Total offer volume:	11,000 Securities which shall be consolidated with and form a single issue with the same Securities issued on 9 June 2023. The new Total Offer Volume shall be 61,000 Securities.

I. INTRODUCTION

These final terms (the "Final Terms") have been prepared for the purposes of Article 8 paragraph 4 of Regulation (EU) 2017/1129 (the "Prospectus Regulation"). To obtain all relevant information, the Final Terms should be read together with the base prospectus dated 16 May 2023 (the "Base Prospectus") and any supplements thereto in accordance with Article 23 of the Prospectus Regulation (the "Supplements").

The Base Prospectus and any supplements thereto will be published in electronic form on the website <http://prospectus.vontobel.com> in accordance with Article 21 of the Prospectus Regulation by entering the relevant ISIN.

An issue specific summary is annexed to the Final Terms.

Continuation of the Public Offer

The Base Prospectus (including any Supplements thereto) (the "**Initial Base Prospectus**") is valid until 16 May 2024 in accordance with Article 12 of the Prospectus Regulation. Following this date, the public offer will be continued until the Date of the End of the Public Offer (as defined in section IV.2 of the Final Terms) on the basis of one or more succeeding base prospectuses (each a "**Succeeding Base Prospectus**") in accordance with Article 8 paragraph 11 of the Prospectus Regulation, to the extent the Succeeding Base Prospectus envisages a continuation of the public offer of the Securities. In this context, these Final Terms are, in each case, to be read in conjunction with the most recent Succeeding Base Prospectus. The respective Succeeding Base Prospectus will be approved and published prior to the expiry of the validity of the respective preceding base prospectus. The respective Succeeding Base Prospectus will be published in electronic form on the website <http://prospectus.vontobel.com>.

Consent to the use of the Base Prospectus

The Issuer hereby consent to the use of the Base Prospectus for the duration of the Offer Period (as defined below) to all financial intermediaries within the meaning of Article 5 paragraph (1) of the Prospectus Regulation for a subsequent resale or final placement of securities to use the Base Prospectus in Sweden.

II. TERMS AND CONDITIONS

The Securities are subject to **General Conditions in the Base Prospectus dated 16 May 2023 (section 7.1)** and the corresponding **Product Conditions for Mini Futures** which together constitute the terms and conditions (the "**Terms and Conditions**").

Issue Date	27 October 2023
Issue Size (up to)	SEK 11,000 Securities which shall be consolidated and form a single issue pursuant to § 13 of the General Conditions with the Securities issued on 9 June 2023 (ISIN DE000VU79U01 / WKN VU79U0 / Valor 127542006). The new Total Issue Size shall amount to 61,000 Securities.
Option Type	Long
Underlying	<u>10-Year US Treasury Note Future</u> ISIN Underlying: US12573H3286 Bloomberg symbol: TY1 Comdty Reference Agent: CBOT (CME Globex) Currency: USD
Initial Underlying	<u>10-Year US Treasury Note Future September 2023</u> Bloomberg symbol: TYU3 Comdty
Current Underlying	<p>On each Rollover Date a Rollover procedure shall be carried out whereby the Issuer replaces the respective Current Underlying with another Underlying (future) which, except for the maturity date which is further in the future, has the same or comparable contract specifications.</p> <p>The "Current Underlying" from the Issue Date until the first Rollover Date shall be the "Initial Underlying", as specified above. On the first Rollover Date this Underlying shall lose its validity and shall be replaced by the Underlying falling due on the Reference Agent in the next following Rollover Month. On each subsequent Rollover Date, the Current Underlying shall be replaced analogously by the underlying contract falling due on the Reference Agent in the next following Rollover Month.</p> <p>The above described replacement is subject to the condition, that the Rollover Reference Price of the Underlying falling due on the Reference Agent in the next following Rollover Month is positive on the Rollover Date.</p> <p>If the Rollover Reference Price of such Underlying is zero (0) or negative on the Rollover Date, the Current Underlying shall be replaced analogously by the underlying contract falling due on the Reference Agent in the next following Rollover Month at the Reference Agent that has a positive Rollover Reference Price on the Rollover Date.</p> <p>In the case that no following underlying contract exists for which the Rollover Reference Price of the Underlying is positive or that the Rollover Reference Price of any of the following underlying contracts is lower than the Rollover Reference Price for the Current Underlying before Rollover on the Rollover Date minus the Strike on the Rollover Date, the Issuer is entitled to terminate the Securities extraordinarily.</p>
Rollover Date	shall be determined in each case by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) and shall fall within a period starting with the first Trading Day on which, in the context of a Rollover, the Underlying contract has been replaced by the Current Underlying and ending with the last Trading Day of the Current Underlying on the Reference Agent. In the event that the first notice day of the Current Underlying is before its last Trading Day, the period for the Rollover Date shall begin ten Trading Days prior to the first notice day and shall end with the last Trading Day of the Current Underlying.
Rollover Month(s)	shall be March, June, September, December
Initial Reference Price	USD 113.13
Initial Strike	USD 96.63
Adjustment Date	shall be every day from Monday to Friday commencing from the Issue Date.
Current Strike	The Current Strike on the Issue Date shall correspond to the Initial Strike. The Current Strike shall be adjusted by the Calculation Agent at the end of each Adjustment Date.
Adjustment of the Current Strike	The Current Strike shall be adjusted using the following formula:

$$FL_n = FL_a + \frac{FS \cdot FL_a \cdot n}{360}$$

where:

