I. INTRODUCTION

These final terms (the "Final Terms") have been prepared for the purposes of Article 8 paragraph 4 of Regulation (EU) 2017/1129 (the "Prospectus Regulation"). To obtain all relevant information, the Final Terms should be read together with the base prospectus dated 1 June 2021 (the "Base Prospectus") and any supplements thereto in accordance with Article 23 of the Prospectus Regulation (the "Supplements").

The Base Prospectus and any supplements thereto will be published in electronic form on the website <http://prospectus.vontobel.com> in accordance with Article 21 of the Prospectus Regulation by entering the relevant ISIN.

An issue specific summary is annexed to the Final Terms.

Continuation of the Public Offer

The Base Prospectus (including any Supplements thereto) (the "**Initial Base Prospectus**") is valid until 1 June 2022 in accordance with Article 12 of the Prospectus Regulation. Following this date, the public offer will be continued until the Date of the End of the Public Offer (as defined in section IV.2 of the Final Terms) on the basis of one or more succeeding base prospectuses (each a "**Succeeding Base Prospectus**") in accordance with Article 8 paragraph 11 of the Prospectus Regulation, to the extent the Succeeding Base Prospectus envisages a continuation of the public offer of the Securities. In this context, these Final Terms are, in each case, to be read in conjunction with the most recent Succeeding Base Prospectus. The respective Succeeding Base Prospectus will be approved and published prior to the expiry of the validity of the respective preceding base prospectus. The respective Succeeding Base Prospectus will be published in electronic form on the website <http://prospectus.vontobel.com>.

I. TERMS AND CONDITIONS

The Securities are subject to the **Terms and Conditions in the Base Prospectus dated 1 June 2021**.

The following specifications complete the applicable Terms and Conditions as per the particular features of the Securities offered under these Final Terms:

This and future versions of the index guide, if any, are available on the website indices.vontobel.com by entering the ISIN of the Underlying CH0359727515.

Index Guide for 5X Long Index linked to NVIDIA Corp.

ISIN CH0359727515

This Index Guide describes the composition and calculation of the *Factor Index* specified below. The *Index Calculation Agent* makes the *Index Guide* available on the *Information Page*. The *Index Guide* constitutes the basis for calculating and publishing the *Factor Index*.

Index Name:	5X Long Index linked to NVIDIA Corp. (the " Factor Index ")
Reference Instrument	NVIDIA Corp.
Index Calculation Agent:	Bank Vontobel AG, Gotthardstrasse 43, 8002 Zürich, Switzerland
Information Page:	https://indices.vontobel.com
Identifier:	ISIN: CH0359727515 / WKN: A2BNXV / Valor: 35972751

This Index is part of the family of Vontobel Leveraged Long and Short indices ("**Factor Indices**").

The Factor Indices are not recognized financial indices but are customized indices conceived by Bank Vontobel AG in its capacity as Index Calculation Agent, their sole function being to act as underlying for this type of security (Factor Certificates).

The Index Calculation Agent will perform the calculation and composition of the Factor Index with the utmost care. However, the Index Calculation Agent does not guarantee that the calculation of the indices or of any other parameters required for the composition and calculation, as in accordance with this Index Guide, will be free from error.

Decisions on the manner and method of calculation and composition of its indices are made by the Index Calculation Agent in good faith and based on its best knowledge available. The Index Calculation Agent is neither liable for any damages nor any losses resulting from or associated with the said decisions.

The Index Calculation Agent accepts no liability whatsoever towards third parties for associated direct or indirect damages, resulting from or associated with an inaccurate or erroneous calculation of the indices or any other parameters. Without prejudice to any potential obligations vis-à-vis licensees, the Index Calculation Agent is under no obligation towards third parties, including investors and/or financial intermediaries, to indicate any mistakes or errors related to the Index.

The indices of the Index Calculation Agent do not constitute a recommendation to undertake an investment. In particular, the composition, calculation and publication of the indices are neither to constitute a representation or a warranty nor an opinion on the part of the Index Calculation Agent with regard to the purchase or sale of an index constituents or any financial instrument relating to such index.

The Index and the index family constitute the intellectual property of Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland, which reserves any and all rights in this respect.

The original version of the Index Guide is in German; foreign-language versions constitute non-binding translations.

The composition and calculation of the *Factor Index* specified above is described in the following. The *Index Calculation Agent* will make an index guide available on the *Information Page* for each *Factor Index*, containing this description together with the stipulations in the Final Terms. The index guide constitutes the basis for calculating and publishing the *Factor Index*.

A) INDEX DESCRIPTION

The *Factor Index* reflects price movements in the *Reference Instrument* with a leverage factor of 5. An increase in the price of the *Reference Instrument* since the most recent calculation of an Index Closing Value results in a positive change in the *Factor Index* as compared to the previous price of the *Factor Index* and vice versa. The *Factor Index* therefore replicates a "long" strategy.

The *Factor Index* consists of a leverage component and a financing component.

Leverage component

The leverage component tracks an investment in the *Reference Instrument*, whereby movements in the price of the *Reference Instrument* are multiplied by the *Leverage* (Factor). This leverage effect occurs with either positive or negative movements in the price of the *Reference Instrument*, having a disproportionate effect on the value of the *Factor Index*. For example (leaving aside the financing component):

1. An increase in the price of the *Reference Instrument* (as compared to the most recent *Valuation Price* of the *Reference Instrument*) by 2% results in an increase in the *Factor Index* by 5 x 2%;
2. A decrease in the price of the *Reference Instrument* (as compared to the most recent *Valuation Price* of the *Reference Instrument*) by 2% results in a decrease in the *Factor Index* by 5 x 2%;

Financing component

The financing component tracks the capital costs that would be incurred in the event of a corresponding investment in the *Reference Instrument*. Additionally, a fee charged by the *Index Calculation Agent* for the calculation and administration of the *Factor Index* is added (*Index Fee*).

The financing component therefore reduces the value of the *Factor Index*.

B) INDEX DEFINITIONS

The definitions below shall apply for the purposes of this index description:

"Adjustment Date" means the first *Index Calculation Day* of each calendar month.

"Extraordinary Adjustment Event" means any of the following events as they relate to the *Reference Instrument*:

- (a) capital increase by way of the issue of new shares in return for contributions in cash or in kind with the grant of a subscription right, capital increase from retained earnings, issue of securities with option or conversion rights into shares, distribution of special dividends, share split, subdivision, consolidation or reclassification of the shares;
- (b) spin-off of a division of the company in such a manner that a new independent company is created or the division is absorbed by a third company;
- (c) probable or definitive cessation of stock exchange trading in the shares as a result of a merger by absorption or new company formation or takeover of the company of the underlying by another company;
- (d) any other event which the *Index Calculation Agent* may at its reasonable discretion deem to have a comparable or similar impact on the calculation of the *Factor Index* in the event no adjustment were to be made;

In case of securities representing shares (ADRs/GDRs) as the Reference Instrument, the following provisions (e) to (h) shall additionally apply:

- (e) modification of the terms and conditions of the securities representing shares by their issuers;
- (f) cessation of the stock exchange quotation of the securities representing shares or of the shares underlying them;
- (g) insolvency of the issuer of the securities representing shares;
- (h) end of the term of the securities representing shares as a result of termination by the issuer of the securities representing shares.

