single occasion on which the Observation Price touches or rises above the current Stop-Loss Barrier is sufficient to trigger a Barrier Event. While the Cash Amount is calculated using the same formula (shown above), the Valuation Price is replaced by the Stop-Loss Reference Price (see C.19) determined by the Calculation Agent in its reasonable discretion. <b>The possibility cannot be excluded that the Cash Amount, especially in the case of a rapidly rising price of the Underlying, may be zero. Upon the occurrence of a Barrier Event, the Term of the Securities ends early without any further action by the Security Holder. The occurrence of such a Barrier Event generally takes precedence over the exercise or termination of the Securities.</b></p> |

## Section D – Risks

|            |                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------|---------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>D.2</b> | Key information on the key risks relating to the Issuer and the Guarantor | <p><b>Insolvency risk of the Issuer</b></p> <p>The investors are exposed to the risk of the insolvency and therefore the illiquidity of the Issuer. There is therefore a general risk that the Issuer will be unable to fulfil all or some of its obligations arising from the Securities. In this event there is a threat of financial loss up to and including a total loss, irrespective of the performance of the Underlying.</p> <p>The Securities are not covered by a deposit protection scheme. Furthermore, the Issuer is also not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Issuer became insolvent.</p> <p>For this reason, investors should take into consideration the creditworthiness of the Issuer when making their investment decisions. The Issuer's liable share capital amounts to only EUR 50,000. A purchase of the Securities therefore exposes the investor to a significantly greater credit risk than in the case of an issuer with a higher level of capital resources.</p> <p>The Issuer enters into OTC hedging transactions (hedging transactions negotiated individually between two parties) exclusively with other companies within the Vontobel Group. As a result of this lack of diversification, the Issuer is exposed to cluster risk with respect to the possible insolvency of its counterparties, which would not be the case with a more widely diversified selection of contractual partners. Illiquidity or insolvency on the part of companies affiliated to the Issuer could therefore result directly in the illiquidity of the Issuer.</p> |

|            |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                                                                    | <p><b>Market risk of the Issuer</b></p> <p>A difficult macroeconomic situation may lead to a lower issue size and have a negative impact on the Issuer's results of operations. In this regard, the general market performance of securities depends in particular on the performance of the capital markets, which is in turn influenced by the general situation of the global economy and the economic and political framework in the respective countries (known as market risk).</p> <p><b>Insolvency risk of the Guarantor</b></p> <p>The investor bears the risk of the insolvency of the Guarantor. There is a general risk that the Guarantor will be unable to fulfil all or some of the obligations arising under the guarantee undertaking. For this reason, investors should take into consideration not only the creditworthiness of the Issuer, but also the creditworthiness of the Guarantor when making their investment decisions.</p> <p>The Swiss Guarantor is not a member of a deposit protection fund or similar protection system, which would reimburse the Security Holders' claims in full or in part if the Swiss Guarantor became insolvent.</p> <p><b>Risks associated with potential reorganization and settlement procedures</b></p> <p>German and Swiss laws and regulations, respectively, grant the respective competent authority extensive powers and discretionary powers in the case of reorganization and settlement procedures of banks and parent companies of financial groups established under the respective national laws, such as Bank Vontobel Holding AG, Zurich, Switzerland (the Swiss Guarantor) and Bank Vontobel Europe AG, Munich, Germany (the German Guarantor).</p> <p>In the case such procedures are initiated, this may have a negative impact on the market price of the Securities and may result in the non-payment or only partial payment of the amounts due under the Guarantee.</p> <p><b>Business risks relating to the Guarantor</b></p> <p>The Guarantor's business is influenced by the prevailing market conditions and the impact they have on the operating (consolidated) Vontobel companies. The factors influencing the Guarantor's business may be caused by general market risks arising as a result of unfavourable movements in market prices, such as interest rates, exchange rates, share prices, commodity prices and the related volatilities, and have a negative impact on the valuation of the underlyings and/or derivative financial products.</p> <p>The Guarantor's financial condition may also be impacted by liquidity bottlenecks that may be caused, for example, by cash outflows when loan commitments are drawn down or when it is not possible to renew deposits, with the result that the Guarantor might be temporarily unable to meet short-term financing requirements.</p> |
| D.3<br>D.6 | Key information on the key risks relating to the securities/<br>Risk of total loss | <p><b>Risk of loss due to dependence on the performance of the Underlying</b></p> <p>The Securities are financial instruments whose value is derived from the value of another reference instrument, the "Underlying". There is no guarantee that the performance of the Underlying will match the investor's expectations. If the Underlying moves in a direction that is unfavourable for the investor, there is a risk of loss up to and including a total loss.</p> <p>In the case of Securities of the <i>Short</i> Type, a <b>rise</b> in the rate, price or level of the Underlying is to the disadvantage of the investor.</p> <p>The effect of the Underlying on the value and redemption of the Securities is described in detail under C.15. The Securities are complex investment instruments. Investors should therefore ensure that they understand how the Securities function (including the structure of the Underlying) and the Terms and Conditions of the issue.</p> <p><b>Leverage effect</b></p> <p>Only a small amount of capital must be employed in comparison with a direct investment in the Underlying, resulting in a leverage effect. A change in the Underlying generally results in a disproportionate change in the price of the Securities. Consequently, these Securities entail disproportionate risks of loss if the Underlying moves in a direction that is unfavourable from the point of view of the investor.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**Dependence of redemption on the occurrence or non-occurrence of a Barrier Event**

If a Barrier Event occurs as a result of the price of the Underlying reaching or rising above a threshold (Stop-Loss Barrier) which is subject to change during the Term, the Securities become due and are settled prior to the normal Maturity Date. In this event, a minimal payment may be made; but in the worst case, the Securities may also expire worthless which regularly means the economical total loss for the Security Holder..

**Risk of ordinary termination and early redemption by the Issuer**

The Issuer has an ordinary right of termination, and the investor herefore faces the risk that the Issuer may terminate and redeem the Securities at a time at which the investor would not otherwise have sold or exercised the Securities. This may result in the investor not achieving the desired return and may entail a loss up to and including a total loss. The Issuer also has extraordinary rights of termination involving the same risks for investors as in the case of ordinary termination.