- FL_n**: Strike following the adjustment = Current Strike.
FL_a: Strike before the adjustment.
r: reference interest rate: the current money market rate of interest for overnight deposits in the Currency of the Underlying determined by the Calculation Agent.
FS: Current Financing Spread. The "**Current Financing Spread**" shall be specified on each Adjustment Date by the Calculation Agent in its reasonable discretion in a range between zero and the Maximum Financing Spread. For this purpose, factors such as the level of interest rates, changes in market expectations relating to interest rates and margin considerations may be taken into account.
n: number of calendar days between the current Adjustment Date (exclusive) and the next Adjustment Date (inclusive).

The result of the calculation shall be rounded upwards to the nearest multiple of the rounding of the Strike. The rounding of the Strike shall be 0.001.

Financing Spread	The Financing Spread on the Issue Date shall amount to 3.00%
Maximum Financing Spread	The Maximum Financing Spread shall amount to 5.00%
Current Strike after Rollover	The Current Strike shall be adjusted on each Rollover Date. The adjustment shall take place immediately following the adjustment of the Current Strike described above and shall be made using the following formula: $FL_{ns} = FL_n - (RORP_a - ROF) + (RORP_n + ROF)$ <p>where:</p> <p>FL_{ns}: Current Strike after Rollover FL_n: Current Strike before Rollover RORP_a: Rollover Reference Price for the Current Underlying before Rollover RORP_n: Rollover Reference Price for the Current Underlying after Rollover ROF: Rollover Fee</p>
Rollover Reference Price	The " Rollover Reference Price " shall be determined on each Rollover Date by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) based on the prices of the Current Underlying traded and published on the Reference Agent within a period of one hour prior to and including the time of determination of the official settlement price of the Current Underlying.
Rollover Fee	The " Rollover Fee " shall be an amount in the Currency of the Underlying specified by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) in a range between zero (0) and the Maximum Rollover Fee. It shall depend in particular on the liquidity of the Underlying. The " Maximum Rollover Fee " for the entire Term shall be specified on the Issue Date and shall amount to USD 4.00 The " Initial Rollover Fee " shall amount to USD 0.00
Ratio	0.1
Cash Amount	The Cash Amount (section 3 of the General Conditions) shall be equal to the difference, expressed in the Currency of the Underlying, by which the relevant Valuation Price on the Valuation Date is higher than the Current Strike, multiplied by the Ratio, i.e. $\text{Cash Amount} = (\text{ValuationPrice} - \text{Current Strike}) \cdot \text{Ratio}$
Cash Amount Rounding	The figures resulting from the calculation of the Cash Amount shall be commercially rounded to two (2) decimal places.
Base Settlement Amount	Not applicable
Barrier Event	A Barrier Event shall occur if during the Observation Period the Observation Price touches or is lower than the Current Stop-Loss Barrier, in which case the Securities are exercised automatically.

If a Barrier Event occurs, the Valuation Price for the purpose of determining the Cash Amount shall be equal to the Stop-Loss Reference Price.

The occurrence of a Barrier Event shall take precedence over exercise by the Security Holder or termination by the Issuer. The Term of the Securities shall end upon the occurrence of a Barrier Event.

Notice shall be given of the occurrence of the Barrier Event in accordance with section 12 of the General Conditions.

Valuation Price	The Valuation Price shall be the relevant rate, price or level of the Underlying for the purpose of calculating the Cash Amount and shall be determined as follows: The Valuation Price shall be, in the event of (a) exercise by the Security Holder or (b) termination by the Issuer, the Reference Price on the Valuation Date, or, in the event of (c) the occurrence of a Barrier Event, the Stop-Loss Reference Price (as defined respectively in these Product Conditions).
Initial Stop-Loss Barrier	USD 97.11
Initial Stop-Loss Buffer	0.501%
Maximum Stop-Loss Buffer	15.00%
Current Stop-Loss Barrier	on the Issue Date shall be equal to the Initial Stop-Loss Barrier. The Stop-Loss Barrier shall be adjusted by the Calculation Agent with effect as of each Stop-Loss Barrier Adjustment Date. The Current Stop-Loss Barrier shall be determined in accordance with the following formula and rounded up to the nearest multiple of the rounding of the Stop-Loss Barrier: $StL = FL_n \cdot (100 \% + StLP)$ where: StL: Current Stop-Loss Barrier. FL_n: Strike following the adjustment = Current Strike. StLP: Current Stop-Loss Buffer. The rounding of the Stop-Loss Barrier shall be 0.01.
Stop-Loss Barrier Adjustment Date	shall be the first Adjustment Date of each month and each Rollover Date. In the reasonable discretion of the Calculation Agent, an adjustment may be made if necessary on any Adjustment Date of the Securities.
Current Stop-Loss Buffer	The Current Stop-Loss Buffer shall be a buffer determined by the Calculation Agent on each Stop-Loss Barrier Adjustment Date in a range between zero and the Maximum Stop-Loss Buffer specified on the Issue Date for the entire Term.
Observation Period	The Observation Period shall be every day from 9 June 2023 (inclusive).
Observation Price	shall mean the price of the Current Underlying determined and published by the Reference Agent. For the purpose of determining whether the Observation Price touches or falls below the Current Stop-Loss Barrier, each determination of the price of the Current Underlying by the Reference Agent during the Observation Period shall be relevant.
Type of Exercise	American Exercise Type
Exercise Agent	shall be the Principal Paying Agent. Address: Bank Vontobel AG, attn: Corporate Actions, Gotthardstrasse 43, 8002 Zurich, Switzerland Telephone: +41 (0)58 283 74 90 Facsimile: +41 (0)58 283 51 60 Email: exercise@vontobel.com
Exercise Time	is 11:00 a.m. (Stockholm time)
Exercise Date	shall mean each Business Day commencing as of the First Exercise Date (including).
First Exercise Date	30 June 2023
Minimum Exercise Number	1 Security