In case of securities representing shares (ADRs/GDRs) and other dividend-bearing securities (e.g. profit participation rights, participation certificates) as the Reference Instrument the provisions specified under (a) to (c) shall apply mutatis mutandis with respect to the Reference Instrument and the issuing company.

"Index Base Amount" means 0.00001

"Valuation Price" of the *Reference Instrument* for an *Index Calculation Day* means – subject to an *Extraordinary Adjustment* to the calculation of the index in accordance with section D) – the closing price of the *Reference Instrument*, as determined and published for that day by the *Reference Exchange*.

If an *Index Calculation Day* falls on a day which is not a *Trading Day*, the *Valuation Price* of the immediately preceding *Index Calculation Day* shall continue to apply. If no *Valuation Price* for the *Reference Instrument* is determined or published on a *Trading Day*, the *Index Calculation Agent* shall determine the *Valuation Price* of the *Reference Instrument* for that day on the basis of the most recent prices set for the *Reference Instrument* at its due discretion.

"Dividend" shall mean the dividend of the company, exclusive of which the *Reference Instrument* is traded on the *Reference Exchange* on the *Ex-dividend Day*.

"Dividend Tax Factor" means 0.7 on the *Index Start Date*. The *Index Calculation Agent* may change the *Dividend Tax Factor* at its due discretion on any *Index Calculation Day* with prospective effect if the relevant tax law applicable to the *Index Calculation Agent* changes, resulting in a change in the amount of the – after tax – *Dividend* virtually accruing to it.

"Ex-Dividend Date" means the *Trading Day* on which the *Reference Instrument* trades "ex-dividend" on the *Reference Exchange*.

"Financing Spread" represents (in the form of a premium over the relevant *Interest Rate*) the financing costs which may be incurred if the long strategy tracked by the *Factor Index* is financed with debt.

The *Financing Spread* on the *Index Start Date* corresponds to the *Initial Financing Spread*. The *Index Calculation Agent* then adjusts the **"Current Financing Spread"** in its due discretion on each *Adjustment Date* to reflect current market conditions and publishes it in accordance with section D) of this index description. The adjusted *Financing Spread* shall apply immediately as from the relevant *Adjustment Date*.

"Initial Financing Spread" means 0.40% per annum.

"Trading Day" means every day on which the *Reference Instrument* is traded on the *Reference Exchange*.

"Leverage" means 5. It describes the impact that a change in the price of the *Reference Instrument* has on the relevant *Factor Index*.

"Index Calculation Agent" means Bank Vontobel AG, Gotthardstrasse 43, 8002 Zurich, Switzerland.

"Index Calculation Day" means every day from Monday to Friday.

"Index Fee" means 1.0% per annum. The *Index Fee* is charged each calendar day, beginning as of the *Index Start Date*. It is calculated on the basis of a 360-day year and the most recently calculated *Index Closing Value*.

"Index Closing Value" is calculated for each *Index Calculation Day* by the *Index Calculation Agent* in accordance with section C) 1) of this index description on the basis of the *Valuation Price* of the *Reference Instrument* for this *Index Calculation Day* and published in accordance with section E) of this index description.

"Index Start Date" means 9 March 2017.

"Index Start Value" means 1,000 index points and represents the *Index Closing Value* on *Index Calculation Day* T=0 for the purposes of calculating the index in accordance with C).

"Index Currency" means USD.

"Information Page" means <https://indices.vontobel.com>.

"Reference Instrument Price" corresponds at any time during the trading period on the *Reference Exchange* to the price of the *Reference Instrument* on the *Reference Exchange*, as determined by the *Index Calculation Agent*.

"Reference Exchange" means Nasdaq Global Select Market.

"Reference Instrument" means NVIDIA Corp..

Type:	Registered Share
Currency:	USD
ISIN:	US67066G1040
Bloomberg Symbol:	NVDA UW Equity

"Barrier" means 17%. It indicates the maximum permitted negative change in price of the *Reference Instrument* compared with its most recent *Valuation Price* before an *Intraday Index Adjustment* takes place.

"Derivatives Exchange" means Chicago Board Options Exchange.

"Interest Rate" means SOFR.

The Secured Overnight Financing Rate (SOFR) is an interest rate administered by the Federal Reserve Bank of New York (FRBNY). The interest rate is available for each business day of the US Treasury Bond market on the next business day of the US Treasury Bond market. The methodology for calculating SOFR is available on the FRBNY website and is regularly reviewed.

If the Interest Rate is neither set nor published on an Index Calculation Day, the Interest Rate applied on the immediately preceding Index Calculation Day is used to calculate the Index in accordance with section C).

If the Interest Rate has neither been set nor published for ten consecutive Index Calculation Days or the Interest Rate will cease to exist, the Index Calculation Agent has the right and obligation to stipulate in its reasonable discretion an alternative relevant Interest Rate which has functions comparable to the previous Interest Rate.

C) INDEX CALCULATION

The *Factor Index* shall be calculated for the first time on the *Index Start Date*. The initial level of the *Index* on the *Index Start Date* corresponds to the *Index Start Value*. The respective current index level is calculated by the *Index Calculation Agent* on a continuous basis during the trading period of the *Reference Instrument* on the *Reference Exchange* on each *Index Calculation Day*, rounded to two decimal places and published in accordance with section E).

One index point corresponds to one unit of the *Index Currency*.

C) 1) Index Formula

The *Factor Index* is calculated for each time *t* during an *Index Calculation Day T* in accordance with the following formula, whereby the value of the factor index cannot fall below the Index Base Amount:

$$IDX_t = \max \left\{ IBA; IDX_{T-1} \cdot \underbrace{\left(1 + L \cdot \left(\frac{R_t + divf \cdot div}{R_{T-1}} - 1 \right) \right)}_{\text{leverage component}} - \underbrace{\left[(L-1) \cdot (IR_{T-1} + FS_T) + IG \right] \cdot \frac{d}{360}}_{\text{financing component}} \right\}$$

where:

T:	current Index Calculation Day
IDX_t:	Index Value at time <i>t</i> on Index Calculation Day <i>T</i>
IDX_{T-1}:	Index Closing Value on Index Calculation Day <i>T-1</i> which immediately precedes the current Index Calculation Day
L:	Leverage (Factor): 5
R_t:	Reference Instrument Price at time <i>t</i>
R_{T-1}:	Valuation Price on Index Calculation Day <i>T-1</i>
divf:	Dividend Tax Factor
div:	Dividend on Index Calculation Day <i>T</i> . This amount is 0, except on the Ex-Dividend Date.
IR_{T-1}:	Interest Rate on Index Calculation Day <i>T-1</i>
FS_T:	Financing Spread on Index Calculation Day <i>T</i>
IG:	Index Fee
d:	Number of calendar days between Index Calculation Days <i>T-1</i> and <i>T</i>
IBA:	Index Base Amount

C) 2) Intraday Index Adjustment

If at time *s* on *Index Calculation Day T* the *Reference Instrument Price* (on an *Ex-Dividend Date*, plus *Dividend* multiplied by the *Dividend Tax Factor*: **R_s + divf x div**) falls below the most recent *Valuation Price* of the *Reference Instrument* by more than 17% (*Barrier*), an "**Intraday Index Adjustment**" takes place, simulating a new day:

$$\begin{aligned} s &= T, \text{ i.e. } IDX_{T-1} (\text{new}) = IDX_s \\ R_{T-1} (\text{new}) &= R_{T-1} (\text{old}) \times 0.83 - divf \times div \\ d &= 0 \end{aligned}$$

A new *Valuation Price* valid after time s (R_{T-1} (new)) is calculated by multiplying the previous *Valuation Price* (R_{T-1} (old)) by 0.83. If Index Calculation Day T is an Ex-Dividend Date, the net dividend shall be deducted.