**Market price risks**

The price of a Security depends primarily on the price of the respective Underlying to which it is linked, but does not normally mirror changes in the price of the Underlying exactly. All of the positive and negative factors affecting an Underlying are therefore also reflected in principle in the price of the Security.

The value and therefore the price of the Securities may perform negatively. This may be mainly caused – as described above – by the performance of the Underlying and, depending on the respective Security, other factors affecting price (such as the volatility, the general development of interest rates, a deterioration in the Issuer's credit rating and the performance of the economy as a whole).

**Option risks with respect to the Securities**

The Securities are derivative financial instruments incorporating an option right which may therefore have many features in common with options. Transactions with options may involve a high level of risk. An investment in the Securities may be subject to very pronounced fluctuations in value and in some circumstances the embedded option will be completely worthless on expiry. In this event, the investor may lose the entire amount invested in the Securities.

**Correlation risks**

Correlation denotes the extent to which it was possible to establish a specific dependence between an Underlying and a particular factor (such as changes in another Underlying or in an index) in the past. If, for example, an Underlying regularly responds to a change in a particular factor by moving in the same direction, a high positive correlation can be assumed. A high positive correlation means that the Underlying and the particular factor move in the same direction to a very high degree. Where there is a high negative correlation, the Underlying moves in exactly the opposite direction. Against this background, it may be the case that an Underlying which can be fundamentally assessed as positive produces a performance that is unfavourable for the investor as a result of a change in the basic data relating to the relevant sector or country.

**Volatility risk**

An investment in Securities or Underlyings with a high volatility is fundamentally more risky than an investment in Securities or Underlyings with low volatility since it entails greater potential for incurring losses.

**Risks relating to historical performance**

The performance of an Underlying or of a Security in the past is not an indicator of its performance in the future.

Since the Securities do not provide any current income (such as interest or dividends), investors must not assume that they will be able to use such current income to service any loan interest falling due during the term of the Securities.

**Transactions designed to exclude or limit risk**

Investors may not be able to hedge adequately against the risks associated with the Securities.

**Inflation risk**

Inflation has a negative effect on the real value of assets held and on the return generated in real terms.

**Risks due to the economic cycle**

Losses from a fall in prices may arise because investors do not take the cyclical performance of the economy with its corresponding upward and downward phases into account, or do not do so correctly, when making their investment decisions and consequently make investments, or hold or sell Securities, at phases of the economic cycle that are unfavourable from their point of view.

**Psychological market risk**

Factors of a psychological nature may also have a significant influence on the price of the Underlyings and therefore on the performance of the Securities. If, through such effect, the price of the Underlying or of its Reference Instrument is affected to the contrary of the market expectations of the investor, the investor may suffer a loss.

**Risks relating to trading in the Securities, liquidity risk**

The Market Maker (as defined in E.4) undertakes to provide bid and offer prices for the Securities pertaining to an issue subject to regular market conditions.

In the event of extraordinary market conditions or extremely volatile markets, the Market Maker will not provide any bid and offer prices. However, even in the case of regular market conditions, the Market Maker does not assume any legal responsibility towards the Securities Holders to provide such prices and/or that such prices provided by the Market Maker are reasonable.

Thus, potential investors must not assume that it will be possible to sell the Securities during their term and must in any case be prepared to hold the Securities until the next Exercise Date to redeem the Securities in accordance with the Terms and Conditions (by submitting an exercise notice).

**Risks relating to the price determination of the Securities and the effect of transaction costs and commissions**

The Issue Price (as defined in E.3) and the selling price for the Securities quoted in the secondary market may include a premium over the original mathematical value of the Securities (so-called fair value) that is not apparent to the investor. This margin and the actuarial value of the Securities is determined by the Issuer and/or Market Maker at its own discretion on the basis of internal pricing models and a number of other factors. These factors include inter alia the following parameters: actuarial value of the Securities, price and volatility of the Underlying, supply and demand with regard to the Securities, costs for risk hedging, premium for risk assumption, costs for structuring and distribution of the Securities, commissions, if any, as well as licence fees or management fees, if any.

For the aforesaid reasons, the prices provided by the Market Maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective.

**Risk relating to the taxation of the Securities**

The payment of taxes, levies, fees, deductions or other amounts incurred in connection with the Securities is the responsibility of the respective Security Holder and not of the Issuer. All payments made by the Issuer may be subject to taxes, levies, fees, deductions or other payments required to be made, paid, withheld or deducted.

**Risks relating to the effect of hedging transactions by companies of the Vontobel Group**

Hedging and trading transactions performed by the Issuer and by companies of the Vontobel Group involving an Underlying of the Securities may have a negative impact on the value of the Securities.

### **Risks in connection with adjustments, market disruptions, ex-traordinary termination and settlement**

The Issuer may make adjustments to take account of relevant changes or events in relation to the respective Underlying. The possibility cannot be excluded in this context that an adjustment may prove to be disadvantageous for the investor. The Issuer may also be entitled to terminate the Securities extraordinarily. In the case of an extraordinary termination, all investors' redemption rights cease to exist and there is the risk that the extraordinary termination amount may be zero (0). In the least favourable case, a total loss of the capital invested may occur.

### **Risks with respect to potential conflicts of interest**

Conflicts of interest may exist among the companies of the Vontobel Group which may have a negative impact on the value of the Securities. The principal possible conflicts of interest are set out under E.4.

### **Information risk**

There is a possibility that investors may make incorrect decisions because of missing, incomplete or incorrect information, which may be outside the Issuer's control.

### **Currency risk**

Potential investors should be aware that an investment in the Securities is associated with exchange rate risks since the rate of exchange between the currency of the Underlying and the Settlement Currency of the Securities may move in a direction that is to their disadvantage.

If the Settlement Currency of the Securities is different from the domestic currency of the investor or the currency in which an investor wishes to receive payments, potential investors bear exchange rate risks.