Reference Price	The Reference Price shall be the relevant rate, price or level of the Current Underlying for the purpose of calculating the Cash Amount if no Barrier Event has occurred during the Observation Period, and shall be determined as follows: Reference Price shall mean the settlement price of the Current Underlying determined and published on the Reference Agent on the Valuation Date.
Stop-Loss Reference Price	shall be the relevant rate, price or level of the Current Underlying for the purpose of calculating the Cash Amount if a Barrier Event has occurred during the Observation Period, and shall be determined as follows: The Stop-Loss Reference Price shall be an amount determined by the Calculation Agent in its reasonable discretion (sections 315, 317 BGB) taking into account quotations on the Reference Agent as the price of the Current Underlying within a period of one (1) hour during the trading hours for the Current Underlying following the occurrence of the Barrier Event. If a Barrier Event occurs less than one (1) hour prior to the end of the trading hours for the Underlying, that period shall be extended accordingly to the next Exchange Day.
Valuation Date	Valuation Date shall be <ul style="list-style-type: none"> (a) in each case in the event of effective exercise by the Security Holder, an Exercise Date on which the Security Right is exercised effectively by the Security Holder in accordance with section 4 of the General Conditions; (b) in the event of ordinary termination by the Issuer, the ordinary termination date; (c) in the event of an Barrier Event, the day on which the Barrier Event occurred. If (i) the Valuation Date is not an Exchange Day or (ii) in the event of effective exercise by the Security Holder, the Exercise Notice is not received by the Exercise Agent until after the Reference Price has been determined by the Reference Agent on the Valuation Date, then the Valuation Date shall be postponed to the next following Exchange Day.
Exchange Day	A day on which trading in the Current Underlying takes place on the Reference Agent.
Right of Ordinary Termination of the Issuer	The Right of Ordinary Termination of the Issuer pursuant to section 5 of the General Conditions shall apply. The Ordinary Termination Amount shall be calculated and paid in accordance with section 5 (3) of the General Conditions as in the case of effective exercise.
Termination Cut-Off Date	is one (1) Business Day before the relevant Termination Date.
First Termination Date	30 June 2023
Termination Dates	Termination Date shall be each Exchange Day commencing from the First Termination Date.
Term	The Term of the Securities shall begin on the Issue Date (inclusive) and shall be – subject to the occurrence of a Barrier Event or to ordinary or extraordinary termination by the Issuer – unlimited (open-end).
Maturity Date	The Maturity Date shall be the ninth (9 th) Business Day after the Valuation Date or the date on which a Barrier Event occurs.
Settlement Currency	of the Securities shall be SEK.
Currency Conversion	All cash amounts payable under the Securities shall be converted into the Settlement Currency at the Conversion Rate. " Conversion Rate " means the conversion rate between the Settlement Currency and the Currency of the Underlying on or about the time of determination of the Reference Price on the Valuation Date as calculated by Bloomberg Index Services Limited and published on the relevant screen page of the Bloomberg business information service under "BFIX". If such a Conversion Rate is not determined or published or if the method of calculating the Conversion Rate changes materially, the Calculation Agent shall determine the Conversion Rate applicable at the time of determination of the Reference Price on the Valuation Date in its reasonable discretion.
Registry Type	Swedish Registered Securities
Applicable Adjustment and Market Disruption Provisions	The rules for Adjustments and Market Disruptions for futures or interest rate futures specified in section 6 and section 7 of the General Conditions shall apply to this Security.

III. INFORMATION ABOUT THE UNDERLYING

The Underlying to which the Securities are linked is:

10-Year US Treasury Note Future

U.S. Treasury Notes have a remaining maturity of at least six and one-half years but not more than 10 years from the first day of the delivery month. The invoice price is equal to the futures settlement price times a conversion factor, plus accrued interest.

For the 10-Year US Treasury Note Future (Nearest), during its term this product uses as underlying instrument the Future that is next up to expire or whose settlement or expiry date is nearest. For this reason, so-called roll-overs are regularly needed during the term of this product. They are carried out at intervals determined at the discretion of the paying and calculation agent; the discretion of the paying and calculation agent should be orientated towards applicable market practice in so far as possible. On the occasion of such roll-overs, a current Future is replaced by a new Future which has the same or comparable contract specifications with the exception of the later future maturity. Due to continuous roll-overs in the form described, this product, as a rule, always has that 10-Year US Treasury Note Future as its underlying which guarantees the highest possible liquidity.