If the *Index Calculation Day* T is an *Ex-dividend Day* the newly simulated *Index Calculation Day* shall no longer be treated as *Ex-Dividend Date*, i.e. *Dividend* and *Dividend Tax Factor* shall not be considered in the index calculation in section C) 1) on such simulated *Index Calculation Day*.

The financing component remains unchanged. No additional costs are incurred for the newly simulated day.

D) EXTRAORDINARY ADJUSTMENT OF THE INDEX CALCULATION

In the event of an *Extraordinary Adjustment Event* occurring in relation to the *Reference Instrument*, the *Index Calculation Agent* will adjust the index calculation on the *Reference Date* (as defined below). The *Index Calculation Agent* will – to the extent possible – endeavour to calculate the *leverage component* as if no *Extraordinary Adjustment Event* had occurred.

The *Index Calculation Agent* will generally adjust the index calculation by correcting in its due discretion the relevant *Valuation Price* for the *Reference Instrument* on *Index Calculation Day* $T-1$ on the *Reference Date*, in order to factor into the index calculation the adjustments made on the *Derivatives Exchange* for futures and options linked to the *Reference Instrument* traded there.

The *Index Calculation Agent* may adjust the index calculation in some other manner if it deems this necessary in its due discretion in order to account for differences between this Factor Index and the futures and options traded on the *Derivatives Exchange*. Such adjustments may in particular relate to the *Reference Instrument* being replaced by a basket of shares, securities representing shares or other dividend-bearing securities or in the event of a merger by an appropriate number of shares, securities representing shares or other dividend-bearing securities issued by the absorbing or newly formed company and where necessary stipulating a different *Reference Exchange*, *Derivatives Exchange* and *Reference Instrument Price*.

The list of *Extraordinary Adjustment Events* listed in section B) is not exhaustive. The deciding factor is whether the *Derivatives Exchange* deems an adjustment of the contract size, an underlying or the involvement of relevant *Reference Exchange* determining the price of the *Reference Instrument* to be necessary. If neither futures nor options linked to the *Reference Instrument* are traded on the *Derivatives Exchange*, the adjustment shall be made in a manner in which the *Derivatives Exchange* would do so if corresponding futures or options were traded there. In cases of doubt about the application of the adjustment rules of the *Derivatives Exchange*, the *Index Calculation Agent* shall decide such questions in its reasonable discretion. The rules and regulations of the *Derivatives Exchange* shall apply in addition to the provisions set out above.

In the event that the company issuing the *Reference Instrument* underlying the Factor Index is liquidated or if insolvency, winding-up or similar proceedings are instituted against the assets of the company or if the possibility that such proceedings will be initiated becomes known, the price of the *Reference Instrument* will continue to be factored into the index calculation for as long as the price of the *Reference Instrument* continues to be determined on the *Reference Exchange*. However, if pricing in such a case is temporarily or permanently suspended, the leverage component shall remain unchanged and the index level will be determined solely on the basis of the other components of the index formula.

"Reference Date" within the meaning of this index description means the first *Index Calculation Day*, on which the relevant futures or options are traded on the *Derivatives Exchange* after taking the adjustment into account, or would be so traded if corresponding futures or options were traded on the *Derivatives Exchange*.

Adjustments relating to the Factor Index and all other measures taken under this section will be published by the Index Calculation Agent in accordance with section E).

E) NOTICES

All notices pertaining to the *Factor Index* will be published on the *Information Page*. Such notices shall be deemed to have been given on the date on which they are first published.

Notices are made for informational purposes only and do not represent a precondition for legal effectiveness.

What are the key risks that are specific to the Issuer?

The key risks that are specific to the Issuer may be summarised as follows:

- The Security holders bear the risk of bankruptcy of the Issuer (default risk). Securities holders are exposed to the risk that the Issuer cannot meet its obligations arising from the Securities, for example in the event of insolvency (illiquidity / overindebtedness). Insolvency of the Issuer can even lead to the complete loss of the principal amount that Security holders paid when purchasing the securities (**risk of total loss**).

Section C – Brief description of the Securities

What are the main features of the Securities?

Type and class of the Securities

The Securities are debt instruments in dematerialised registered form, evidenced by book-entries, governed by German law.

Rights attached to the Securities

The Securities constitute the right of the Security holder to receive from the Issuer per Security the payment of the Redemption Amount in Euro in accordance with the Terms and Conditions of the Securities and subject to the performance of the Underlying.

The objective of this product is to provide you with disproportionate (leveraged) participation in any price movement of the Underlying's Reference Instrument. This has the effect, inter alia, that you are exposed to a very high risk of a total loss of your investment. The product is a complex financial instrument linked to one Underlying (5X Long Index linked to NVIDIA Corp.).

The product does not have a fixed term. You may exercise the product on any Exercise Date. The Issuer has the right to terminate the product on any Termination Date. After exercise or termination, you will receive a Redemption Amount on the relevant Redemption Date. The redemption amount will correspond to the Reference Price of the Underlying on the relevant Exercise or Termination Date, multiplied by the Ratio.

Underlying The Underlying is linked to the Reference Instrument and is calculated by the Index Calculation Agent. It reflects price movements in the Reference Instrument leveraged by a factor of 5 (Leverage).

An increase in the price of the Reference Instrument since the most recent calculation of an Underlying closing value results in a positive change of the Underlying as compared to the previous price of the Underlying and vice-versa. The Underlying therefore replicates a "long" strategy. The Underlying consists of a leverage component and a financing component.

The leverage component tracks an investment in the Reference Instrument, whereby movements in the price of the Reference Instrument are multiplied by the Leverage. This leverage effect occurs with either positive or negative movements in the Reference Instrument, having a disproportionate effect on the value of the Underlying. For example (leaving aside the financing component):

- A decrease in the price of the Reference Instrument by 2% results in a decrease in the Underlying by 5 x 2%;
- An increase in the price of the Reference Instrument by 2% results in an increase in the Underlying by 5 x 2%;

Movements of the price of the Reference Instrument are always tracked with reference to its most recent Valuation Price. In case of a sharp decline of the Reference Instrument reaching the Barrier such level of the Reference Instrument is set as new Valuation Price. This automatic intraday adjustment is designed to prevent the Underlying from reaching negative values. However, the mechanism does not prevent you from suffering a loss up to total loss.

The financing component reflects the capital costs (see Interest Rate and Financing Spread below) that would be incurred to finance the corresponding investment in the Reference Instrument. In addition, the Index Calculation Agent charges a fee for the calculation and administration of the Underlying (Index Fee). The financing component therefore reduces the value of the Underlying and the product.