### **Interest rate risk**

An investment in the Securities entails an interest rate risk as a result of fluctuations in the rate of interest payable on deposits in the Settlement Currency of the Securities. This may have a negative impact on the value of the Securities.

### **Risk relating to the level of the Cash Amount in the event of termination by the Issuer or on exercise by the Security Holder**

If the value of the Underlying *rises*, Mini Futures of the Short type involve a risk of loss depending on the price of the Underlying. A total loss will occur if the Reference Price for the purpose of calculating the redemption (i.e. the Cash Amount upon exercise by the Security Holder or the Ordinary Termination Amount in the event of ordinary termination by the Issuer) reaches or rises above the Strike.

### **Risk of early repayment due to a Barrier Event**

The Securities may fall due for repayment early during the term without any further action by the investor, namely due to the occurrence of a "Barrier Event".

If such a Barrier Event occurs, the implications for the investor, depending on the nature of the Security, are as follows:

The Calculation Agent will determine the relevant price of the Underlying (the "**Stop-Loss Reference Price**") for the purpose of de-termining the Cash Amount in its reasonable discretion. **For the investors, there is nevertheless the risk (especially in the case of a rapidly falling or rapidly rising price of the Underlying) that the Cash Amount will be zero (0) and that they will therefore incur a total loss.**

A Barrier Event occurs if the Observation Price reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the relevant Barrier in each case during the Observation Period. **Investors must always bear in mind that even if the price of the Underlying reaches or falls below (Call or Long type) or reaches or rises above (Put or Short type) the Barrier only on a single occasion, this will result in the early repayment of the Securities.**

**Moreover, investors should be aware in this connection that – depending on the trading hours for the Underlying – a Barrier Event can also occur outside the local trading times.**

|  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  | <p><b>Risk due to the continual adjustment of the Strike and of the Stop-Loss Barrier</b></p> <p>As a general rule the Strike is continually rising (Call or Long type) or falling (Put or Short type) during the term of the Securities. The (respective current) Strike changes in accordance with the (respective) current financing spread and – depending on the particular Underlying – the reference rate of interest determined by the Calculation Agent. If the price of the Underlying remains unchanged at the same time, the Securities will fall in value with each day of their term.</p> <p><b>Risk of early repayment due to ordinary termination</b></p> <p>The Terms and Conditions of the Securities provide for the possibility of ordinary termination by the Issuer. While the Issuer will repay an amount in such cases that is calculated analogously to the Cash Amount, investors can nevertheless not assume that their Securities will have any value at that time or will be showing a positive return. In particular, investors cannot assume that the value of the Securities will develop in line with their expectations at the right time up to the Termination Date.</p> <p><b>Risk of total loss</b></p> <p>The Securities are <b>particularly risky investment instruments</b>, which combine features of derivatives transactions with those of leveraged products. The Securities are therefore associated with disproportionate risks of loss (risk of total loss). If a loss arises, it will consist of the price paid for the Security and the costs incurred, such as custodian fees or brokerage and/or stock exchange commissions. This risk of loss exists irrespective of the financial condition of the Issuer and of the Guarantor.</p> <p><b>There is no provision for regular distributions, payments of interest or a minimum repayment amount. The loss of capital may be substantial with the result that in certain circumstances investors may suffer a total loss of their investment.</b></p> |

| Section E – Offer |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-------------------|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>E.2b</b>       | Reasons for the offer and use of proceeds                                         | The Issuer is free to use the proceeds from the issue of the Securities. The use of such proceeds is solely for the purpose of making profits and / or hedging certain risks of the Issuer. In no event shall the Issuer be obliged to invest the proceeds from the Securities into the underlying asset or other assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>E.3</b>        | Description of the terms and conditions of the offer                              | <p>Issue Price: SEK 2.53</p> <p>Issue Date: 20 April 2018</p> <p>Value Date: 20 April 2018</p> <p>Offer Size: 100,000 Securities</p> <p>Minimum Trading Lot: 1 Security</p> <p>Public Offer: in Sweden 18 April 2018 starting from:</p> <p>The Issue Price of the Securities was determined by the Market Maker.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>E.4</b>        | Interests that are material to the issue/ offer (including conflicts of interest) | <p>Conflicts of interest may exist among the companies of the Vontobel Group that may have a negative effect on the value of the Underlying and therefore the value of the Securities.</p> <p><u>Trading transactions relating to the Reference Instrument</u></p> <p>During the term of the Securities, the companies of the Vontobel Group may be involved in trading transactions, for their own account or for a customer's account, that directly or indirectly relate to the Reference Instrument. The companies of the Vontobel Group may also become counterparties in hedging transactions relating to the Issuer's obligations arising from the Securities. Such trading or hedging transactions may have a negative impact on the value of the Reference Instrument and thus have a negative impact on the Underlying and the value of the Securities.</p> |

|-----|-------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     |                                                                         | <p><u><i>Exercise of other functions by companies of the Vontobel Group</i></u></p> <p>The Issuer and other companies of the Vontobel Group may also exercise other functions in relation to the Securities, e.g. as calculation agent and/or as market maker. Such function may enable the Issuer and/or other companies of the Vontobel Group to determine the composition of the Underlying or to calculate its value. These functions may also lead to conflicts of interest, both among the respective companies of the Vontobel Group and between these companies and the investors, in determining the prices of the Securities and in making other associated determinations.</p> <p><u><i>Activity as Market Maker for the Securities</i></u></p> <p>Bank Vontobel Europe AG will act as market maker (the "<b>Market Maker</b>") for the Securities. Through such liquidity providing activities, the Market Maker – supported by other companies of the Vontobel Group – will determine the price of the Securities on the basis of internal pricing models and a number of other factors.</p> <p>As a result, the prices set by the Market Maker may differ significantly from the fair value of the Securities or the value they would be expected to have in economic terms at a particular point in time. In addition, the Market Maker may at any time revise the method it uses to determine the prices quoted, e.g. by widening or narrowing the spreads between bid and offer prices.</p> <p><u><i>Payment of commissions, own interests of third parties</i></u></p> <p>In connection with the placing and/or the Public Offer of the Securities, the Issuer or other companies of the Vontobel Group may pay commissions to third parties. It is possible that these third parties may pursue their own interests in the course of making an investment decision or investment recommendation.</p> |
| E.7 | Estimated expenses charged to the investor by the Issuer or the Offeror | <p>– not applicable –</p> <p>The investor may purchase the Securities at the Issue Price or at the selling prices quoted by the Market Maker during the term of the Securities. These prices include all costs incurred by the Issuer, Offeror and Market Maker for the issue and distribution of the Securities (e.g. sales and distribution costs, structuring and hedging costs, including a profit margin).</p> <p>No further expenses will be charged to the investor by the Issuer or the Offeror beyond the Issue Price or the purchase price.</p> <p>Details of any transaction costs should be requested from the relevant sales partner or from the investor's house bank or broker.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## BILAGA - EMISSIONSSPECIFIK SAMMANFATTNING