- The Security holders bear the risk of bankruptcy of the Issuer (default risk). Securities holders are exposed to the risk that the Issuer cannot meet its obligations arising from the Securities, for example in the event of insolvency (illiquidity / overindebtedness). Insolvency of the Issuer can even lead to the complete loss of the principal amount that Security holders paid when purchasing the securities (**risk of total loss**).

Section C – Brief description of the Securities**What are the main features of the Securities?****Type and class of the Securities**

The Securities are debt instruments in dematerialised registered form, evidenced by book-entries, governed by German law.

Rights attached to the Securities

The Securities constitute the right of the Security holder to receive from the Issuer per Security the payment of the Redemption Amount in Swedish Krona in accordance with the Terms and Conditions of the Securities and subject to the performance of the Underlying.

The term of this product is indefinite.

The objective of this product is to provide you with disproportionate (leveraged) participation in any price movement of the Underlying. This has the effect, inter alia, that you are exposed to a very high risk of a total loss of your investment. The product is a complex financial instrument linked to one Underlying (10-Year US Treasury Note Future).

The product does not have a fixed maturity. It expires during its term if a barrier event occurs. A barrier event occurs if the price of the Current Underlying is at or below the Current Barrier at any time during the Observation Period. In this case you will receive an amount which equals the amount by which the Stop-Loss Reference Price exceeds the Current Strike, multiplied by the Ratio. The Stop-Loss Reference Price is determined at our reasonable discretion on the basis of the price of the Current Underlying after the occurrence of the barrier event. In the case that the Stop-Loss Reference Price is equal to or below the Current Strike the product expires worthless immediately.

The Current Strike is adjusted daily to reflect financing cost incurred by the Issuer. Such adjustment is determined based on a specific market interest plus an Issuer margin (Financing Spread). The Current Barrier is adjusted monthly so that the distance between Current Strike and Current Barrier corresponds to the Stop-Loss-Buffer again. As a result the Current Barrier is constantly above the Current Strike.

In addition to the adjustments described above, the Current Underlying of the product is also subject to regular change due to the future being exchanged for a new future prior to its maturity (Rollover). In order to ensure that this Rollover of the Underlying leaves the value of the product largely unaffected, the Current Strike and the Current Barrier are also adjusted at the same time as the Rollover occurs.

The product does not have a fixed maturity. You may exercise the product on any bank business day from the First Exercise Date. The Issuer has the right to terminate the product on any bank business day, subject to a notice period of one bank business day. After exercise or termination and – subject to the prior occurrence of a barrier event –, you will receive a redemption amount on the Redemption Date which equals the amount by which the Reference Price of the Current Underlying exceeds the Current Strike on the Exercise or Termination Date, multiplied by the Ratio.

The redemption amount will be translated from the currency of the Underlying into the currency of the product.

Upon the occurrence of certain extraordinary events, the Issuer is entitled under the terms and conditions of the Securities to adjust the terms and conditions of the securities (in particular to exchange the underlying instrument) or to terminate the Securities extraordinarily. The Issuer shall have the right to call the Securities in their entirety for ordinary notice against payment of the ordinary termination amount (which shall be calculated in the same manner as the redemption amount) and to terminate the term of the Securities.

Applicable law

The form and content of the Securities as well as all rights and obligations of the Issuer and the Security holders are determined in accordance with German law, except that the registration of the Securities is governed by Swedish law.

Ranking

The obligations arising from the Securities constitute direct and unsecured liabilities of the Issuer, which rank equally among themselves and with all other unsecured and unsubordinated liabilities of the Issuer, with the exception of those liabilities, which have priority by virtue of mandatory legal provisions.

Where will the Securities be traded?

Application for admission to trading on a regulated market or multilateral trading facility (MTF)

No application will be made for the admission of the Securities to trading on a regulated market. The Securities are subject to an application to admission or inclusion to trading on the following multilateral trading facilities (MTF): Nordic Growth Market (Nordic MTF Sweden). Trading is expected to start on 27 October 2023.

Is there a guarantee attached to the Securities?

Nature and scope of the guarantee

Vontobel Holding AG, Zurich, Switzerland (the "**Guarantor**") guarantees the proper payment of all amounts payable by the Issuer in accordance with the terms and conditions of the Securities issued under the Base Prospectus. The guarantee represents an independent guarantee under Swiss law; all rights and obligations arising from this are subject in all respects to Swiss law. The courts of law of the Canton of Zurich have exclusive jurisdiction over all actions and legal disputes relating to the guarantee. The place of jurisdiction is Zurich 1.

Description of the Guarantor

Most material risks factors pertaining to the Guarantor

The most material risk factors pertaining to the Guarantor may be summarised as follows:

- The Security holders bear the risk of bankruptcy of the Guarantor (default risk). Securities holders are exposed to the risk that the Guarantor cannot meet its obligations arising from the Securities, for example in the event of insolvency (illiquidity / overindebtedness). Insolvency of the Issuer and the Guarantor can even lead to the complete loss of the principal amount that Security holders paid when purchasing the securities (**risk of total loss**). Furthermore, Security holders may become subject to resolution measures in relation to the Guarantor if the Guarantor is failing or likely to fail.
- The guarantee is subject to Swiss law; the place of jurisdiction is Zurich. In this context, the Security holders bear risks in connection with the enforcement of legal claims with regard to the guarantee, e.g. increased costs.