Interest Rate, Financing Spread and Index Fee are included in the calculation of the Underlying daily on a pro-rata basis. Due to the daily adjustment of the Valuation Price, the Underlying and the Reference Instrument generally do not move in parallel over a period longer than one day; the likelihood that they will follow significantly different courses increases with each passing day. In particular, daily up-and-down fluctuations of the Reference Instrument will lead to completely different price movements of the Underlying and the Reference Instrument within a few days; this can result in a decrease of the price of the Underlying although the Reference Instrument price increases over a particular period of time.

Due to the leverage effect in the Underlying, price losses of the Reference Instrument can significantly increase price losses on the product. If the price of the Reference Instrument decreases significantly, the value of the Underlying will fall to a very low level. Subsequent – even significant – gains in the price of the Reference Instrument would only have a minor effect on the recovery of the Underlying as the starting level for a recovery in the value of the Underlying would then be very low due to the daily (or even intraday) adjustment of the Underlying to the most recent Valuation Price of the Reference Instrument.

The redemption amount will be translated from the currency of the Underlying into the currency of the product.

Upon the occurrence of certain extraordinary events, the Issuer is entitled under the terms and conditions of the Securities to adjust the terms and conditions of the securities (in particular to exchange the underlying instrument) or to terminate the Securities extraordinarily. The Issuer shall have the right to call the Securities in their entirety for ordinary notice against payment of the ordinary termination amount (which shall be calculated in the same manner as the redemption amount) and to terminate the term of the Securities.

Applicable law

The form and content of the Securities as well as all rights and obligations of the Issuer and the Security holders are determined in accordance with German law, except that the registration of the Securities is governed by Finnish law.

Ranking

The obligations arising from the Securities constitute direct and unsecured liabilities of the Issuer, which rank equally among themselves and with all other unsecured and unsubordinated liabilities of the Issuer, with the exception of those liabilities, which have priority by virtue of mandatory legal provisions.

Where will the Securities be traded?

Application for admission to trading on a regulated market or multilateral trading facility (MTF)

No application will be made for the admission of the Securities to trading on a regulated market. The Securities are subject to an application to admission or inclusion to trading on the following multilateral trading facilities (MTF): Nordic Growth Market (Nordic MTF Finland). Trading is expected to start on 13 May 2022.

Is there a guarantee attached to the Securities?

Nature and scope of the guarantee

Vontobel Holding AG, Zurich, Switzerland (the "**Guarantor**") guarantees the proper payment of all amounts payable by the Issuer in accordance with the terms and conditions of the Securities issued under the Base Prospectus. The guarantee represents an independent guarantee under Swiss law; all rights and obligations arising from this are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the guarantee. The place of jurisdiction is Zurich 1.

Description of the Guarantor

Guarantor is Vontobel Holding AG, Gotthardstrasse 43, 8002 Zurich, Switzerland; Legal Entity Identifier (LEI) 529900G69W5VR3DDPW23. The Guarantor is the parent company of the Vontobel Group, which consists of banks, capital market companies and other domestic and foreign companies. The Guarantor holds all shares in the Issuer. The shares of Vontobel Holding AG are listed on the SIX Swiss Exchange in Zurich.

Most material risks factors pertaining to the Guarantor

The most material risk factors pertaining to the Guarantor may be summarised as follows:

- The Security holders bear the risk of bankruptcy of the Guarantor (default risk). Securities holders are exposed to the risk that the Guarantor cannot meet its obligations arising from the Securities, for example in the event of insolvency (illiquidity / overindebtedness). Insolvency of the Issuer and the Guarantor can even lead to the complete loss of the principal amount that Security holders paid when purchasing the securities (**risk of total loss**). Furthermore, Security holders may become subject to resolution measures in relation to the Guarantor if the Guarantor is failing or likely to fail.
- The Security holders bear risks in connection with the enforcement of legal claims with regard to the guarantee, e.g. increased costs.

What are the key risks that are specific to the Securities?

The key risks that are specific to the Securities may be summarised as follows:

- Risks resulting from the payment profile of the Securities**
 - Risk of total loss: It should be noted as a general principle that the Securities are particularly risky investment instruments with the consequence that the capital invested by the investor may be totally lost (risk of total loss).
 - Disproportionate risk of loss due to the leverage effect: A feature common to all types of Factor Indices is that the movements in the price of the Reference Instrument are multiplied by a degree of leverage (Factor). As a result of this leverage effect, the Securities entail disproportionate risks of loss. The investor must consider that even sideways movements (the price rises and falls alternately) in the Reference Instrument may result in price losses.
 - Risk relating to the level of the Cash Amount / payment on exercise by the Security holder: The purchase of the Securities grants the investor the right to the payment of a cash amount, calculated in each case depending on the performance of the Underlying to which the Security is linked (multiplied by the Ratio). There is no guarantee that the Securities will be repaid at their respective purchase price or at a certain amount defined for the Security.
 - Risks in connection with the intraday index adjustment: The index description for all types of Factor Indices provides for an intraday index adjustment if the losses in the Index reach a certain threshold or barrier. However, this mechanism can only mitigate further losses in the Index and resulting further losses in value of the Security. The losses may nevertheless be substantial. Therefore, the barrier does not constitute a "safety buffer".

- Risks in connection with the financing component: A financing component is also taken into account for the purposes of calculating the Index. The financing component consists of two elements: (i) the index fee which always reduces the value of the Index, and (ii) the income and expenses that would arise in the event of a theoretical, leveraged investment in the Reference Instrument. The amounts of the income and costs may change over time. If the costs are higher than the income, this will reduce the value of the Factor Index.
- Risk of Index fees: The investor must consider that, for the purposes of calculating the Index, an ongoing fee for the administration and calculation of the Factor Index is deducted from the level of the Factor Index. The deduction of the index fee generally results in a reduction in the value of the Factor Index and therefore also of the Securities.
- **Risks resulting from the conditions of the Securities**
 - Risks in connection with adjustments, market disruptions, ordinary and extraordinary termination and settlement: Security holders bear the risk that the Securities are adjusted or terminated. Furthermore, there is also the risk that the occurrence of a market disruption could reduce the value of the Securities. In addition, a market disruption may delay the redemption or repayment of the Securities. If the conditions of the Securities provide for extraordinary termination by the Issuer, the Security holder bears a risk of loss as the termination amount equals the market price of the Securities, which can be even zero. The Security holder also bears the reinvestment risk in relation to the termination amount.
- **Risks in connection with the investment in, the holding and selling of the Securities**
 - Risks in connection with trading in the Securities, liquidity risk: Security holders bear the risk that there is no liquid market for trading in the Securities. This means that Security holders cannot sell the Securities at a specific time or at a specific price.
- **Risks in connection with the price determination for the Securities and potential conflicts of interest**
 - Risks in connection with potential conflicts of interest: The Issuer, the Guarantor and other companies of the Vontobel Group may pursue interests that conflict with or do not take into account the interests of the Security holders. This may be in connection with the exercise of other functions or in carrying out further transactions. Potential conflicts of interest may adversely affect the value of the Securities and/or the Cash Amount under the Securities.
- **Risks in connection with the the Underlying and the Reference Instrument**
 - Risks in connection with the linking of the Factor Index to a Reference Instrument: The performance of the Securities is primarily dependent on the underlying Factor Index, while its performance is in turn primarily dependent on the value of the Reference Instrument. Depending on the impact of the risks on the level or price of the Reference Instrument and thus directly on the value of the Underlying, the realization of these risks may result in a total or partial loss of the investment for the investor.
- **Risks which apply to all or several Underlyings**
 - Risks in connection with psychological effects: The price of an Underlying can fluctuate strongly due to psychological effects related, for example, to sentiments, opinions and rumors in the market, which may have an impact on the performance of the Securities.
 - Volatility risk: Due to the volatility of an Underlying, high losses in the Securities may occur.