Sammanfattningar består av informationskrav som kallas "Element". Elementen är numrerade i avsnitten A–E (A.1–E.7).

Den här sammanfattningen innehåller alla Element som ska ingå i en sammanfattning för dessa sorters värdepapper och Emittent. Eftersom det inte krävs att vissa Element behandlas kan det förekomma luckor i numreringen av Elementen.

Även om det krävs att ett Element ska ingå i sammanfattningen på grund av den aktuella typen av värdepapper eller Emittent, är det möjligt att ingen relevant information finns att ge om det specifika Elementet. I så fall ges en kort beskrivning av Elementet i sammanfattningen, med angivelsen "ej tillämpligt".

| Avsnitt A – Inledning och varningar |                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <p><sup>1)</sup> Banken för internationell betalningsutjämning (Bank for International Settlements - BIS) är världens äldsta internationella organisation inom finansierings-området. Banken hanterar en del av de internationella valutareserverna och anses därför de facto vara banken för världens centralbanker. BIS är baserad i Basel (Schweiz). Den publicerar kapitaltäckningskrav och liknande andelar för eget kapital.</p> <p><sup>2)</sup> För närvarande har Vontobelkoncernen endast primärkapital (Common Equity Tier 1).</p> <p><sup>3)</sup> Primärkapital kallas även för kärnkapital. Det är en del av bankens kapital och består främst av inbetalat kapital (aktiekapital) och balanserade vinstmedel (in-komstreserver, skuldreserv, fond för allmänna risker i bankrörelsen).</p> <p><sup>4)</sup> Genomsnittlig Value-at-Risk 12 månader för positioner inom avdelningen för finansiella produkter inom affärsenheten investeringstjänster. Historisk simulering av Value-at-Risk, konfidensnivå på 99 %, 1 dags innehavsperiod, 4-årig historisk observationsperiod.</p> <p>Den följande utvalda finansiella informationen har hämtats från den oreviderade delårsrapporten över finansiell information för perioden som avslutades den 30 juni 2017, som har upprättats i enlighet med International Financial Reporting Standards (IFRS).</p> |                                                                                     |                                                                                     |

| <b>C.15</b> | Beskrivning av hur investeringens värde påverkas av det Underliggande instrumentets värde | <p>Värdepapperen har en derivatdel, dvs. de är finansiella instrument vars värde härleds ur värdet från ett annat referensinstrument ("<b>Underliggande</b>"). Investerare kan delta i Underliggandes utveckling, utan att köpa vederbörande Underliggande.</p> <p>Mini Futures av Optionstypen "Short" är Värdepapper som gör att investeraren kan delta i en minskning av Underliggande med hävstångseffekt.</p> <p><u>Kontantbelopp</u></p> <p>Mini Futures har ingen fast Löptid och ger därför inte Värdepappersinnehavaren någon rätt till betalning av Kontantbeloppet på ett visst datum som specificeras före emissionstidpunkten. Beräkningen och (påföljande) betalning av Kontantbeloppet eller slutbeloppet äger rum – under förutsättning att en Barriärhändelse (enligt definitionen nedan) inte äger rum under tiden – när Värdepappersinnehavaren effektivt löser in Värdepapperen eller när Emittenten säger upp Värdepapperen i förtid.</p> <p>Förekomsten av en Barriärhändelse är beroende av Underliggandes utveckling.</p> <p>Den centrala faktor som påverkar nivån för ifrågavarande Kontantbelopp är det belopp med vilket Underliggandes relevanta kurs, nivå eller pris (det så kallade Värderingspriset, se C.19) är lägre än <i>Strike</i>.</p> <p>Vad beträffar Mini Futures bör det noteras att i enlighet med vissa regler kan vissa Produkttegenskaper, inklusive bland annat <i>Strike</i> komma att justeras. Beräkningen av Kontantbeloppet enligt beskrivningen nedan är alltid knuten till aktuell <i>Strike</i> som gäller vid ifrågavarande tidpunkt. Därför baseras nivån för ifrågavarande Kontantbelopp på det belopp med vilket Värderingspriset är lägre än aktuell <i>Strike</i>.</p> <p>Respektive Grad (Ratio) måste även inkluderas i beräkningen av Kontantbeloppet, dvs. uttryckt som en formel:</p> <p>Kontantbelopp = (aktuell <i>Strike</i> - Värderingspris) x Grad.</p> |

Om någon Barriärhändelse inte har ägt rum används Underliggandes relevanta kurs, nivå eller pris på Värderingsdagen (så kallat Referenspris, se C.19) som Värderingspris för beräkning av Kontantbeloppet.

