What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Certificates, including:

1. Risk relating to the structure of the Certificates:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of automatic early redemption features. Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until redemption. The effect of leverage on the Securities may be either positive or negative. Open End Certificates and OET Certificates do not have any pre-determined maturity and may be redeemed on any date determined by the relevant Issuer and investment in such Open End Certificates and OET Certificates entails additional risks compared with other Certificates due to the fact that the redemption date cannot be determined by the investor.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Depending on the terms of the Securities, the amount due on redemption will be determined by reference to the value of the Commodity. If the Commodity does not perform as expected, this will have a material adverse impact on the amounts that Holders will receive in respect of the Securities and may also negatively affect the value of the Securities: exposure to one or more commodity and/or commodity index, similar market risks to a direct commodity investment, market disruption and adjustment events which may have an adverse effect on the value or liquidity of the Securities, delays to the determination of the final level of a commodity index resulting in delays to the payment of the Cash Settlement Amount and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Certificates:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Garantigivaren garanterar ovillkorligt och oåterkalleligt varje innehavare att, om BNPP B.V. av någon anledning inte betalar en summa som ska betalas eller inte lever upp till någon annan skyldighet i samband med ett värdepapper på det angivna datumet för en sådan betalning eller avkastning, kommer garantigivaren enligt villkoren att betala den summan i den valuta i vilken en sådan betalning ska betalas med omedelbart tillgängliga medel eller, alltefter omständigheterna, utföra eller tillse att relevant skyldighet uppfylls på förfallodagen för sådant resultat.

Mest väsentliga riskfaktorer som hänför sig till garanten

1. En avsevärd ökning av nya bestämmelser eller en nedgång i nivå för tidigare registrerade avsättningar exponerade för kreditrisk och motpartsrisk kan påverka BNP Paribas-koncernens resultat och verksamhet negativt.
2. BNP Paribas Groups riskhanteringspolicyer, förfaranden och metoder kan exponera den för oidentifierade eller oförutsedda risker som kan leda till materialförluster.
3. BNP Paribas-koncernen kan drabbas av betydande förluster i sin handels- och investeringsverksamhet på grund av marknadsvängningar och volatilitet.
4. BNP Paribas-koncernens tillgång till och kostnader för finansiering kan påverkas negativt av finansiella kriser, försämrade ekonomiska förhållanden, nedgraderingar av kreditbetyg, ökning av statsspecifika kreditspreadar eller andra faktorer.
5. Negativa ekonomiska och finansiella förhållanden har tidigare haft och kan i framtiden ha en inverkan på BNP Paribas-koncernen och de marknader på vilka den verkar.
6. Lagar och förordningar som antagits under de senaste åren, särskilt som svar på den globala finanskrisen, såväl som nya lagstiftningsförslag, kan väsentligt påverka BNP Paribas-koncernen och den finansiella och ekonomiska miljön i vilken den verkar.

Vilka nyckelrisker är specifika för värdepapperen?

Mest väsentliga riskfaktorer som är specifika för värdepapperen

Det finns även risker som är förknippade med Certifikat, inklusive:

1. Risk som är relaterad till värdepappernas struktur:

Hävstångsprodukter: Investerare kan exponeras mot en partiell eller fullständig förlust av sin investering. Avkastningen på värdepapper beror på avkastningen på den eller de underliggande referenserna och på tillämpning av egenskaper för automatisk tidig inlösen. Dessutom kan avkastningen bero på marknadsfaktorer som till

exempel räntor, indirekt volatilitet på den eller de underliggande referenserna och den tid som återstår till inlösen. Effekten av en hävstång på värdepapperen kan vara antingen positiv eller negativ.

Open End-certifikat och OET-certifikat har inte någon i förväg fastställd löptid och kan alltid lösas av berörd Emittent. En investering i sådana Open End-certifikat och OET-certifikat medför ytterligare risker jämfört med andra certifikat på grund av att inlösendatumet inte kan fastställas av investeraren;

2. Risk som är relaterad till de Underliggande och dess Avbrott och Justeringar:

Beroende på Värdepappernas villkor kommer inlösenbeloppet att bestämmas av deras värde. Om Värdepapperet inte presterar som förväntat kommer det att ha en väsentligt negativ inverkan på beloppet som Innehavaren får och kan även påverka Värdepappernas värde negativt.

3. Risk som är relaterad till handel med värdepapper:

Faktorer som påverkar värdet och kursen på Värdepapper: Kursen på Värdepapper kan påverkas av ett antal faktorer inklusive men inte begränsat till det gällande priset eller nivån på Underliggande Referenser, återstående tid på Värdepapperets planerade inlösendag, aktuell eller implicit volatilitet som är förknippat med den Underliggande Referenten och risken med det inbördes förhållandet till gällande Underliggande Referens(er). Risken att värdet och kursen på Värdepapperet kan fluktueras (antingen uppåt eller neråt) beror på ett antal faktorer som investeraren nogga borde överväga innan köp eller försäljning.

4. Rättsrisker:

Möten - Villkoren för Skuldebrevet kommer innehålla bestämmelser för hur man ska kalla till möten mellan innehavare av aktuella Värdepapper för att belysa frågor som generellt sett påverkar deras intressen.