Section D – Key information on the offer of the Securities to the public and/or the admission to trading on a regulated market

Under which conditions and timetable can investors invest in this Security?

General terms, conditions and expected timetable of the offer

The offer of the Securities will be made from 12 May 2022 in Finland.

The issue price is EUR 0.25. The bid and ask price of the Securities is continuously set by the Market Maker. Market Maker is Bank Vontobel Europe AG, Frankfurt am Main, Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany.

The Securities may not be offered or sold unless all applicable laws and regulations in the jurisdiction in which a purchase, offer, sale or delivery of Securities is made or in which this document is distributed or held have been complied with and all consents or approvals required by applicable laws in that jurisdiction for the purchase, offer, sale or delivery of the Securities have been obtained.

Details of the admission to trading on a regulated market or on a multilateral trading facility (MTF)

An application for admission to trading on a regulated market or on a multilateral trading facility (MTF) has been or will be made. Such admission need not be maintained on a permanent basis. If the admission ceases to exist, the acquisition and sale of the Securities may be considerably more difficult for the investor. Even if admission is maintained, investors should note that this is not necessarily associated with high trading volumes in the respective Securities. The trading of Securities is subject to numerous legal and stock exchange regulations. Before acquiring the Securities, investors should familiarise themselves with the regulations applicable (such as, for example, the regulations on the cancellation of trading transactions that have been concluded at prices not in line with the market, so-called mistrades).

Estimated expenses charged to the investor

Investors will receive further information on any remuneration, commissions, fees and costs charged to investors, for example by their bank, advisor or financial services provider (distribution partner), from these parties upon request.

Who is the Offeror and/or the person asking for admission to trading?

Offeror of the Securities is Bank Vontobel Europe AG acting through its Frankfurt am Main Branch, Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Offeror is a stock corporation (AG) under German law. The registered office of the Offeror is: Alter Hof 5, 80331 Munich, Germany. The Offeror is registered in the Commercial Register of the local District Court, (*Amtsgericht*) of Munich, Germany. under the registration number HRB 133419. The Legal Entity Identifier (LEI) of the Offeror is 529900KKJ9XOK6WO4426.

Why is this prospectus being produced?**Use and estimated net amount of the proceeds**

The issue of the Securities is part of the Issuer's ordinary business activities and is made for the purpose of generating profits and/or hedging certain risks of the Issuer.

Underwriting agreement on a firm commitment basis

There is no underwriting agreement with a firm underwriting commitment in connection with the securities offered.

Most material conflicts of interest pertaining to the offer or the admission to trading

The Issuer and other companies within the Vontobel Group may pursue interests that conflict with the interests of the Security holders or do not take these into account. This may occur in connection with the exercise of other functions or when carrying out further transactions.

Bank Vontobel Europe AG, Munich, or another company of the Vontobel Group may act as market maker for the Securities. The market maker is responsible for setting the prices of the securities ("market making"). The market prices provided by the market maker will not always correspond to the market prices that would have been formed without this market making and in a liquid market.

Companies within the Vontobel Group may also perform another function in relation to the Securities, e.g. as calculation agent, index calculation agent, index sponsor or participant in the selection process of a proprietary index or basket. Such a function may enable the company of the Vontobel Group to determine the composition of the underlying instrument or to calculate its value.

Companies within the Vontobel Group may conclude transactions relating to the underlying or its components. This also includes transactions by the issuer that hedge its obligations under the Securities. The value of the Securities may be affected by the termination of some or all of these hedging transactions. Companies within the Vontobel Group may receive non-public information relating to the underlying and are not obliged to pass on such information to an investor in the Securities. For example, companies in the Vontobel Group may issue research reports in relation to the underlying or its components.

Liikkeeseenlaskijaan liittyvät keskeiset riskit voidaan tiivistää seuraavasti:

- Arvopaperinhaltijat kantavat Liikkeeseenlaskijan konkurssiin liittyvän riskin (maksulaiminlyönnin riski). Arvopaperinhaltijat altistuvat riskille, että Liikkeeseenlaskija saattaa olla kyvytön täyttämään Arvopapereihin liittyvät velvoitteensa esimerkiksi maksuvalmiuteen liittyen (maksukyvyttömyys / ylivelkaisuus). Liikkeeseenlaskijan maksukyvyttömyys voi johtaa myös Arvopaperinhaltijoiden arvopapereiden oston yhteydessä maksaman koko pääoman menettämiseen (täydellisen tappion riski).

Jakso C – Lyhyt kuvaus Arvopapereista

Arvopapereiden keskeiset ominaisuudet

Arvopapereiden keskeiset ominaisuudet

Arvopaperit ovat velkainstrumentteja aineettomasti rekisteröidyssä muodossa, joista on todisteena Saksan lakien mukaisia arvo-osuuksia.

Arvopapereihin liittyvät oikeudet

Arvopaperit muodostavat Arvopaperinhaltijan oikeuden saada Liikkeeseenlaskijalta Arvopaperikohtainen Lunastusmäärä Euro Arvopapereiden ehtojen ja Kohde-etuuden tuoton mukaisesti.

Tuotteen tavoitteena on tarjota sijoittajalle epäsuhtainen (vivutettu) osallistuminen kohde-etuutena olevan viiteinstrumentin mahdolliseen hintakehitykseen. Vipuvaikutuksen vuoksi sijoittajalla on erittäin suuri riski menettää koko sijoituksensa. Tuote on monimutkainen rahoitusväline, joka on sidoksissa yhteen kohde-etuuteen (5X Long Index linked to NVI-DIA Corp.).

Tuotteella ei ole kiinteää juoksuaikaa. Sijoittaja voi toteuttaa tuotteen minä tahansa toteutuspäivänä. Liikkeeseenlaskijalla on oikeus eräännyttää tuote minä tahansa eräännytyspäivänä.

Toteutuksen tai eräännytyksen jälkeen sijoittajalle maksetaan lunastusmäärä kyseisenä lunastuspäivänä. Lunastusmäärä on kohde-etuuden viitehintaa kyseisenä toteutus- tai eräännytyspäivänä kerrottuna suhdeluvulla.

Kohde-etuus Kohde-etuus on sidoksissa viiteinstrumenttiin, ja kohde-etuuden laskennan suorittaa indeksin laskenta-asiamies. Kohde-etuus kuvastaa viiteinstrumentin hinnanmuutoksia, ja mukana on vipuvaikutus, jonka suuruus on 5 (vipu).