Tidig inlösen om Barriärhändelse inträffar

En "Barriärhändelse" äger rum om Observationspriset är lika med eller överstiger Stop Loss-Barriären under Observationsperioden. Stop Loss-Barriären justeras även regelbundet, vilket medför att förekomsten av en Barriärhändelse alltid är beroende av ifrågavarande aktuella Stop Loss-Barriär. Det räcker med ett enda tillfälle då Observations-priset är lika med eller överstiger den aktuella Stop-Loss-Barriären för att Barriärhändelsen ska äga rum. Medan Kontantbeloppet beräknas med hjälp av samma formel (visas ovan), ersätts Värderingspriset med Referenspriset för Stop-Loss (se C.19) som fastställs av Beräkningsagenten efter eget, rimligt gottfinnande. **Möjligheten kan inte uteslutas att Kontantbeloppet, i synnerhet i händelse av ett hastigt stigandepris på Underliggande, kan uppgå till noll (0).** Då Barriärhändelsen äger rum tar Värdepappernas löptid slut i förtid, utan att Värdepappersinnehavaren vidtar några vidare åtgärder. Förekomsten av en sådan Barriärhändelse har i allmänhet företräde framför inlösen av Värdepapperna eller framför att löptiden tar slut.

Reguljära justeringar av Strike och Stop-Loss-Barriär

Vad beträffar Mini Futures kan Värdepappernas Strike och Stop Loss-Barriär ändras på specifika justeringsdagar i enlighet med en viss justeringslogik, varigenom bägge normalt minskar (aktuell Strike, aktuell Stop-Loss-Barriär). Därför minskar aktuell Strike som regel kontinuerligt, helt enkelt på grund av att tiden går, vilket inverkar negativt på Värdepappernas värde, eftersom skillnaden mellan Underliggandes pris och aktuell Strike blir mindre.

| <b>D.2</b>         | Central information om de centrala risker som är specifika för Emittenten och Garantigivaren | <p><b>Insolvensrisk för Emittenten</b></p> <p>Investerarna är utsatta för Emittentens insolvensrisk vilket kan medföra att Emittenten är illikvid. Därför föreligger en allmän risk för att Emittenten inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till Värdepapperen. I så fall föreligger fara för ekonomiska förluster, inklusive möjlig totalförlust, oavsett Underliggandes utveckling.</p> |

|                          |                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------|--------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                                                                                                        | <p>Värdepapperen omfattas inte av insättarskydd. Dessutom är Emittenten inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om Emittenten blir insolvent.</p> <p>Därför bör investerarna beakta Emittentens kreditvärdighet då de fattar investeringsbeslut. Emittentens ansvarspliktiga aktiekapital är endast 50 000 EUR. Därför utsätter ett köp av Värdepapperen investeraren för en betydligt högre risk än då det rör sig om en Emittent med högre kapitalresursnivå.</p> <p>Emittenten gör endast OTC-säkringstransaktioner (säkringstransaktioner som förhandlas individuellt mellan två parter) med andra företag inom Vontobelkoncernen. På grund av denna bristande diversifiering är Emittenten utsatt för en klusterrisk i händelse av att någon av motparterna blir insolvent, vilket inte skulle vara fallet med en mer diversifierad grupp kontraktspartners. Likviditetsbrist eller insolvens för de företag som är anknutna till Emittenten kan därför direkt medföra att Emittenten blir illikvid.</p> <p><b>Emittentens marknadsrisk</b></p> <p>Ett svårt makroekonomiskt läge kan leda till en mindre emissionsstorlek och negativt inverka på Emittentens rörelseresultat. I detta sammanhang är Värdepapperens allmänna utveckling på marknaden särskilt beroende av kapitalmarknadernas utveckling, vilket i sin tur påverkas av det allmänna läget inom världsekonomin samt ifrågasättande länders ekonomiska och politiska ramar (så kallad marknadsrisk).</p> <p><b>Garantigivarens insolvensrisk</b></p> <p>Investeraren bär risken för att Garantigivaren blir insolvent. Därför föreligger en allmän risk för att Garantigivaren inte kan uppfylla alla eller vissa av sina förpliktelser i anknytning till garantiåtagandet. Därför bör investerarna inte bara beakta Emittentens kreditvärdighet då de fattar investeringsbeslut, utan även Garantigivarens kreditvärdighet.</p> <p>Den Schweiziska Garantigivaren är inte medlem av någon fond för insättarskydd eller liknande skyddssystem som ersätter Värdepappersinnehavarens krav helt eller delvis om den Schweiziska Garantigivaren blir insolvent.</p> <p><b>Risker hänförliga till potentiell omorganisation och betalnings-procedurer</b></p> <p>Tyska och Schweiziska lagar och förordningar ger den respektive behöriga myndigheten omfattande behörigheter och diskretionära behörigheter i fall rörande omorganisation och betalningsprocedurer för banker och moderbolag i finansiella koncerner som bildats under respektive nationell lagstiftning, såsom Bank Vontobel Holding AG, Zurich, Switzerland (den Schweiziska Garantigivaren) och Bank Vontobel Europe AG, Munich, Germany (den Tyska Garantigivaren).</p> <p>I de fall där sådana procedurer initieras kan detta ha en negativ inverkan på marknadspriset på Värdepapperen och kan resultera i utebliven eller endast delvis betalning av de belopp som har förfallit under Garantin.</p> <p><b>Verksamhetsrisker som rör Garantigivaren</b></p> <p>Garantigivarens verksamhet påverkas av de rådande omständigheterna på marknaden och av hur dessa påverkar Vontobels verksamma (koncern)bolag. De faktorer som inverkar på Garantigivarens verksamhet kan förorsakas av allmänna marknadsrisker som uppstår på grund av ogynnsamma rörelser i marknadspriserna, till exempel räntesatser, valutakurser, aktiepriser, råvarupriser och relaterad volatilitet, och kan inverka negativt på värderingen av det underliggande och/eller derivata finansiella produkter.</p> <p>Garantigivarens ekonomiska ställning kan även påverkas av flaskhalsar vad beträffar likviditeten som till exempel kan orsakas av kassautflöden när låneåtaganden utnyttjas eller när det inte går att förnya insättningen, vilket medför att Garantigivaren tillfälligt kan vara oförmögen att uppfylla kortfristiga finansieringsbehov.</p> |
| <b>D.3</b><br><b>D.6</b> | Central information om de centrala risker som är specifika för Värdepapperen/<br>Risk för totalförlust | <p><b>Risk för förlust på grund av beroende av Underliggandes utveckling</b></p> <p>Värdepapperen är finansiella instrument vilkas värde härleds ur värdet för ett annat referensinstrument, det så kallade "Underliggande". Det finns ingen garanti för att Underliggandes utveckling kommer att motsvara investerarens förväntningar. Om Underliggande går mot en utveckling som är ogynnsam för investeraren föreligger en förlustrisk som kan inkludera totalförlust.</p> <p>I fråga om Värdepapper av typen <i>Short</i> är Underliggandes kurs-, pris- eller nivåökning ogynnsam för investeraren.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

Underliggandes inverkan på Värdepappernas värde och inlösen beskrivs utförligt i C.15. Värdepapperna är komplexa investeringsinstrument. Därför bör investerarna se till att de förstår hur Värdepapperna fungerar (inklusive Underliggandes struktur) och emissionens Allmänna Villkor.