What are the key risks that are specific to the Securities?

The key risks that are specific to the Securities may be summarised as follows:

- **Risks resulting from the payment profile of the Securities**
 - Risk of early repayment due to a Barrier Event (risk of total loss): If the relevant price of the Underlying (the so-called Reference Price) for the purpose of calculating the redemption (i.e. the Cash Amount at maturity) is at or below the Strike on the Valuation Date, the Securities expire worthless. Furthermore, Security holders bear a considerable risk that their Securities will expire worthless before the end of their term. This is immediately the case if a so-called Barrier Event occurs.
 - Disproportionate risk of loss due to the leverage effect: The Security holder bears the risk of strong price fluctuations of the Securities, in particular the so-called leverage effect as a risk-increasing feature of the Securities must be taken into account. The risk-increasing leverage effect is stronger for the Securities because the term of the Securities can be terminated prematurely by the occurrence of a Barrier Event.
 - Additional risk if a Barrier Event occurs: The occurrence of a Barrier Event may be based on prices of the Underlying that are determined during trading hours other than the trading hours of the Securities. In this case, the risk of the Security holder is that the Security holder does not perceive the threat of a Barrier Event or does not perceive it in time and sell his Securities in time and must accept the total loss of the purchase amount paid.
 - Risk in connection with the exercise of the Securities: Additional risks arise from the fact that the Securities have no term and can only be exercised on specific dates. If the Security holder misses this date, the Security holder bears the risk that the Securities will expire worthless in the meantime due to a Barrier Event.
 - Additional risks in connection with the adjustment of the Strike of the Securities: The Security holder bears risks connected to the adjustment of the Strike of the Securities. The adjustment depends on the risk premium (financing spread). The Security holder bears the risk that the Issuer charges a higher risk premium for his risk.
- **Risks resulting from the conditions of the Securities**
 - Currency Risk: In the case of Securities without a Quanto Structure, Security holders bear an additional risk of loss due to the exchange rate risk associated with the Underlying.
 - Risks in connection with adjustments, market disruptions, ordinary and extraordinary termination and settlement: Security holders bear the risk that the Securities are adjusted or terminated. Furthermore, there is also the risk that the occurrence of a market disruption could reduce the value of the Securities. In addition, a market disruption may delay the redemption or repayment of the Securities. If the conditions of the Securities provide for extraordinary termination by the Issuer, the Security holder bears a risk of loss as the termination amount equals the market price of the Securities, which can be even zero. The Security holder also bears the reinvestment risk in relation to the termination amount.
- **Risks in connection with the investment in, the holding and selling of the Securities**

- Risks in connection with trading in the Securities, liquidity risk: Security holders bear the risk that there is no liquid market for trading in the Securities. This means that Security holders cannot sell the Securities at a specific time or at a specific price.
- **Risks in connection with the price determination for the Securities and potential conflicts of interest**
 - Risks in connection with potential conflicts of interest: The Issuer, the Guarantor and other companies of the Vontobel Group may pursue interests that conflict with or do not take into account the interests of the Security holders. This may be in connection with the exercise of other functions or in carrying out further transactions. Potential conflicts of interest may adversely affect the value of the Securities and/or the Cash Amount under the Securities.
- **Risks in connection with the Underlying**
 - Risks in connection with futures contracts: The price development of futures contracts may adversely affect the value of the Securities and/or the Cash Amount under the Securities for the Security holder.
 - Risks in connection to the "rolling" of a future contract: The "Rolling" of the future contract may adversely affect the performance of the Securities and/or the Cash Amount under the Securities for the Security holder.
- **Risks which apply to all or several Underlyings**
 - Risks in connection with psychological effects: The price of an Underlying can fluctuate strongly due to psychological effects related, for example, to sentiments, opinions and rumors in the market, which may have an impact on the performance of the Securities.
 - Volatility risk: Due to the volatility of an Underlying, high losses in the Securities may occur.

Section D – Key information on the offer of the Securities to the public and/or the admission to trading on a regulated market

Under which conditions and timetable can investors invest in this Security?

General terms, conditions and expected timetable of the offer

The offer of the Securities will be made from 26 October 2023 in Sweden.

The issue price is SEK 8.48. The bid and ask price of the Securities is continuously set by the Market Maker. Market Maker is Bank Vontobel Europe AG, Frankfurt am Main Branch, Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany.

The Securities may not be offered or sold unless all applicable laws and regulations in the jurisdiction in which a purchase, offer, sale or delivery of Securities is made or in which this document is distributed or held have been complied with and all consents or approvals required by applicable laws in that jurisdiction for the purchase, offer, sale or delivery of the Securities have been obtained.