Viiteinstrumentin hinnan nousu kohde-etuuden päätöshinnan viimeisimmän laskennan jälkeen aiheuttaa kohde-etuuden arvon positiivisen muutoksen verrattuna kohde-etuuden edelliseen hintaan ja päinvastoin. Kohde-etuus siis toistaa "pitkää" strategiaa. Kohde-etuus koostuu vipukomponentista ja rahoituskomponentista.

Vipukomponentti seuraa sijoitusta viiteinstrumenttiin, ja viiteinstrumentin hinnanmuutokset kerrotaan vipusuhteella. Tämä vipuvaikutus esiintyy viiteinstrumentin arvon joko noustessa tai laskiessa, ja sen vaikutus kohde-etuuden arvoon ei ole tasan suhtainen. Esimerkiksi (kun rahoituskomponenttia ei oteta huomioon):

- 2% lasku viiteinstrumentin hinnassa laskee kohde-etuuden arvoa $5 \times 2\%$;
- 2% nousu viiteinstrumentin hinnassa lisää kohde-etuuden arvoa $5 \times 2\%$.

Viiteinstrumentin hinnanmuutoksia seurataan suhteessa sen viimeisimpään arvostushintaan. Jos kyseessä on viiteinstrumentin hinnan jyrkkä lasku, joka saavuttaa rajatason, viiteinstrumentin hintataso asetetaan uudeksi arvostushinnaksi. Tämän automaattisen päivänsäisen korjauksen tarkoitus on estää kohde-etuuden arvon laskemista negatiiviseksi. Mekanismin ei kuitenkaan poista sijoittajalle aiheutuvien tappioiden ja jopa koko sijoituksen menettämisen mahdollisuutta.

Rahoituskomponentti kuvastaa pääomakustannuksia (ks. Korkotaso ja rahoituksen hintaero alla), jotka syntyisivät vastavasta sijoituksesta viiteinstrumenttiin. Indeksien laskenta-asiamies veloittaa lisäksi palkkion kohde-etuuden laskemisesta ja hallinnoinnista (indeksipalkkio). Rahoituskomponentti vähentää siten kohde-etuuden arvoa ja tuotteen arvoa.

Korkotaso, rahoituksen hintaero ja indeksipalkkio otetaan huomioon kohde-etuuden laskennassa päivittäin pro rata -periaatteella.

Koska arvostushintaa korjataan päivittäin, kohde-etuuden ja viiteinstrumentin arvot eivät yleensä kehity samaan suuntaan yhtä päivää pitempään, ja todennäköisyys niiden erisuuntaiselle kehitykselle kasvaa päivä päivältä. Erityisesti viiteinstrumentin arvon päivittäisestä vaihtelusta seuraa, että kohde-etuuden ja viiteinstrumentin hinnanmuutokset ovat muutaman päivän kuluttua täysin erilaiset. Tämän vuoksi kohde-etuuden hinta voi laskea, vaikka viiteinstrumentin hinta nousee tietyn ajanjaksona.

Kohde-etuuden vipuvaikutuksen vuoksi viiteinstrumentin hinnanlaskut voivat suurentaa tuotteen hinnanlaskuja huomattavasti. Jos viiteinstrumentin hinta laskee merkittävästi, kohde-etuuden arvo laskee hyvin alhaiselle tasolle. Viiteinstrumentin myöhemmät hinnannousut (vaikka ne olisivat huomattaviakin) vaikuttavat kohde-etuuden arvonnousuun vain vähän, koska kohde-etuuden hinnan palautuminen alkaisi hyvin alhaiselta tasolta sen vuoksi, että kohde-etuuden arvoa korjataan päivittäin (tai jopa päivänsäisesti) vastaamaan viiteinstrumentin viimeisintä arvostushintaa.

Lunastussumma muunnetaan Kohde-etuuden valuutasta tuotteen valuuttaan.

Poikkeuksellisten tapahtumien toteutuessa Liikkeeseenlaskijalla on Arvopapereiden ehtojen mukaan oikeus muuttaa Arvopapereiden ehtoja (ja erityisesti vaihtaa kohdeinstrumenttia) tai eräännyttää arvopaperit poikkeuksellisesti. Liikkeeseenlaskijalla on oikeus ostaa kaikki arvopaperit säännönmukaisesti maksamalla säännönmukainen eräännyttämisen määrä (joka lasketaan samalla tavalla kuin lunastusmäärä) ja päättää Arvopapereiden juoksuaika

Arvopapereihin liittyvät oikeudet

Arvopapereiden muoto ja sisältö sekä Liikkeeseenlaskijan ja Arvopaperinhaltijoiden oikeudet ja velvollisuudet määräytyvät Saksan lakien mukaan, lukuun ottamatta Arvopapereiden rekisteröintiä, johon sovelletaan Suomen lakeja.

Etuoikeusasema

Arvopapereista johtuvat velvoitteet ovat Liikkeeseenlaskijan suoria ja vakuudettomia velvoitteita, jotka ovat samalla sijalla vailla keskinäistä etusijaa sekä samalla sijalla Liikkeeseenlaskijan kaikkien muiden vakuudettomien velvoitteiden kanssa, joiden etuoikeusasema ei ole takasijainen, lukuun ottamatta velvoitteita, jotka pakollisten lakisääteisten vaatimusten vuoksi ovat etusijalla.

Hakemus kaupankäynnin kohteeksi ottamisesta säännellyillä markkinoilla tai monenkeskisessä kaupankäyntijärjestelmässä (MTF)

Arvopapereiden kaupankäynnin kohteeksiottamista säännellyillä markkinoilla ei ole haettu. Arvopapereista on tehty hakemus kaupankäynnin kohteeksi ottamisesta tai kaupankäyntiin sisällyttämisestä seuraavilla monenkeskisissä kaupankäyntijärjestelmissä (MTF): Nordic Growth Market (Nordic MTF Finland). Kaupankäynnin oletettu alkamisajankohta on 13. toukokuuta 2022.

Arvopapereihin liittyvät takaukset

Takauksen luonne ja soveltamisala

Vontobel Holding AG, Zürich, Sveitsi ("**Takaaja**") takaa kaikkien Liikkeeseenlaskijan Ohjelmaesitteen perusteella liikkeeseen laskettujen ja Arvopapereiden ehtojen mukaisesti maksettavaksi kuuluvien summien asianmukaisen maksamisen. Takausta on Sveitsin lainsäädännön piiriin kuuluva riippumaton takaus, ja kaikkiin siitä johtuviin velvoitteisiin ja oikeuksiin sovelletaan kaikilta osin Sveitsin lakeja. Zürichin Kantonin tuomioistuimilla on yksinomainen toimivalta kaikissa takaukseen liittyvissä kanteissa ja oikeudenkäyntiasioissa. Oikeuspaikka on Zürich 1.

Takaajan tiedot

Takaaja on Vontobel Holding AG, Gotthardstrasse 43, 8002 Zürich, Sveitsi; oikeushenkilötunnus (LEI) 529900G69W5VR3DDPW23. Takaaja on pankeista, pääomamarkkinoilla toimivista yrityksistä ja muista sveitsiläisistä ja ulkomaisista yrityksistä koostuvan Vontobel-konsernin emoyhtiö. Takaaja omistaa kaikki Liikkeeseenlaskijan osakkeet. Vontobel Holding AG:n osakkeet on listattu SIX Swiss Exchangessa Zürichissä.