#### **Hävstångseffekt**

Endast en liten kapitalmängd behöver användas, jämfört med en direktinvestering i Underliggande, vilket medför en hävstångseffekt. Förändringar i Underliggande leder vanligtvis till en oproportionerlig förändring i Värdepappernas värde. Därför medför dessa värdepapper en oproportionerlig förlustrisk om Underliggandes värde utvecklas i en riktning som är ogynnsam ur investerarens synvinkel.

#### **Inlösen är beroende av om Barriärhändelse äger rum eller inte**

Om en Barriärhändelse äger rum på grund av att Underliggandes pris uppnår eller överstiger en tröskel (Stop Loss-Barriär) som kan ändras under löptiden, förfaller Värdepapperen och avräknas före normal Förfallodag. I detta fall kan en minimal betalning ske; men i värsta fall kan Värdepapperen också förfalla och bli värdelösa vilket vanligtvis innebär ekonomisk totalförlust för Värdepappersinnehavaren.

#### **Risk för att Emittenten ordinärt avslutar löptiden eller löser in i förtid**

Emittenten har en ordinär rätt att avsluta löptiden och investeraren riskerar därför att Emittenten avslutar löptiden och löser in Värdepapperen vid en tidpunkt då investeraren annars inte skulle ha sålt eller löst in Värdepapperen. Detta kan innebära att investeraren inte uppnår önskat resultat och kan leda till en förlust, inklusive totalförlust. Emittenten har även extraordinär rätt att avsluta löptiden, vilket innebär samma risk för investeraren som vid ordinär avslutning av löptiden.

#### **Marknadsprisrisk**

Ett Värdepappers pris beror huvudsakligen på priset för det relevanta Underliggande som Värdepapperet är länkat till, men reflekterar vanligen inte exakta förändringar i Underliggandes pris. Alla de positiva och negativa faktorerna som inverkar på Underliggande reflekteras därför även i princip i Värdepapperets pris.

Värdepapprets värde och därmed pris kan utvecklas negativt. Detta kan huvudsakligen vara en följd av – enligt beskrivningen ovan – Underliggandes utveckling och, beroende på vederbörande Värdepapper, övriga faktorer som inverkar på priset (såsom volatiliteten, räntesatsernas allmänna utveckling, en försämring vad beträffar Emittentens kreditvärdighet samt den allmänna ekonomins utveckling).

#### **Optionsrisker relaterade till Värdepapperen**

Värdepapperen är derivata finansiella instrument som innehåller en optionsrätt som därför kan ha många drag gemensamt med optioner. Handel med optioner kan innebära en hög risk. En investering i Värdepapperen kan omfattas av mycket kraftiga fluktuationer i värde och under vissa omständigheter kan den inbäddade optionen bli helt värdelös. I ett sådant fall kan investeraren förlora hela beloppet som har investerats i Värdepapperen.

#### **Korrelationsrisker**

Korrelationen utmärker i hur stor omfattning det tidigare varit möjligt att fastställa ett specifikt beroende mellan Underliggande och en specifik faktor (till exempel förändringar i Underliggande eller ett index). Om Underliggande till exempel regelbundet reagerar på förändringar i en viss faktor och rör sig i samma riktning, kan man anta att det rör sig om en hög, positiv korrelation. En hög, positiv korrelation innebär att Underliggande och den specifika faktorn i hög grad rör sig i samma riktning. Om det rör sig om en hög, negativ korrelation, rör sig Underliggande i exakt motsatt riktning. Mot denna bakgrund kan det vara så att Underliggande som i grunden kan antas vara positiv, uppvisar en utveckling som är ogynnsam för investeraren på grund av att grundläggande data som rör relevant sektor eller land har ändrats.

#### **Volatilitetsrisk**

En investering i Värdepapper eller Underliggande med hög volatilitet är i grund och botten mer riskabel än en investering i Värdepapper eller Underliggande med låg volatilitet, eftersom den medför större möjlighet för förluster.

#### **Risker relaterade till historisk utveckling**

Underliggande eller Värdepappers tidigare utveckling är inte en indikation på dess framtida utveckling.

Eftersom Värdepapperen inte medför någon löpande intäkt (till exempel ränta eller utdelningar) får investeraren inte anta att de kan använda sådan löpande intäkt för att betala ränta på lån som förfaller under Värdepapperens löptid.

#### **Transaktioner som är tänkta att exkludera eller begränsa risk**

Det är möjligt att investerarna inte kan säkra tillräckligt mot risker som är anknutna till Värdepapperen.

#### **Inflationsrisk**

Inflationen inverkar negativt på innehavda tillgångars faktiska värde samt på den avkastning som faktiskt genereras.

#### **Risker på grund av ekonomiska cykler**

Förluster på grund av prisfall kan uppstå på grund av att investerarna inte beaktar den ekonomiska cykliska utvecklingen med motsvarande uppåt- och nedåtgående faser, eller för att de inte beaktar detta på rätt sätt när de fattar investeringsbeslut och därmed investerar, eller innehar och säljer Värdepapper, då den ekonomiska cykeln är inne på en fas som är ogynnsam ur investerarens synvinkel.

#### **Psykologiska marknadsrisker**

Faktorer som är psykologiska till sin natur kan även ha en betydande inverkan på Underliggandes pris och därför Värdepapperens utveckling. Om priset på Underliggande eller på dess Referensinstrument påverkas av en sådan effekt, i motsats till investerarens marknadsförväntningar, kan investeraren lida en förlust.