Details of the admission to trading on a regulated market or on a multilateral trading facility (MTF)

An application for admission to trading on a regulated market and/or on a multilateral trading facility (MTF) has been or will be made. Such admission need not be maintained on a permanent basis. If the admission ceases to exist, the acquisition and sale of the Securities may be considerably more difficult for the investor. Even if admission is maintained, investors should note that this is not necessarily associated with high trading volumes in the respective Securities. The trading of Securities is subject to numerous legal and stock exchange regulations. Before acquiring the Securities, investors should familiarise themselves with the regulations applicable (such as, for example, the regulations on the cancellation of trading transactions that have been concluded at prices not in line with the market, so-called mistrades).

Estimated expenses charged to the investor

Investors will receive further information on any remuneration, commissions, fees and costs charged to investors, for example by their bank, advisor or financial services provider (distribution partner), from these parties upon request.

Who is the Offeror and/or the person asking for admission to trading?

Offeror of the Securities is Bank Vontobel Europe AG acting through its Frankfurt am Main Branch, Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Germany. The Offeror is a stock corporation (AG) under German law. Bank Vontobel Europe AG is a stock corporation (AG) under German law and registered in the Commercial Register of the local District Court (*Amtsgericht*) of Munich, Germany, under the registration number HRB 133419. The Legal Entity Identifier (LEI) of the Offeror is 529900KKJ9XOK6WO4426. The registered office of Bank Vontobel Europe AG is: Alter Hof 5, 80331 Munich, Germany.

Why is this prospectus being produced?

Use and estimated net amount of the proceeds

The issue of the Securities is part of the Issuer's ordinary business activities and is made for the purpose of generating profits and/or hedging certain risks of the Issuer.

Underwriting agreement on a firm commitment basis

There is no underwriting agreement with a firm underwriting commitment in connection with the securities offered.

Most material conflicts of interest pertaining to the offer or the admission to trading

The Issuer and other companies within the Vontobel Group may pursue interests that conflict with the interests of the Security holders or do not take these into account. This may occur in connection with the exercise of other functions or when carrying out further transactions.

Bank Vontobel Europe AG, Munich, or another company of the Vontobel Group may act as market maker for the Securities. The market maker is responsible for setting the prices of the securities ("market making"). The market prices provided by the market maker will not always correspond to the market prices that would have been formed without this market making and in a liquid market.

Companies within the Vontobel Group may also perform another function in relation to the Securities, e.g. as calculation agent, index calculation agent, index sponsor or participant in the selection process of a proprietary index or basket. Such a function may enable the company of the Vontobel Group to determine the composition of the underlying instrument or to calculate its value.

Companies within the Vontobel Group may conclude transactions relating to the underlying or its components. This also includes transactions by the issuer that hedge its obligations under the Securities. The value of the Securities may be affected by the termination of some or all of these hedging transactions. Companies within the Vontobel Group may receive non-public information relating to the underlying and are not obliged to pass on such information to an investor in the Securities. For example, companies in the Vontobel Group may issue research reports in relation to the underlying or its components.

Insolvens för Emittenten kan även leda till en fullständig förlust av det kapitalbelopp som Värdepappersinnehavarna har betalat när de köpt värdepapperen (risk för fullständig förlust).

Avsnitt C – Kort beskrivning av Värdepapperen

Vilka är Värdepapperens huvudsakliga egenskaper?

Värdepapperens typ och klass

Värdepapperen är skuldinstrument i icke-fysisk registrerad form, i form av noterade bokförda värdepapper, som styrs av tysk lag.

Rättigheter knutna till Värdepapperen

Värdepapperen utgör Värdepappersinnehavarens rätt att från Emittenten för varje Värdepapper få en betalning av Inlösenbeloppet i Swedish Krona enligt Villkoren för Värdepapperen och enligt Underliggandes Resultat.

Produktens löptid är obestämmd.

Syftet med den här produkten är att förse dig med oproportionerligt (hävstångsmässigt) deltagande i eventuella prisrörelser hos den Underliggande tillgången. Detta medför bland annat att du utsätts för en mycket hög risk för en total förlust av din investering. Produkten är ett komplext finansiellt instrument kopplad till en Underliggande tillgång (10-Year US Treasury Note Future).

Produkten har ingen fast förfallodag. Det upphör att gälla om en barriärhändelse inträffar. En barriärhändelse inträffar om priset på den aktuella Underliggande tillgången är på eller under den Aktuella Barriären vid någon tidpunkt under Observationsperioden. I sådant fall mottar du ett belopp som motsvarar det belopp med vilket Stop loss-referenspriset överstiger Lösenpriset multiplicerat med Relationstalet. Stop loss-referenspriset fastställs efter vår skäliga bedömning på grundval av priset på den aktuella Underliggande tillgången efter att barriärhändelsen inträffat. Om Stop loss-referenspriset är lika med eller under det Aktuella Lösenpriset förfaller produkten omedelbart värdelös.

Det Aktuella Lösenpriset justeras dagligen för att återspegla finansieringskostnader som åsamkas Emittenten. Sådana justeringar görs utifrån en specifik marknadsränta plus en Emittentmarginal (Finansieringsspread). Den Aktuella Barriären justeras varje månad så att skillnaden mellan Aktuell Lösenpris och Aktuell Barriär återigen motsvarar Stop loss-bufferten. Följaktligen är den Aktuella Barriären konstant över det Aktuella Lösenpriset.