Takaajaan liittyvät olennaisimmat riskitekijät

Takaajaan liittyvät olennaisimmat riskitekijät voidaan tiivistää seuraavasti:

- Arvopaperinhaltijat kantavat Takaajan konkurssiin liittyvän riskin (maksulaiminlyönnin riski). Arvopaperinhaltijat altistuvat riskille, että Takaaja saattaa olla kyvytön täyttämään Arvopapereihin liittyvät velvoitteensa esimerkiksi maksuvalmiuteen liittyen (maksukyvyttömyys / ylivelkaisuus). Liikkeeseenlaskijan ja takaajan maksukyvyttömyys voi johtaa myös Arvopaperinhaltijoiden arvopapereiden oston yhteydessä maksaman koko pääoman menettämiseen (täydellisen tappion riski). Lisäksi Arvopaperinhaltijoihin voi kohdistua Takaajaan liittyviä kriisinratkaisutoimenpiteitä, jos Takaaja on vaikeuksissa tai todennäköisesti ajautuu vaikeuksiin.
- Arvopaperinhaltijat kantavat riskin takaukseen liittyvien oikeusvaateiden täytäntöönpanosta, jotka voivat muun muassa lisätä aiheutuvia kustannuksia.

Arvopapereihin liittyvät keskeiset riskit

Arvopapereihin liittyvät keskeiset riskit voidaan tiivistää seuraavasti:

- **Arvopapereiden maksuprofiilista johtuvat riskit**
 - Täydellisen tappion riski: On hyvä huomata, että Arvopaperit ovat erityisen riskialttiita instrumentteja, joten sijoittaja voi menettää koko sijoittamansa pääoman (täydellisen tappion riski).
 - Vipuvaikutuksen aiheuttama epäsuhtainen menetyriski: Yhteinen ominaisuus kaiken tyyppisille Kerroinindekseille on, että Viiteinstrumentin hinnan vaihtelut kerrotaan vipuvaikutuksen määrällä ("kerroin", "Factor"). Vipuvaikutuksen tuloksena Arvopaperit aiheuttavat epäsuhtaisia tappioriskejä. Sijoittajan on huomattava, että jopa Viiteinstrumentin sivuttaiset liikkeet (hinta nousee ja laskee jatkuvasti) voivat aiheuttaa hinnanmenetyksiä.
 - Käteismäärän tasoon liittyvät riskit / Arvopaperinhaltijan maksu käytöstä: Arvopapereiden osto antaa sijoittajalle oikeuden käteissumman maksuun, joka on laskettu tapauksittain ja riippuen sen Kohde-etuuden tuotosta, johon Arvopaperi on yhdistetty (suhdeluvulla kerrottuna). Ei ole takuita, että Arvopapereista saisi niiden vastaavan ostohinnan tai tietyn Arvopaperille määritellyn määrän.
 - Päivänsisäiseen indeksimukautukseen liittyvät riskit: Kaiken tyyppisten Kerroinindeksien kuvaus tarjoaa päivänsisäisen indeksimukautuksen, jos Indeksien tappiot nousevat tietyn kynnyksarvon tai rajatason yli. Tämä mekanismi voi kuitenkin vain lieventää tulevia Indeksitappioita ja tulevia Arvopaperin arvoon liittyviä tappioita. Tappiot voivat olla merkittäviä. Sen vuoksi rajataso ei ole "turvaeste".
 - Rahoituskomponenttiin liittyvät riskit: Rahoituskomponentti huomioidaan Indeksien laskennassa. Rahoituskomponentit koostuvat kahdesta elementistä: (i) indeksipalkkiosta, joka vähentää aina Indeksien arvoa, ja (ii) tuloista ja kuluista, jotka syntyisivät, jos viiteinstrumenttiin tehdään teoreettinen, vipuvaikutuksella tehty sijoitus. Tulojen ja kulujen määrät voivat muuttua ajan mittaan. Jos kulut ovat tuloa korkeammat, se vähentää Kerroinindeksien arvoa.
 - Indeksipalkkioriski: Sijoittajan on huomioitava, että Indeksien laskemiseksi Kerroinindeksien tasosta vähennetään jatkuva palkkio Kerroinindeksien laskemisesta ja hallinnoinnista. Indeksipalkkion vähennys aiheutuu yleensä Kerroinindeksien arvon vähennyksestä ja sen vuoksi myös Arvopapereista.

- **Arvopapereiden ehdoista johtuvat riskit**
 - Oikaisuihin, markkinahäiriöihin, säännönmukaiseen ja poikkeukselliseen eräännyttämiseen ja selvitykseen liittyvät riskit: Arvopaperinhaltijat kantavat Arvopapereiden oikaisuun tai eräännyttämiseen liittyvän riskin. Lisäksi on myös riski markkinahäiriöistä johtuvasta Arvopapereiden arvon alentumisesta. Markkinahäiriö voi myös viivästyttää Arvopapereiden lunastusta tai takaisinmaksua. Jos Arvopapereiden ehdot mahdollistavat Liikkeeseenlaskijan suorittaman poikkeuksellisen eräännyttämisen, Arvopaperinhaltija kantaa tappion riskin siitä, että maksettavan eräännytyksen määrä vastaa Arvopapereiden markkinahintaa, joka voi olla jopa nolla. Arvopaperinhaltija kantaa eräännytykseen määrään liittyvän uudelleensijoittamisen riskin.
- **Arvopapereihin sijoittamiseen, omistamiseen ja myymiseen liittyvät riskit**
 - Arvopaperikauppaan liittyvät riskit, likviditeettiriski: Arvopaperinhaltijat kantavat riskin siitä, että likvidit markkinat arvopaperikaupalle puuttuvat. Tämä tarkoittaa, että Arvopaperinhaltijat eivät voi myydä Arvopapereita tiettyyn aikaan tai tiettyyn hintaan:
- **Arvopaperin hinnan määrittämiseen ja mahdollisiin eturistiriitoihin liittyvät riskit**
 - Mahdollisiin eturistiriitoihin liittyvät riskit: Liikkeeseenlaskijalla, Takaajalla ja muilla Vontobel-konsernin yhtiöillä voi olla myös muita etuja, jotka ovat ristiriidassa tai jotka eivät huomioi Arvopaperinhaltijoiden etuja. Nämä voivat liittyä muuhun toimintaan tai muiden toimien suorittamiseen. Mahdolliset eturistiriidat saattavat vaikuttaa haitallisesti Arvopapereiden arvoon ja/tai Arvopapereihin perustuvaan Käteismäärään.
- **Kohde-etuuteen ja Viiteinstrumenttiin liittyvät riskit**
 - Viiteinstrumenttiin sidoksissa olevaan Kerroinindeksiin liittyvät riskit: Arvopapereiden kehitys riippuu ensisijaisesti Kohde-etuuden Kerroinindeksistä, jonka kehitys puolestaan riippuu ensisijaisesti Viiteinstrumentin arvosta. Riskien toteutuminen voi johtaa täydelliseen tai osittaiseen sijoittajan sijoituksen menettämiseen riippuen siitä, miten nämä riskit vaikuttavat Viiteinstrumentin tasoon tai hintaan ja siten suoraan myös Kohde-etuuden arvoon.
- **Kaikkiin tai useisiin Kohde-etuuksiin liittyvät riskit**
 - Psykologisiin vaikutuksiin liittyvät riskit: Kohde-etuuden hinta voi vaihdella voimakkaasti psykologisten vaikutusten vuoksi, jotka liittyvät esimerkiksi markkinoiden näkemyksiin, mielipiteisiin tai huhuihin, mikä puolestaan voi vaikuttaa Arvopapereiden kehitykseen.
 - Volatiliteettiriski: Kohde-etuuden volatiliteetti voi aiheuttaa huomattavia Arvopaperitappioita.