#### **Risker relaterade till handel med Värdepapperen, likviditetsrisk**

Market Maker (såsom definierats i E.4) åtar sig att under normala marknadsförhållanden ange köp- och säljkurser för Värdepapperen som hänför sig till ett emissionsobjekt.

I händelse av extraordinära marknadsförhållanden eller extremt instabila marknader kommer Market Maker inte att ange några köp- och säljkurser. Även under normala marknadsförhållanden påtar sig emellertid inte Market Maker något juridiskt ansvar gentemot Värdepappersinnehavarna att ange sådana priser och/eller att sådana priser som angetts av Market Maker är skäliga.

Således får potentiella investerare inte utgå ifrån att det kommer att vara möjligt att sälja Värdepapperen under deras löptid och måste i vart fall vara beredda att behålla Värdepapperen till nästa Lösendag för att lösa in Värdepapperen i enlighet med de Allmänna Villkoren (genom att sända ett meddelande om inlösen).

#### **Risker relaterade till fastställandet av priset på Värdepapperen och effekten av transaktionskostnader och provisioner**

Emissionspriset (såsom definierat i E.3) och försäljningspriset för Värdepapperen så som de anges på andrahandsmarknaden kan inkludera en premie utöver Värdepapperens ursprungliga aktuariska värde (så kallat skäligt värde) som inte är uppenbart för investeraren. Denna marginal och det matematiska värdet för Värdepapperen bestäms av Emittenten och/eller Market Maker efter deras eget gottfinnande på grundval av interna prissättningsmodeller och ett antal andra faktorer. Dessa faktorer inkluderar bland annat följande parametrar: aktuariskt värde för Värdepapperen, pris och volatilitet på Underliggande, utbud och efterfrågan när det gäller Värdepapperen, kostnader för riskförsäkring, premie för risktagande, kostnader för att strukturera och distribuera Värdepapperen, provisioner, om några, samt li-censavgifter eller förvaltningsavgifter, i förekommande fall.

Av dessa skäl kan de priser som lämnas av Market Maker avvika från det aktuariska värdet för Värdepapperen och/eller priset som kan förväntas från ett kommersiellt perspektiv.

#### **Risk relaterad till beskattningen av Värdepapperen**

Det åligger vederbörande Värdepappersinnehavare att betala skatter, tariffer, avgifter, avdrag eller andra belopp som uppstår i samband med Värdepapperen, alltså inte Emittenten. Eventuella betalningar som Emittenten gör kan omfattas av skatter, tariffer, avgifter, avdrag eller andra betalningar som måste göras, innehållas eller dras av.

### **Risker relaterade till effekten av säkringstransaktioner av företagen i Vontobel-koncernen**

Säkrings- och handelstransaktioner som Emittenten och företagen i Vontobelkoncernen utför som involverar Underliggande i Värdepapperen kan ha en negativ inverkan på Värdepapperens värde.

### **Risker i samband med justeringar, marknadsstörningar, extraordinärt avslut och avveckling**

Emittenten kan göra justeringar för att ta hänsyn till relevanta ändringar eller händelser i förhållande till respektive Underliggande. Det går inte att i detta sammanhang bortse från möjligheten att en justering kan vara ogynnsam för investeraren. Det är även möjligt att Emittenten kan ha rätt att extraordinärt avsluta Värdepapperens löptid. I händelse av ett extraordinärt avslut, upphör alla återköpsrättigheter för investerarna och det finns en risk för att det extraordinära avslutsbeloppet blir noll (0). I det minst gynnsamma fallet kan hela det investerade kapitalet gå förlorat.

### **Risk i samband med potentiella intressekonflikter**

Det kan förekomma intressekonflikter mellan företagen i Vontobelkoncernen vilket kan påverka värdet på Värdepapperen negativt. De huvudsakliga möjliga intressekonflikterna beskrivs under E.4.

### **Informationsrisk**

Det finns en möjlighet att investerare kan fatta felaktiga beslut på grund av saknad, ofullständig eller felaktig information, vilket kan ligga utanför Emittentens kontroll.

### **Valutarisk**

Möjliga investerare bör vara medvetna om att investeringar i Värdepapper medför valutakursrisker eftersom växlingskursen för Underliggandes Valuta och Värdepapperens Avräkningsvaluta kan röra sig i en riktning som är ogynnsam för investeraren.

Om Avräkningsvalutan för Värdepapperen inte är densamma som valutan där investeraren är bosatt eller valutan där investeraren vill erhålla betalning, är möjliga investerare utsatta för valutarisk.

### **Ränterisk**

En investering i Värdepapperen medför ränterisk på grund av fluktuationer i den ränta som betalas i Värdepapperens Avräkningsvaluta. Detta kan ha en negativ inverkan på värdet av Värdepapperen.

### **Risk relaterad till nivån av Kontantbeloppet om Emittenten avslutar löptiden eller när Värdepappersinnehavaren löser in Värdepapperen**

Om Underliggandes värde **stiger**, innebär Mini-Futures av typen Short en förlustrisk på grund av Underliggandes pris. En totalförlust äger rum om Referenspriset för beräkning av inlösen (dvs. Kontantbeloppet då Värdepappersinnehavaren löser in Värdepappret eller Slutbeloppet om Emittenten ordinärt avslutar Värdepappernas löptid) når eller överstiger Strike.

### **Risk för tidig återbetalning på grund av en Barriärhändelse**

Värdepapperen kan förfalla till betalning under löptiden, utan vidare åtgärder från investerarens sida, nämligen på grund av inträffandet av en "Barriärhändelse".