Utöver de justeringar som beskrivs ovan är Aktuell Underliggande för produkten även föremål för regelbundna förändringar på grund av future-avtal som byts ut mot nya före dess förfallodag ("Rollover"). I syfte att säkerställa att värdet på produkten i stort sett förblir opåverkat av en Rollover av den Underliggande tillgången, justeras även det Aktuella Lösenpriset och den Aktuella Barriären samtidigt som övergången sker.

Produkten har ingen fast förfallodag. Du kan lösa in produkten på valfri bankdag från den Första Lösendagen. Emittenten har rätt att säga upp produkten på valfri bankdag, med en uppsägningstid på en bankdag. Efter inlösen eller uppsägning - och med förbehåll för förekomsten av en barriärhändelse --mottar du ett inlösenbelopp på betalningsdagen som motsvarar det belopp med vilket Referenspriset på den aktuella Underliggande överstiger det Aktuella Lösenpriset på Lösendagen eller Uppsägningdagen multiplicerat med Relationstalet.

Inlösenbeloppet omräknas från valutan för den Underliggande tillgången till valutan för produkten.

Om vissa extraordinära händelser inträffar, har Emittenten rätt att enligt Värdepapperens villkor justera värdepapperens villkor (särskilt för att byta ut underliggande) eller för att extraordinärt avsluta Värdepapperens löptid. Emittenten ska ha rätt att ordinärt återkalla alla Värdepapper i ett ordinarie meddelande mot betalning av det ordinarie slutbeloppet (som ska beräknas på samma sätt som inlösenbeloppet) och att avsluta Värdepapperens löptid.

Gällande lag

Värdepapperens form och innehåll samt Emittentens och Värdepappersinnehavarnas alla rättigheter och skyldigheter fastställs enligt tysk lag, förutom att registreringen av Värdepapperen styrs av svensk lag.

Rangordning

De skyldigheter som följer av Värdepapperen utgör direkta och icke-säkerställda förpliktelser för Emittenten, som rangordnas lika i relation till varandra och i relation till Emittentens alla andra icke-säkerställda och icke-efterställda förpliktelser, förutom vad beträffar de förpliktelser som måste prioriteras på grund av tvingande lagenliga krav.

Var kommer Värdepapperen att handlas?

Ansökan om tillträde för handel på en reglerad marknad eller en multilateral handelsplattform (MTF)

Ingen ansökan har gjorts om tillträde för handel för Värdepapperen på en reglerad marknad. Värdepapperen är föremål för en ansökan om tillträde eller inkludering för handel på följande multilaterala handelsplattformar (MTF): Nordic Growth Market (Nordic MTF Sweden). Handel förväntas inledas den 27 oktober 2023.

Finns det en garanti knuten till Värdepapperen?

Typ och omfattning för garantin

De flesta väsentliga riskfaktorer rör Garantigivaren

De flesta väsentliga riskfaktorer som rör Garantigivaren kan sammanfattas enligt följande:

- Värdepappersinnehavarna löper en risk att Garantigivaren går i konkurs (insolvensrisk). Värdepappersinnehavarna är exponerade för risken att Garantigivaren inte kan uppfylla sina skyldigheter enligt Värdepapperen, till exempel i händelse av insolvens (illikviditet/överskudsättning). Insolvens för Emittenten och Garantigivaren kan även leda till en fullständig förlust av det kapitalbelopp som Värdepappersinnehavarna har betalat när de köpt värdepapperen (risk för fullständig förlust). Dessutom kan Värdepappersinnehavarna bli föremål för beslutsåtgärder som rör Garantigivaren om Garantigivaren misslyckas eller sannolikt misslyckas.
- Garantigivaren är föremål för schweizisk lag, jurisdiktionsort är Zürich. I detta sammanhang löper Värdepappersinnehavarna en risk i samband med genomdrivandet av lagkrav med avseende på garantin, till exempel ökade kostnader.

Vilka är de huvudsakliga riskerna som är specifika för Värdepapperen?

De huvudsakliga riskerna specifika för Värdepapperen kan sammanfattas enligt följande:

- **Risker som uppstår av Värdepapperens betalningsprofil**
 - Risk för tidig återbetalning på grund av en Barriärhändelse (risk för totalförlust): Om den relevanta kursen på Underliggande (det så kallade Referenspriset) vid beräkning av inlösenpriset (dvs. Kontantbeloppet på förfalldagen) är lika med eller lägre än Lösenpriset på Värderingsdagen, löper Värdepapperen ut och är värdelösa. Dessutom löper Värdepappersinnehavarna en betydande risk att deras Värdepapper kommer att löpa ut och bli värdelösa innan deras slutdatum. Detta är det omedelbara resultatet om en så kallad Barriärhändelse inträffar.
 - Oproportionerlig förlustrisk på grund av hävstångseffekt: Värdepappersinnehavaren löper en risk för kraftiga kursfluktuationer på Värdepapperen, den så kallade hävstångseffekten måste, som en riskökande funktion för Värdepapperen, särskilt vägas in. Den riskökande hävstångseffekten är starkare för Värdepapperen eftersom Värdepapperens löptid kan upphöra i förtid om en Barriärhändelse inträffar.
 - Ytterligare risk om en Barriärhändelse inträffar: Om en Barriärhändelse inträffar kan det bero på Underliggandes kurser som fastställs under andra handelstimmar än Värdepapperens handelstimmar. I sådana fall är Värdepappersinnehavarens risk att hen inte uppfattar faran av en Barriärhändelse eller inte märker det i tid och säljer sina Värdepapperen i tid och måste godta en totalförlust av hela den betalade köpeskillingen.
 - Risk i samband med inlösen av Värdepapperen: Ytterligare risker som uppstår på grund av att Värdepapperen inte har någon löptid och endast kan lösas in på särskilda datum. Om Värdepappersinnehavaren missar detta datum, löper Värdepappersinnehavaren risken att Värdepapperen kommer att löpa ut och bli värdelösa under tiden på grund av en Barriärhändelse.
 - Ytterligare risker i samband med justeringen av Värdepapperens Lösenpris: Värdepappersinnehavaren löper den risk som är knuten till justeringen av Värdepapperens lösenpris. Justeringen beror på riskpremien (finansieringsspreaden). Värdepappersinnehavaren löper en risk att [context://underlyingTypeGroup:dec:Future= | Emittentens återfinansieringskostnader och följaktligen referensräntan kan stiga. Innehavaren löper även risken att] Emittenten tar ut en högre riskpremie för sin risk.
- **Risker som uppstår av Värdepapperens villkor**
 - Valutarisk: I fråga om Värdepapper utan en Quantostruktur löper Värdepappersinnehavarna ytterligare en förlustrisk på grund av den växelkursrisk som är knuten till Underliggande
 - Risker i samband med justeringar, marknadsstörningar, ordinärt och extraordinärt avslut och avräkning: Värdepappersinnehavarna löper en risk att Värdepapperen justeras eller avvecklas. Dessutom finns det en risk att det sker en marknadsstörning som kan minska värdet på Värdepapperen. En marknadsstörning kan också försena inlösen eller återbetalning av Värdepapperen. Om villkoren för Värdepapperen anger att Emittenten kan avveckla dem extraordinärt löper Värdepappersinnehavaren en förlustrisk då avvecklingsbeloppet motsvarar Värdepapperens marknadskurs som även kan vara noll. Värdepappersinnehavaren löper även en återinvesteringsrisk avseende avvecklingsbeloppet.
- **Risker i samband med investering i, innehav eller försäljning av Värdepapperen**
 - Risker i samband med handel med Värdepapperen, likviditetsrisk: Värdepappersinnehavarna löper en risk att det inte finns någon likvid marknad för handel med Värdepapperen. Det innebär att Värdepappersinnehavarna inte kan sälja Värdepapperen vid en specifik tidpunkt eller till en specifik kurs.
- **Risker i samband med fastställande av kursen på Värdepapperen och potentiella intressekonflikter**
 - Risker i samband med potentiella intressekonflikter: Emittenten, Garantigivaren och övriga företag i Vontobel-koncernen kan följa intressen som står i konflikt med eller inte väger in Värdepappersinnehavarnas intressen. Detta kan ske i samband med utövandet av andra funktioner eller vid genomförandet av ytterligare transaktioner. Potentiella intressekonflikter kan inverka negativt på Värdepapperen värdet av och/eller Kontantbeloppet enligt Värdepapperen negativt.

- **Risker i samband med den Underliggande:**
 - Risker i samband med terminskontrakt: Kursutvecklingen på terminskontrakten kan påverka värdet på Värdepapperen och/eller Kontantbeloppet enligt Värdepapperen negativt för Värdepappersinnehavaren.
 - Risker i samband med ”rullningen” av terminskontrakt: ”Rullningen” av terminskontraktet kan påverka resultatet på Värdepapperen och/eller Kontantbeloppet enligt Värdepapperen negativt för Värdepappersinnehavaren.
- **Risker som gäller för alla eller många Underliggande**
 - Risker i samband med psykologiska effekter: Kursen på underliggande kan fluktuera kraftigt på grund av psykologiska effekter som till exempel är relaterade till stämningar, åsikter och rykten på marknaden, vilket kan ha en inverkan på Värdepapperens resultat.
 - Volatilitetsrisk: På grund av en underliggandes volatilitet, kan höga förluster bli fallet.

Uppgifter om ansökan om tillträde för handel på en reglerad marknad eller en multilateral handelsplattform (MTF)

En ansökan om tillträde för handel på en reglerad marknad och/eller en multilateral handelsplattform (MTF) har gjorts eller kommer att göras. Ett sådant tillträde måste inte upprätthållas permanent. Om tillträdet upphör, kan köp och försäljning av Värdepapperen bli avsevärt mycket svårare för investeraren. Även om tillträdet upprätthålls, ska investerarna lägga märke till att detta inte nödvändigtvis är förbundet med höga handelsvolymerna i respektive Värdepapper. Handel med Värdepapperen är föremål för flera juridiska regler och börshandelsregler. Före ett köp av Värdepapper ska investerarna bekanta sig med de myndighetsregler som gäller (som till exempel de regler om annullation av handelstransaktioner som har gjorts till kurser som inte följer marknaden, så kallad felaktig handel).