Jakso D – Keskeiset tiedot Arvopapereiden yleisölle tarjoamisesta ja/tai kaupankäynnin kohteeksi ottamisesta säännellyllä markkinalla

Arvopaperiin sijoittamisen ehdot ja aikataulu

Tarjousehdot ja oletettu aikataulu

Arvopapereita tarjotaan alkaen 12. toukokuuta 2022 in Suomessa.

Liikkeeseenlaskuhinta on EUR 0,25. Arvopapereiden osto- ja myyntihinta on Markkinatakaajan määrittämä. Markkinatakaaja on Bank Vontobel Europe AG, Frankfurt am Main Branch, Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Saksa.

Arvopapereita ei saa tarjota eikä myydä, ellei kaikkia Arvopapereiden osto-, tarjous-, myynti- tai toimitusalueen tai tämän asiakirjan jakelu- tai säilytysalueen sovellettavia lakeja ja säädöksiä noudateta, ja ellei kaikkia sovellettavan lainsäädännön edellyttämiä suostumuksia ja hyväksyntöjä Arvopapereiden oston, tarjouksen, myynnin tai toimituksen oikeustoimialueella ole hankittu.

Tiedot kaupankäynnin kohteeksi ottamisesta säännellyillä markkinoilla tai monenkeskisessä kaupankäyntijärjestelmässä (MTF)

Hakemus kaupankäynnin kohteeksi ottamisesta säännellyillä markkinoilla tai monenkeskisessä kaupankäyntijärjestelmässä (MTF) on tehty tai tullessa tekemään. Hyväksyntää ei tarvitse pitää voimassa jatkuvasti. Jos hyväksyntä raukeaa, Arvopapereiden ostaminen ja myyminen voi olla sijoittajalle huomattavasti hankalampaa. Jos hyväksyntä ylläpidetään, sijoittajien tulee muistaa, että sillä ei välttämättä ole yhteyttä vastaavien Arvopapereiden merkittäviin kaupankäyntivolyymeihin. Arvopapereiden kaupankäyntiin sovelletaan useita erilaisia lakeja ja pörssisääntöjä. Ennen Arvopapereiden ostamista sijoittajien tulisi perehtyä sovellettaviin sääntöihin (esimerkiksi sellaisten kaupankäyntitapahtumien peruuttaminen, jotka on tehty markkinahinnoista poikkeavaan hintaan, eli niin sanottu sääntöjen vastainen kauppa).

Sijoittajalta veloitettavat arvioidut kustannukset

Sijoittajat saavat lisätietoa heiltä veloitettavista palkkioista, provisioista, kuluista ja kustannuksista esimerkiksi pankiltaan, neuvonantajaltaan tai finanssipalveluntarjoajaltaan (jakelija) pyydettyä.

Tarjoaja ja/tai kaupankäynnin kohteeksi hyväksymistä pyytävä henkilö

Arvopapereiden tarjoaja on Bank Vontobel Europe AG, joka toimii Frankfurt am Mainin sivuliikkeensä välityksellä, Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Saksa. Tarjoaja on Saksan lakien mukaan perustettu osakeyhtiö (AG), Tarjoajan rekisteröity toimipaikka on: Alter Hof 5, 80331, München, Saksa. Tarjoaja on rekisteröity paikallisen Frankfurt am Mainissa sijaitsevan tuomioistuimen (*Amtsgericht*) kaupparekisteriin rekisteröintinumerolla HRB 133419. Tarjoajan oikeushenkilötunnus on (LEI) on 529900KKJ9XOK6WO4426.

Esitteen laadintaperusteet

Tiedot voittojen käyttötarkoituksesta ja arvioidusta nettomäärästä

Arvopapereiden liikkeeseen laskeminen on Liikkeeseenlaskijan tavanomaista liiketoimintaa, jonka tarkoituksena on tuottaa voittoa ja /tai suojata tiettyjä Liikkeeseenlaskijan riskejä.

Liikkeeseenlaskun merkintätakaussopimus

Arvopapereihin liittyvää sopimusta liikkeeseenlaskun merkintätakauksesta ei ole solmittu.

Tarjoamiseen tai kaupankäynnin kohteeksi ottamiseen liittyvät olennaisimmat eturistiriidat

Liikkeeseenlaskijalla ja muilla Vontobel-konsernin yhtiöillä voi olla myös muita Arvopapereihin liittyviä etuja, jotka ovat ristiriidassa tai jotka eivät huomioi Arvopaperinhaltijoiden etuja. Näin voi tapahtua muun toiminnan harjoittamiseen tai muiden toimien suorittamiseen liittyen.

Bank Vontobel Europe AG, München tai muu Vontobel-konsernin yhtiö voi toimia Arvopapereiden markkinatakaajana. Markkinatakaaja vastaa arvopapereiden hintojen määrittämisestä ("markkinatakaaminen"). Markkinatakaajan määrittämät markkinahinnat eivät aina vastaa mahdollisia likvidien markkinoiden markkinatakaamattomia markkinahintoja.

Vontobel-konsernin yhtiöt voivat myös harjoittaa muuta Arvopapereihin liittyvää toimintaa, kuten toimia laskenta-asiamiehenä, indeksin laskenta-asiamiehenä, indeksin ylläpitäjänä tai osallistujana yksityisen indeksin/korin valintaprosessissa. Tällaisten toimintojen ansiosta Vontobel-konsernin yhtiöt voivat määrittää kohde-etuuden kokoonpanon tai laskea sen arvon.

Vontobel-konsernin yhtiöt voivat suorittaa myös kohde-etuuteen tai sen osatekijöihin liittyviä toimia. Tämä käsittää myös Liikkeeseenlaskijan suorittamat sellaiset toimet, jotka suojaavat Arvopapereihin perustuvia Liikkeeseenlaskijan velvoitteita. Yhden tai kaikkien näiden suojautumistoimien päättäminen voi vaikuttaa Arvopapereiden arvoon. Vontobel-konsernin yhtiöt voivat saada kohde-etuuteen liittyvää ei-julkista tietoa, eivätkä yhtiöt ole velvollisia luovuttamaan tällaisia tietoja Arvopaperisijoittajille. Vontobel-konsernin yhtiöt voivat esimerkiksi laatia kohde-etuuteen tai sen osatekijöihin liittyviä tutkimusraportteja.