Om en sådan Barriärhändelse äger rum är följderna för investeraren, beroende på Värdepapperets natur, som följer:

Beräkningsagenten fastställer, efter eget, rimligt gottfinnande, Underliggandes pris ("Referenspriset för Stop-Loss") för fast-ställande av Kontantbeloppet. **För investerarna föreligger dock en risk (särskilt i fallet med ett snabbt fallande eller stigande pris för Underliggande) att Kontantbeloppet är noll (0) och att de därför kommer att ådra sig en totalförlust.**

En Barriärhändelse äger rum om Observationspriset når eller faller under (typen Call eller Long) eller når eller överstiger (typen Put eller Short) vederbörande Barriär för föreliggande fall under Observationsperioden. **Investerarna ska alltid komma ihåg att även om Underliggandes pris når eller faller under (typen Call eller Long) eller når eller överskrider (typen Put eller Short) Barriären bara en enda gång, leder detta till att Värdepapperna återbetalas i förtid.**

|  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  | <p><b>Dessutom bör investerarna i detta sammanhang vara medvetna om att – beroende på handelstiderna för Underliggandes – en Barriärhändelse även kan äga rum efter de lokala handelstidernas slut.</b></p> <p><b>Risk på grund av kontinuerlig justering av Strike och Stop Loss-Barriären</b><br/> Som huvudregel ökar Strike (typen Call eller Long) eller faller (typen Put eller Short) kontinuerligt under Värdepappernas löptid. (Vederbörande aktuella) Strike ändras i enlighet med (vederbörande) aktuella finansieringsspridning och Referensräntan fastställs – beroende på specifik Underliggande – av Beräkningsagenten. Om Underliggandes pris samtidigt förblir oförändrat, kommer Värdepapperens värde att falla varje dag under löptiden.</p> <p><b>Risk för tidig återbetalning på grund av ordinärt avslutande av löptiden</b><br/> Värdepapperens Allmänna Villkor ger Emittenten möjlighet att ordi-närt avsluta löptiden. Även om Emittenten i sådant fall återbetalar ett belopp som beräknas analogt med Kontantbeloppet, kan investerarna ändå inte anta att Värdepapperna kommer att ha något värde vid ifrågavarande tidpunkt, eller att de kommer att medföra en positiv avkastning. Investerarna kan i synnerhet inte anta att Värdepappernas värde kommer att utvecklas i linje med investerarens förväntningar vid rätt tidpunkt, fram till det datum då löptiden avslutas.</p> <p><b>Risk för totalförlust</b><br/> Värdepapperen är <b>särskilt riskabla investeringsinstrument</b>, som kombinerar egenskaper som återfinns i både derivatransaktioner och hävstångsprodukter. Värdepapperen är därför förknippade med oproportionerliga förlustrisker (risk för totalförlust). Om en förlust äger rum kommer den att utgöras av det pris som betalats för Värdepapperen samt upplupna kostnader, till exempel förvaltaravgifter eller mäklar- och/eller börsprovisioner. Det föreligger förlustrisk oberoende av Emittentens och Garantgivarens finansiella ställning.</p> <p><b>Det finns ingen bestämmelse om regelbunden distribution, räntebetalning eller ett minsta återbetalningsbelopp. Det är möjligt att förlora en betydande mängd kapital, vilket i vissa fall kan leda till att investerarna förlorar hela investeringen.</b></p> |

Företagen i Vontobelkoncernen kan även bli motparter i säkringstransaktioner som rör Emittentens förpliktelser i samband med Värdepapperen. Dessa säkringstransaktioner kan inverka negativt på Underliggande och därmed Värdepapperens värde.</p> |

|     |                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-----|----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     |                                                                                  | <p><u>Övriga funktioner som företagen i Vontobelkoncernen kan utföra</u></p> <p>Emittenten och företagen inom Vontobelkoncernen kan även utföra andra funktioner i samband med Värdepapperen, t.ex. som beräkningsagenter eller i egenskap av Market Maker. En sådan funktion kan göra det möjligt för Emittenten och/eller andra företag i Vontobelkoncernen att fastställa sammansättningen av Underliggande eller att beräkna dess värde. Dessa funktioner kan även medföra intressekonflikter, både mellan vederbörande företag inom Vontobelkoncernen och mellan dessa företag och investerarna, vid fastställandet av Värdepapperens pris och vid andra tillhörande fastställande.</p> <p><u>Verksamhet som Market Maker för Värdepapperen</u></p> <p>Bank Vontobel Europe AG kommer att vara market maker för Värdepapperen ("<b>Market Maker</b>"). Genom att tillhandahålla likviditet på detta sätt fastställer Market Maker – med stöd av de övriga företagen i Vontobelkoncernen – Värdepapperens pris på bas av interna prissättningsmodeller och ett antal andra faktorer.</p> <p>Därför är det möjligt att det pris som Market Maker fastställer avviker betydligt från Värdepapperens skäligen värde, eller från det värde man ekonomiskt sett kunde förvänta sig att de borde ha vid en viss tidpunkt. Dessutom kan Market Maker när som helst granska sitt förfarande för fastställande av de angivna priserna, t.ex. genom att bredda eller minska spridningarna mellan anbuds- och erbjudandepreis.</p> <p><u>Betalning av provision, tredje parter eget intresse</u></p> <p>I samband med placering och/eller offentligt erbjudande av Värdepapperen kan Emittenten eller de övriga företagen i Vontobelkoncernen betala provision till tredje parter. Det är möjligt att dessa tredje parter kan tillgodose sina egna intressen i samband med att de fattar ett investeringsbeslut eller investeringsrekommendation.</p> |
| E.7 | Beräknade kostnader som Emittenten eller Anbudsgivaren debiterar av investeraren | <p>– inte tillämpligt –</p> <p>Investeraren kan köpa Värdepapper till emissionspris eller till försäljningspris som anges av Market Maker under Värdepapperens löptid. Priserna innefattar alla Emittentens, Anbudsgivarens och Market Makers för emissionen och distributionen av Värdepapperen (t.ex. försäljnings- och distributionskostnader, struktureringskostnader och säkringskostnader, inklusive vinstmarginal).</p> <p>Förutom Emissionspris eller inköpspris kommer Emittenten och Anbudsgivaren inte att debitera investeraren för några ytterligare kostnader.</p> <p>Uppgifter om eventuella transaktionskostnader bör begäras av vederbörande försäljare eller av investerarens egen bank eller mäklare.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
